Strategic Implications Of Chinas Energy Needs:

The Strategic Implications of China's Energy Needs Philip Andrews-Speed, Xuanli Liao, Roland Dannreuther, 2014-08-27 China is frequently described as a threat to regional and global stability and its rapidly rising demand for imported energy is seen as one cause of this threat This book shows that domestic politics and foreign policy have both played a part in China's recent major energy policy decisions However China's increasing involvement in the global energy markets can be seen as an opportunity to enhance cooperation and interdependence rather than as a threat *The Strategic Implications of China's Energy Needs* C. P. Andrews-Speed, 2009 **The strategic implications of China's energy needs** C. P. Andrews-Speed, 2002 *China's Energy Strategy* Gabriel B Collins, Andrew S. Erickson, William S. Murray, Lyle J Goldstein, 2012-04-30 A variety of viewpoints is offered in this timely analysis of China's economy and the future shape of Beijing's energy consumption The authors all noted authorities in the fields of economics diplomacy energy and defense consider an unprecedented range of influences and factors to avoid the limitations of looking at the subject myopically or with political bias They conclude that while energy insecurity could eventually lead to an arms race at sea or even a naval conflict that neither side wants there is ample room for Sino American energy dialogue and cooperation in the maritime domain *The Domestic Dynamics Of China's Energy Diplomacy* Chi Zhang, 2015-09-17 Since the beginning of the 21st century China's energy diplomacy has been expanding rapidly and the country is searching for energy resources worldwide This movement has not only improved China's energy security and international relations but also enabled the Chinese national oil companies NOCs to access new investment markets and implement development strategies The Chinese government and the NOCs need each other's support to realise their respective interests The interaction between the government and the NOCs will have a critical influence on China's energy diplomacy *The Domestic Dynamics of China's Energy Diplomacy* explores the long neglected domestic dynamics of China's energy diplomacy in particular the interaction of national and corporate interests It argues that the convergence of national and corporate interests is the key momentum of China's energy diplomacy It observes that the government NOC relationship has been evolving with China's economic and enterprise reform Finally it tests the empirical evidence of the domestic dynamics of China's energy diplomacy against the three mainstream international political economy theories showing their merits and shortcomings in explaining the phenomenon before providing an alternative conceptualisation of the movement **China's Energy Security in the Twenty-First Century** Kaho Yu, 2023-03-13 Kaho Yu's *China's Energy Security in the Twenty First Century The Role of Global Governance and Climate Change* explores the evolution of China's energy security from its bilateral going out strategy to its more multilateral Belt and Road Initiative By analysing the topic from a multidisciplinary perspective this book examines China's evolving role in global energy governance through four empirical case studies China's energy cooperation with Russia and Central Asia Africa the European Union and the Asia Infrastructure Investment Bank Kaho Yu has written a

splendid overview of China's efforts to engage in bilateral cooperation to ensure greater energy cooperation between countries in central Asia Africa and Europe and improve global supply chains This book could not come at a more opportune moment as the world seems to be undecided on the efficacy of cooperative multilateralism to enhance climate and energy goals Henry Lee Director of the Environment and Natural Resources Program Belfer Center for Science and International Affairs Harvard Kennedy School Despite profound changes in technology and the economy since the Industrial Revolution energy remains central to both economic prosperity and international security Economic development is plain energy intensive The world's largest richest country is still developing The planet is embroiled in geopolitical rivalry The geographical distribution of critical minerals is skewed All these mean energy security will be a profoundly important challenge in the century ahead Yu's book provides exactly the substantive thoughtful research that we will need to begin to unpack these issues Danny Quah Li Ka Shing Professor in Economics Lee Kuan Yew School of Public Policy National University of Singapore
