The Limits Of Convergence Globalization And Organizational Change In Argentina South Korea And Spain:

The Limits of Convergence Mauro F. Guillén, 2003-08-03 This book challenges the widely accepted notion that globalization encourages economic convergence and by extension cultural homogenization across national borders A systematic comparison of organizational change in Argentina South Korea and Spain since 1950 finds that global competition forces countries to exploit their distinctive strengths resulting in unique development trajectories Analyzing the social political and economic conditions underpinning the rise of various organizational forms Guillén shows that business groups small enterprises and foreign multinationals play different economic roles depending on a country's path to development Business groups thrive when there is foreign trade and investment protectionism and are best suited to undertake large scale capital intensive activities such as automobile assembly and construction Their growth and diversification come at the expense of smaller firms and foreign multinationals In contrast small and medium enterprises are best fitted to compete in knowledge intensive activities such as component manufacturing and branded consumer goods They prosper in the absence of restrictions on export oriented multinationals The book ends on an optimistic note by presenting evidence that it is possible though not easy for countries to break through the glass ceiling separating poor from rich It concludes that globalization encourages economic diversity and that democracy is the form of government best suited to deal with globalization's contingencies Against those who contend that the transition to markets must come before the transition to ballots Guillén argues that democratization can and should precede economic modernization This is applied economic sociology at its best broad topical full of interesting political implications and critical of the conventional wisdom [The Oxford Handbook of Business Groups](#) Asli M. Colpan, Takashi Hikino, James R. Lincoln, 2010-08-06 Business groups large diversified often family controlled organizations with pyramidal ownership structure such as the Japanese zaibatsu the Korean chaebol and the grupos economicos in Latin America have played a significant role in national economic growth especially in emerging economies Earlier variants can also be found in the trading companies often set up in Britain which operated in Asia Africa and Latin America Business groups are often criticized as premodern forms of economic organization and occasionally as symptomatic of corrupt crony capitalism but many have shown remarkable resilience navigating and adjusting to economic and political turbulence international competition and technological change This Handbook provides a comprehensive analysis of business groups around the world It examines the adaptive and competitive capabilities of business groups and their evolutionary dynamics 16 individual country chapters deal with business groups from Asia to Africa the Middle East to Latin America while overarching chapters consider the historical and theoretical context of business groups With contributions from leading experts The Oxford Handbook of business groups provides a comprehensive empirically and theoretically rich guide for scholars and policy makers **Handbook of Research on Comparative Human Resource Management** Chris Brewster, Wolfgang Mayrhofer, Elaine Farndale, 2018-04-27 This second updated and

extended edition of the Handbook of Research on Comparative Human Resource Management draws on the work of many of the world's leading researchers in the field to present the state of the art to scholars students and practitioners The Handbook provides a detailed focus on the theoretical underpinnings of Comparative HRM on comparative studies of specific areas of HRM practice and on the unique features of HRM in all the main regions of the world EBOOK: Crafting and Executing Strategy: The Quest for Competitive Advantage: Concepts and Cases Arthur Thompson,Alex Janes,Margaret Peteraf,Ciara Sutton,John Gamble,A. Strickland,2013-02-16 Crafting and Executing Strategy has been revised and updated specifically with its European readers in mind Building upon the success of previous editions it continues to explain the core concepts and key theories in strategy and illustrate them with practical managerial examples students can really relate to Brand new features have been developed to encourage readers to go beyond learning and to apply their knowledge to from a diverse range of real life scenarios including global brands SMEs public sector and not for profit organizations **Making Global Norms** Associate Professor in Political Economy and Sociology Alexandros Kentikelenis,Leonard Seabrooke,Professor in International Political Economy and Economic Sociology Leonard Seabrooke,2025-11-18 Making Global Norms provides a theoretical account and advanced methodological toolkit to study how variation in the intensity of scientific consensus and political contestation produces policy scripts that modify global norms **Boundless Faith** Robert Wuthnow,2009-05-26 In Boundless Faith the first book to look systematically at American Christianity in relation to globalization Robert Wuthnow shows that American Christianity is increasingly influenced by globalization and is in turn playing a larger role in other countries and in U S policies and programs abroad These changes he argues can be seen in the growth of support at home for missionaries and churches in other countries and in the large number of Americans who participate in short term volunteer efforts abroad These outreaches include building orphanages starting microbusinesses and setting up computer networks Drawing on a comprehensive survey that was conducted for this book as well as several hundred in depth interviews with church leaders Wuthnow refutes several prevailing stereotypes that U S churches have turned away from the global church and overseas missions that congregations only look inward and that the growing voice of religion in areas of foreign policy is primarily evangelical This fresh and revealing book encourages Americans to pay attention to the grass roots mechanisms by which global ties are created and sustained Rethinking Development in Latin America Charles H. Wood,Bryan R. Roberts,2010-11-01 **State-Market Interactions in China's Reform Era** Junmin Wang,2014-06-23 China today has the largest communist political regime and one of the most dynamic fastest growing and largest economies in the world Using a case study of China's tobacco industry this book analyses how the Chinese government was able to cultivate big state owned firms that have successfully embraced the global market The success of the Chinese economy and the many state owned firms within it have given rise to a Beijing Consensus challenging almost every principle enshrined in the so called Washington Consensus that espouses private ownership free markets and democracy By examining two

important political processes in contemporary China local state competition and global market building the book argues that the first process serves as a crucial basis for the second It illustrates how the local governments involved themselves in building and shaping the tobacco market throughout the 1980s and 1990s and how these domestic market dynamics created conditions for China's recent embrace of the international market Offering an in depth exploration of the political economic processes in a key Chinese state industry the book emphasizes that the key to understanding China's political transition is to look at how the state has been shaped by its market building projects both domestically and globally It presents an important contribution to studies on Chinese Business and International Political Economy

The Dynamics of Big Business

Veronica Binda, 2013-06-26 Throughout the Twentieth Century big business has been a basic institution Large corporations have provided a fundamental contribution to the wealth of nations and at the same time have had a remarkable impact on the political and social systems within which they have operated It is difficult to understand the development of the most advanced economies if we do not consider the specific evolution of big business in every national case On the other hand it is not possible to explain the shape and behavior of big business without considering its development as part of the history of the country in which they operate The largest US German British and French firms were key actors in favoring their nations development and even at the end of the Twentieth Century made a very important contribution to their growth In many countries a stable core of large corporations developed only relatively lately or did not develop at all and under these circumstances big business was not able to significantly participate in the economic growth of such countries Scholars who dealt with the economic history of Italy and Spain are generally unanimous in tagging these nations as industrial late comers ineffective in promoting big autochthonous private and State owned firms dominated by family companies and characterized by a strong competitive advantage on the part of small and medium sized enterprises At the same time Spanish and Italian business and economic historians have tended to say little about the role and features of big business This book thus fills a significant gap in the work on the development of Southern European capitalism and its large corporations by analyzing the Italian and Spanish cases and comparing them with each other and with what has occurred in the United States and in the largest European nations Examining both the macro dynamics national but also supra national and the micro level utilizing samples of big corporations and going deeply into some company cases this volume identifies some important protagonists of the Italian and Spanish economies such as the State families and foreign investors and investigates a wider panorama which includes the political economic and social relationships of the corporations providing insights into the form of capitalism that exists in these countries

Institutional Learning and Knowledge Transfer Across Epistemic Communities

Elias G. Carayannis, Ali Pirzadeh, Denisa Popescu, 2011-11-25 Over the past several decades as the pace of globalization has accelerated operational issues of international coordination have often been overlooked For example the global financial crisis that began in 2007 is attributed in part to a lack of regulatory oversight As a result supranational organizations such as

the G 20 the World Bank and the International Monetary Fund have prioritized strengthening of the international financial architecture and providing opportunities for dialogue on national policies international co operation and international financial institutions Prevailing characteristics of the global economic systems such as the increasing power of financial institutions changes in the structure of global production decline in the authority of nation states over their national economy and creation of global institutional setting e g global governance have created the conditions for a naturally evolving process towards enabling national epistemic communities to create institutions that comply with global rules and regulations can control crises In this context transfer of technical knowledge from the larger organizations and its global epistemic communities to member communities is becoming a policy tool to convince participants in the international system to have similar ideas about which rules will govern their mutual participation In the realm of finance and banking regulation the primary focus is on transfer of specialized and procedural knowledge in technical domains such as accounting procedures payment systems and corporate governance principles thereby promoting institutional learning at national and local levels In this volume the authors provide in depth analysis of initiatives to demonstrate how this type of knowledge generated at the international organization level is codified into global standards and disseminated to members particularly in the developing world where the legal and regulatory infrastructure is often lacking They argue that despite the challenges when a country intends to join the global system its institutions and economic structures need to move toward the global norms In so doing they shed new light on the dynamics of knowledge transfer financial regulation economic development with particular respect to supporting global standards and avoiding future crises
