The Ungovernable Society Grégoire Chamayou, 2021-01-28 Rebellion was in the air Workers were on strike students were demonstrating on campuses discipline was breaking down No relation of domination was left untouched the relation between the sexes the racial order the hierarchies of class relationships in families workplaces and colleges The upheavals of the late 1960s and early 1970s quickly spread through all sectors of social and economic life threatening to make society ungovernable This crisis was also the birthplace of the authoritarian liberalism which continues to cast its shadow across the world in which we now live To ward off the threat new arts of government were devised by elites in business related circles which included a war against the trade unions the primacy of shareholder value and a dethroning of politics The neoliberalism that thus began its triumphal march was not however determined by a simple state phobia and a desire to free up the economy from government interference On the contrary the strategy for overcoming the crisis of governability consisted in an authoritarian liberalism in which the liberalization of society went hand in hand with new forms of power imposed from above a strong state for a free economy became the new magic formula of our capitalist societies The new arts of government devised by ruling elites are still with us today and we can understand their nature and lasting influence only by re examining the history of the conflicts that brought them into being

The Dark Places of Business Enterprise Pietro Frigato, Francisco J. Santos-Arteaga, 2019-04-05 This book considers Thorstein Veblen s central preoccupation with the dark places of business enterprise an integral part of the old institutional economics Combining the contributions made by Karl William Kapp and Philip Mirowski it proposes the systematization of an adjoined institutional theory of social costs of business enterprise useful for the analysis of contemporary crises The Dark Places of Business Enterprise explores the research potential of the theory of social costs for the analysis of actual business behavior in the current globalized privatization regime It begins with a detailed outline of Veblen s critique of business enterprise and market competition before illustrating the methodical enrichment of this approach through Kapp s work Finally it concludes by proposing the integration of the Veblenian Kappian approach with Mirowski s theory of markets and business doubt manufacture The resulting theory of social costs will shed light on the ubiquitous business control of society under the now dominant computer based technological infrastructure This

interdisciplinary foundation of the theory of social costs encompassing knowledge from computer science and engineering to natural sciences provides the tools required to analyze this great transformation
