Social Context Of Learning And Development:

The Social Context of Learning and Development John C. Glidewell, 1977 The Social Context of Learning and Development John C. Glidewell, 1977 The Social Contexts of Young People, 2024-02-14 This edited volume investigates young people within their social contexts. The focus is on engaging young people as they transition from youth into young adulthood. Key advantages of this book are its embodiment of interdisciplinarity in gathering research across a range of diverse methods, theories, settings, and countries. The volume begins with reviews of key theories and methods in understanding young people within their social networked contexts of generosity, networks, identity, and ethnic heritage. The second section includes chapters attending to education and work as contexts for transitions to adulthood, counseling, meaning, and aesthetics from high school to college and into workplaces. The third section includes chapters studying community engagement and the well-being of young people, including social support, meaning in life, religiosity, spirituality, stress coping, yoga, and sports. The diverse topics addressed in this edited volume are generosity, philanthropy, voluntary action, social networks, social identity, personhood, ethnic heritage, post colonialism, intersectionality, personality, lived experiences, informal economy, sustainability, pandemic, family support, educational counselors, motivation, Not in Education, Employment, or Training, NEET, everyday aesthetics, built environment, generativity, community, adult allies, youth engagement, life satisfaction, spiritual identity, religious affiliation, stress, practicing yoga, sexual violence, athletes, sports, climate pressures, to perform resilience, and neurodiversity. Disciplines span economics, business, education, sociology, psychology, medical science, geography, journalism, architecture, engineering, science, and technology, and applied sciences. Methods include quantitative surveys, qualitative in-depth interviews, life course, biographies, ethnographic case studies, bibliometric analysis, and integrative reviews. Young people are investigated across thirteen countries including the United States, United Kingdom, Yemen, Ghana, Bahrain, Norway, Denmark, Finland, Sweden, Iceland, Canada, Romania, and the Netherlands. **Work, Subjectivity and Learning** Stephen Billett, Tara Fenwick, Margaret Somerville, 2007-06-03 In recent years, efforts to understand learning for and throughout working life have moved away from a focus on workplace training to concerns about learning as a component and outcome of engaging in work and work-related activities and interactions. This shift acknowledges a broader set of workplace factors that shape workers' learning and development. Yet equally, it acknowledges that this learning through engagement is also necessarily shaped by the diverse ways that individuals elect to engage or participate in workplace activities. Central here is the issue of individuals' subjectivity and how this is shaped by but shapes engagement in work and therefore what learning flows from their participation. It is in considering the relations among subjectivity, learning, and work that it is possible to advance both the conceptual and procedural bases for understanding learning through and for working life. Moreover, the focus on relations among subjectivity, work, and learning represents a point of convergence for diverse disciplinary traditions and practices that are provided by the book's contributors. In this way

the contributions represent something of the emerging perspectives that are elaborating the complex relations among subjectivity work and learning and circumstances in which they are played out *Campus Service Workers Supporting First-Generation Students* Georgina Guzmán, La'Tonya Miles, Stephanie Youngblood, 2021-11-29 This unique collection of testimonials critical essays and first hand accounts demonstrates the significant contribution of campus service workers in supporting the retention and success of first generation college students Using a Freirean framework to ground individual stories the text identifies ways in which campus workers connect with students provide informal mentorship and offer culturally relevant support during students transition to college and beyond Drawing on a range of interviews case studies and research studies emphasis is placed on the unique challenges faced by first generation and minority students such as cultural alienation imposter syndrome language barriers and financial insecurity Ultimately the text dismantles notions of social hierarchies that separate workers and college students and encourages institutions to invest in these workers and their contribution to student well being and success This book will benefit researchers academics and educators with an interest in the higher education and student affair practice and higher education administration more broadly Those specifically interested in multicultural education and the study of race and ethnicity within US higher educational contexts will also benefit from this book *Encyclopedia of Bilingual Education* Josue M. The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement Kurt Kraiger, Jonathan Passmore, Nuno Rebelo dos Santos, Sigmar Malvezzi, 2020-06-02. This Handbook is sure to become a key resource for any researcher or professional looking for the latest and most innovative thinking from around the world on the full range of topics related to training, development and performance management. Bradford S. Bell, PhD, Cornell University, USA, Editor, Personnel Psychology. I wish I could have accessed this book many years ago. Comprehensive and scholarly, the four sections: training, e-learning, personal and professional development, and performance management, fit well together and address a gap in the literature that has been apparent for some time. The psychological perspective speaks to growing interest in the micro foundations of strategic success, and the blending together of both formal and informal perspectives on learning in organizations ensures a holistic rather than piecemeal approach to the question of how to build individual knowledge, skills, and competences in organizations. I believe that this book will make a significant impact on its target audience in this critical area.

of Living in Groups for Development Ildikó Király, David Buttelmann, 2017-05-25 One of the distinctive features of humans is their unique sociality Humans live in organized societies that are characterized by a high level of interdependence of group members in various aspects of life ranging from the economic phenomenon of labour division to providing emotional support to others Under these circumstances the capacity to track social connections within and between groups has great adaptive value in managing everyday life We may understand the importance and adaptive value of tracking the scope of culturally

shared knowledge if we consider the importance of cultural norms in guiding behaviour To become a competent member of their cultural group one must be able to conform to the group s specific behavioural norms and to accumulate culturally shared knowledge Acquiring this knowledge is essential for successful social interactions In contrast to current dominant explanatory theories emphasizing that social category formation is simply rooted in humans need to belong and affiliate with a group the aim of this e book is to provide evidence that in addition to its affiliative role children form social categories for epistemic purposes We show that children use specific cues like kinship patterns of resource allocation and consensus to understand group cohesion Section 1 Once children figured out who is in group and who is out group they show a significant in group bias in attention acting and learning Section 2 Yet this in group bias can be attenuated by induced synchronous behavior Section 3 Handbook of Psychology, Developmental Psychology Irving B.
