**Europe 2003** Europa Publications,2002 An in depth survey of the region presenting the latest economic and political developments It includes expert comment on issues of regional importance up to date statistics a directory of institutes and companies and political profiles *Social Insurance, Informality, and Labor Markets* Markus Frölich,David Kaplan,Carmen Pagés,Jamele Rigolini,David Robalino,2014-12-04 Most countries implement social protection programs to help individuals manage risks such as unemployment disability illness longevity or death In many middle income countries these are often based on a Bismarckian model named after Otto von Bismarck where benefits are financed by contributions levied on salaried employment In countries with a large informal sector however only a fraction of the population is covered by this system and non contributory programs have been added or are planned to increase coverage This can create distortions in the labor market and the book is about policies to expand the coverage of social insurance programs to all workers without reducing incentives to job creation and formal work While few would argue against the need and social merits of social insurance and social assistance programs there are growing concerns about their unintended consequences on labor markets because of poor design The programs can distort incentives and individual behaviors in ways that either reduce employment levels and or promote informality ultimately affecting productivity and economic performance For instance high social security contribution rates can reduce formal employment badly designed unemployment benefits can reduce incentives to keep search and take jobs and fragmented social assistance programs can become a tax on formal labor and encourage informality The book reviews the evidence regarding the effects of social insurance and social assistance programs on labor market outcomes and discusses options to improve their design and implementation The book focuses particularly on middle income countries in Latin America and Asia with a large informal sector and suggests ways to reduce these distortions and better manage and finance the subsidies to make coverage universal while creating good jobs The book compiles expert papers from the joint conferences of the World Bank WB the Institute for the Study of Labor IZA and the Inter American

Development Bank IDB on Employment and Development      Reflections on 1989 in Eastern Europe Terry Cox, 2013-09-13  
This book presents a selection of recent research on the events and developments of 1989 in Eastern Europe. It offers a mix of detailed examinations of the events of 1989 in Eastern Europe, thoughtful and considered appraisals of developments and middle range theoretical discussions of patterns of cause and effect. The authors range in their approaches from detailed examinations of government and ruling party papers from the archives, some of it originally labelled top secret, to personal observations and oral history based on interviews with participants, to analysis of survey data and official statistics. In their chosen focus, the essays range from explorations of the emerging crisis in the communist regimes that led to the events of 1989, reflections and insights into the events and changing mood during 1989 itself, and examinations of some of the consequences and legacies of 1989. This book was published as a special issue of *Europe Asia Studies*.      Record of proceedings, 1992      Aspects of Independent Romania's Economic History with Particular Reference to Transition for EU Accession David Turnock, 2016-04-15  
After fifteen years of transition in the former communist states of Central and Eastern Europe, it has become clear that for a substantial number, the objective of reform and restructuring process is a market system in line with membership of the EU. In this study, the long term economic transformation of Romania is studied, offering a detailed narrative and thematic account of events from the nineteenth to the twenty-first centuries. From the first steps towards large scale industrialisation begun prior to the First World War, through the accelerated pace set by the communist regime after 1945 and the uncertainty following its subsequent collapse in 1989, the book addresses a wide range of pertinent issues that have shaped Romania's economic development. The study also offers an interpretation of a distinctive phase in the modernisation of post-communist Romania, supported by economic historical surveys of the preceding century as a context for recent restructuring on the eve of EU accession. This is linked with trends in the region as a whole, so that a broad perspective is maintained throughout the book. By highlighting Romania's position as one of more backward accession states and considering in what ways its experience during transition differs from the more developed states of the region, this study offers a valuable insight into both the history of Romania and its future prospects. Furthermore, it provides a valuable case study that can be compared and contrasted with other countries who are likewise still grappling with the legacy of a centralised economy and in the process of adopting a more market orientated approach in order to gain EU membership. As such, this study will be of interest not only to historians and economists but anyone with an interest in the expansion of the European Union.      **Trade Union Strategies in Central and Eastern Europe** Dimitrina Dimitrova, Jacques Vilroix, 2005  
This publication contains eight essays which explore the changing role of trade unions in ex-communist countries during the 15 years of transition from a planned to a market economy. It is intended to provide a mechanism to stimulate debate and discussion amongst trade unions in the region as to how they can improve representation of members, examine structures and strengthen their influence in public policy. It seeks to provide a framework for the process of union strategic planning.

and also to help guide ILO technical work in this area      **Journal of Economic Literature** ,2003      Competitiveness and Private Sector Development Competitiveness in South East Europe 2021 A Policy Outlook OECD,2021-07-05 The future sustainable economic development and well being of citizens in South East Europe depend on greater economic competitiveness Reinforcing the region s economic potential in a post COVID 19 context requires a holistic inclusive and growth oriented approach to policy making
