The Leo Conversion David Smith,1980 The Leo Conversion David Nathan Smith,David Smith,1980 Conversion and Catastrophe in German-Jewish Émigré Autobiography Abraham Rubin,2024-11-30 Conversion and Catastrophe in German Jewish migr Autobiography is a collective biography of four German Jewish converts to Christianity recounting their spiritual and confessional journeys against the backdrop of the Holocaust and its aftermath Focusing on personal testimonies that fuse historical trauma and spiritual illumination into one narrative the book explores how Jewish emigrants interpreted their experiences of persecution and displacement through the hermeneutics of Christian conversion It draws on autobiographies novels religious writings and newspaper articles as well as unpublished archival materials such as diaries lecture notes and private correspondence The book explores how chosen genres of writing both enabled and hindered self understanding It also assesses whether the literary paradigm of Christian conversion highlighting an individual s separation from a past sinful self is suitable for expressing a collective catastrophe Applying psychoanalysis disability studies and autobiographical theory to the life writing of converted Jews the book offers new avenues for conceptualizing the Jewishness of historical subjects who disavowed their ties to Judaism Published in association with the United States Holocaust Memorial Museum **James Baldwin** Harold Bloom,2007 A collection of essays presenting critiques and analysis of the major works of the African American author *Banking Automation* G. quantitative level compared to the modern world might have been different. In fact, by means of translations and trade, for instance, global connections were established and maintained over the centuries. Archetypal motifs developed in many literatures indicate how much pre-modern people actually shared. But we also discover hard-core facts of global economic exchange: import of exotic medicine and, on another level, intensive intellectual debates on religious issues. Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable, often desirable and at times feared, of course. The pre-modern world was much more on the move and reached out to distant lands out of curiosity, economic interests and political and military concerns. Diplomats crisscrossed the continents and artists, poets and craftsmen traveled widely. We can identify, for instance, both the Vikings and the Arabs as global players long before the rise of modern globalism, so this volume promises to rewrite many of our traditional notions about pre-modern worldviews, economic conditions and the literary sharing on a global level, as perhaps best expressed by the genre of the fable.

To Be Continued
Hope Apple, Merle L. Jacob, 2000-10-10. Keeping track of prolific authors who write fiction series was quite challenging for even the most ardent fan until *To Be Continued* debuted in 1995. Now readers will be happy that the soon-to-be-released second edition has added 1,600 new books and 400 new series. *To Be Continued* Second Edition maintains the first volume's successful formula that featured concise A to Z entries packed with useful information, including titles, publishers, publication dates, genre categories, annotations and subject terms. Among the genre categories that can be found in *To Be Continued* are romance, science fiction, crime novel, horror, adventure, fantasy, humor, western, war, Christian fiction and others.

Thinking Like a Planet
J. Baird Callicott, 2014-01-06. Bringing together ecology, evolutionary moral psychology and environmental ethics, J. Baird Callicott counters the narrative of blame and despair that prevails in contemporary discussions of climate ethics and offers a fresh, more optimistic approach. Whereas other environmental ethicists limit themselves to what Callicott calls Rational Individualism in discussing the problem of climate change only to conclude that essentially there is little hope that anything will be done in the face of its perfect moral storm, in Stephen Gardiner's words, Callicott refuses to accept this view. Instead, he encourages us to look to the Earth itself and consider the crisis on grander spatial and temporal scales as we have failed to in the past. Callicott supports this theory by exploring and enhancing Aldo Leopold's faint sketch of an Earth ethic in *Some Fundamentals of Conservation in the Southwest*, a seldom-studied text from the early days of environmental ethics that was written in 1923 but not published until 1979, after the environmental movement gathered strength.
