The Law And Policy Of Toxic Substances Control A Case Study Of Vinyl Chloride:

The Law and Policy of Toxic Substances Control David D. Doniger, 1978 *Using Economic Incentives to Regulate Toxic Substances* Molly K. Macauley, Michael D. Bowes, Karen L. Palmer, 2017-03-16 Using case studies the authors evaluate the potential attractiveness of incentive based policies for the regulation of four specific toxic substances chlorinated solvents formaldehyde cadmium and brominated flame retardants Originally published in 1992 the authors provide a compelling demonstration of the role of case studies in determining the appropriate regulatory approach for the specific toxic substances This is a valuable title for students concerned with environmental issues and policy making **Going by the Book** Walter Kaufmann, 2017-07-05 The extent to which government should be involved with regulation in the private sector is much debated More fundamentally one might ask exactly what is regulation why is it needed how is it formulated and how is it enforced These questions are especially relevant at a time in United States history when federal involvement in spheres traditionally left to individuals is being widely debated on all sides of the political spectrum *Case Studies in Forensic Epidemiology* Sana Loue, 2007-05-08 Epidemiology has often been defined as the study of the distribution of disease together with the distribution of factors that may modify that risk of disease As such epidemiology has often been reduced to a methodology only providing a mechanism for the study of disease that is somehow removed separate and apart from the populations that serve as its focus Epidemiology however is much more than that The discipline provides a way of perceiving and knowing the world and of relating to the communities whose health and disease patterns we are trying to understand As such its usefulness extends past the construction of questionnaires the detective work inherent in tracing the source of an infection or the analysis of data Rather epidemiology serves as a point of reference and a linkage between various domains of reality in the courtroom between a community's injuries and those alleged to be responsible for those violations between the community striving to effectuate changes to improve its health and environment and the lawmakers and policymakers whose actions may dictate or control the likelihood of that change and between mainstream populations and those who become or remain marginalized and stigmatized due to disease or perceived disease *Labor Literature* United States. Department of Labor. Library, 1979 **Going by the Book** , The extent to which government should be involved with regulation in the private sector is much debated More fundamentally one might ask exactly what is regulation why is it needed how is it formulated and how is it enforced These questions are especially relevant at a time in United States history when federal involvement in spheres traditionally left to individuals is being widely debated on all sides of the political spectrum

Technological Risk Assessment P.F. Ricci, L.A. Sagan, C.G. Whipple, 2012-12-06 Proceedings of the NATO Advanced Study Institute on Technological Risk Assessment Erice Sicily Italy May 20-31 1981 **Deceit and Denial** Gerald Markowitz, David Rosner, 2013-01-15 *Environmental Health I Health Care Policy I History Of Medicine* **Environmental Change** Rosemary O'Leary, 2010-06 An examination of the impact of federal court decisions on the policies and

administration of the EPA *What Process is Due?* David M. O'Brien, 1988-03-30 Are judges competent to decide complex scientific disputes over toxic chemicals and hazardous wastes Have courts gone too far in awarding damages to victims Does the judiciary unreasonably constrain free market forces and usurp power from democratically elected branches of government What constitutes judicial due process in the regulation of health safety and environmental risks David O'Brien addresses these and other key questions in a comprehensive survey of the role of courts in resolving science policy disputes He theorizes that such disputes with their burden of scientific uncertainty and intense value conflict become judicialized in the United States because they pose an uncomfortable trilemma for policy makers how to accommodate competing demands for scientific certainty political compromise and procedural fairness in the regulation of risks When policy negotiations break down courts are called on not to settle scientific controversies per se but in their traditional role as independent tribunals for settling value conflicts and imposing norms in a pluralistic society This interpretation is enhanced by a unique set of case studies including DES and asbestos litigation and the ban on Tris a carcinogenic flame retardent O'Brien's analytical framework and his detailed examples illuminate the extent the implications and the underlying causes of the judicialization of risk regulation
