**Social Judgement Theory** Michael E. Doherty, 1996 This special issue of Thinking and Reasoning is devoted to social judgement theory SJT which has its origins in Egon Brunswik's probabilistic functionalism The first paper discusses the history and theory of SJT and explores Hammond's distinction between coherence and correspondence criteria The next paper presents the major methodological approaches of SJT with a focus on the Lens Model Four applications follow including an exploration of the medical applications of SJT

**Interactive Granular Computations in Networks and Systems Engineering: A Practical Perspective** Andrzej Jankowski, 2017-06-25 The book outlines selected projects conducted under the supervision of the author Moreover it discusses significant relations between Interactive Granular Computing IGrC and numerous dynamically developing scientific domains worldwide along with features characteristic of the author's approach to IGrC The results presented are a continuation and elaboration of various aspects of Wisdom Technology initiated and developed in cooperation with Professor Andrzej Skowron Based on the empirical findings from these projects the author explores the following areas a understanding the causes of the theory and practice gap problem TPGP in complex systems engineering CSE b generalizing computing models of complex adaptive systems CAS in particular natural computing models by constructing an interactive granular computing IGrC model of networks of interrelated interacting complex granules c granules belonging to a single agent and or to a group of agents c developing methodologies based on the IGrC model to minimize the negative consequences of the TPGP The book introduces approaches to the above issues using the proposed IGrC model In particular the IGrC model refers to the key mechanisms used to control the processes related to the implementation of CSE projects One of the main aims was to develop a mechanism of IGrC control over computations that model a project's implementation processes to maximize the chances of its success while at the same time minimizing the emerging risks In this regard the IGrC control is usually performed by means of properly selected and enforced among project participants project principles These principles constitute examples of c granules expressed by complex vague concepts represented by c granules too The c granules evolve with time in particular the meaning of the concepts is also subject of change This methodology is illustrated using project principles applied by the author during the implementation of the POLTAX AlgoTradix Merix and Excavio projects outlined in the book

Cognitive Illusions Rüdiger F Pohl, 2016-07-22 Cognitive Illusions explores a wide range of fascinating psychological effects in the way we think judge and remember in our everyday lives Featuring contributions from leading researchers the book defines what cognitive illusions are and discusses their theoretical status are such illusions proof for a faulty human information processing system or do they only represent by products of otherwise adaptive cognitive mechanisms Throughout the book background to phenomena such as illusions of control overconfidence and hindsight bias are discussed before considering the respective empirical research potential explanations of the phenomenon and relevant applied perspectives Each chapter also features the detailed description of an experiment that can be used as classroom demonstration Featuring six new chapters this edition has been thoroughly updated throughout to reflect recent research and changes of focus within the field This book will be of interest to students and researchers of cognitive illusions specifically those focusing on thinking reasoning decision making and memory The Development of Thinking and Reasoning Pierre Barrouillet, Caroline Gauffroy, 2013-06-26 Thinking and reasoning are key activities for human beings In this book a distinguished set of contributors provides a wide readership with up to date scientific advances in the developmental psychology of thinking and reasoning both at the theoretical and empirical levels The first part of the book illustrates how modern approaches to the study of thinking and reasoning have gone beyond the Piagetian legacy through the investigation of avenues previously not explored and by demonstrating that young children have higher capacities than was assumed within the Piagetian tradition The second part focuses upon theoretical and empirical investigations of the interplay between logic and intuition in reasoning and decision making and how these forms of thinking evolve with age through the general framework of what is known as dual process theories Contrary to Piaget's claim it becomes apparent that elaborate adult reasoning could rely on some form of intuition The Development of Thinking and Reasoning provides psychologists educators and everyone interested in child development with an integrated and up to date series of chapters written by prominent specialists in the areas of thinking reasoning and decision making **In Two Minds** Jonathan St. B. T. Evans, Keith

Frankish,2009 This book explores the idea that we have two minds one that is automatic unconscious and fast the other controlled conscious and slow In recent years there has been great interest in so called dual process theories of reasoning and rationality According to dual processes theories there are two distinct systems underlying human reasoning an evolutionarily old system that is associative automatic unconscious parallel and fast and a more recent distinctively human system that is rule based controlled conscious serial and slow Within the former processes are held to be innate and to use heuristics which evolved to solve specific adaptive problems In the latter processes are taken to be learned flexible and responsive to rational norms Despite the attention these theories are attracting there is still poor communication between dual process theorists themselves and the substantial bodies of work on dual processes in cognitive psychology and social psychology remain isolated from each other This book brings together leading researchers on dual processes to summarize the state of the art highlight key issues present different perspectives explore implications and provide a stimulus to further work It includes new ideas about the human mind both by contemporary philosophers interested in broad theoretical questions about mental architecture and by psychologists specialising in traditionally distinct and isolated fields For all those in the cognitive sciences this is a book that will advance dual process theorizing promote interdisciplinary communication and encourage further applications of dual process approaches

**Human Thinking** S. Ian Robertson, 2020-11-23

Human Thinking The Basics provides an essential introduction into how we develop thoughts the types of reasoning we engage in and how our thinking can be tailored by subconscious processing Beginning with the fundamentals the book examines the mental processes that shape our thoughts the trajectory of how thought evolved within the animal kingdom and the stages of development of thinking throughout childhood Robertson insightfully explains the effectiveness of political slogans and advertisements in engaging shallow information processing and the effortful analytical processing required in critical thinking Delving into fascinating topics such as magical thinking in the form of religion and superstition fake news and motivated ignorance the book explains the discrepancy between reality and our internal mental representations the influence of semantics on deductive reasoning and the error prone yet adaptive nature of biases Containing student friendly features including end of chapter summaries demonstrative puzzles simple figures and further reading lists this book will be essential reading for all students of thinking and reasoning

*The Epistemological Spectrum* David K. Henderson, Terence Horgan, 2011-08-04

David Henderson and Terence Horgan set out a broad new approach to epistemology which they see as a mixed discipline having both a priori and empirical elements They defend the roles of a priori reflection and conceptual analysis in philosophy but their revisionary account of these philosophical methods allows them a subtle but essential empirical dimension They espouse a dual perspective position which they call iceberg epistemology respecting the important differences between epistemic processes that are consciously accessible and those that are not Reflecting on epistemic justification they introduce the notion of transglobal reliability as the mark of the cognitive processes that are suitable for humans Which cognitive processes these are depends on contingent facts about human cognitive capacities and these cannot be known a priori

**Cognitive Sophistication and the Development of Judgment and Decision-Making** Maggie E. Toplak, 2021-10-27

Cognitive Sophistication and the Development of Judgment and Decision Making reviews the existing literature on the development of reasoning judgment and decision making with a primary focus on measures from the heuristics and biases tradition The book presents a model based on cognitive sophistication to examine the development of judgment and decision making including age related differences in developmental samples associations with intellectual

abilities and executive functions and associations with dispositional tendencies that support judgment and decision making. Additional sections cover the empirical findings of a longitudinal study conducted over seven years that tie together the discussed aspects related to cognitive sophistication. This book will provide a much needed description of the theoretical and conceptual issues, a review of empirical findings, and an integrative summary of the implications for developmental models of reasoning, judgment, and decision making. Explores whether individual heuristics and biases are associated. Reviews individual differences in cognitive abilities and thinking dispositions. Examines reasoning from the lens of cognitive sophistication. Discusses the implications for models including dual process models. Tests and elaborates using empirical findings from a longitudinal study.

Comparative Decision-Making Analysis Philip H. Crowley, Thomas R. Zentall, 2013-03-21. Decisions are made by individual humans but also by corporations, plants, robots, and computer programs. The authors of this volume help initiate a powerful new comparative dimension for our analysis and application of decision making across an enormous range of intellectual enquiry.

**Social Work**, 1990

**Experimental Philosophy, Rationalism, and Naturalism** Eugen Fischer, John Collins, 2015-04-24. Experimental philosophy is one of the most exciting and controversial philosophical movements today. This book explores how it is reshaping thought about philosophical method. Experimental philosophy imports experimental methods and findings from psychology into philosophy. These fresh resources can be used to develop and defend both armchair methods and naturalist approaches on an empirical basis. This outstanding collection brings together leading proponents of this new meta-philosophical naturalism from within and beyond experimental philosophy. They explore how the empirical study of philosophically relevant intuition and cognition transforms traditional philosophical approaches and facilitates fresh ones. Part One examines important uses of traditional armchair methods which are not threatened by experimental work and develops empirically informed accounts of such methods that can potentially stand up to experimental scrutiny. Part Two analyses different uses and rationales of experimental methods in several areas of philosophy and addresses the key methodological challenges to experimental philosophy. Do its experiments target the intuitions that matter in philosophy? And how can they support conclusions about the rights and wrongs of philosophical views? Essential reading for students of experimental philosophy and metaphilosophy. *Experimental Philosophy, Rationalism, and Naturalism* will also interest students and researchers in related areas such as epistemology and the philosophies of language, perception, mind, and action science, and psychology.

The Wiley Blackwell Handbook of Judgment and Decision Making, 2 Volume Set Gideon Keren, George Wu, 2016-02-16. A comprehensive up to date examination of the most important theory, concepts, methodological approaches, and applications in the burgeoning field of judgment and decision making (JDM). Emphasizes the growth of JDM applications with chapters devoted to medical decision making, decision making and the law, consumer behavior, and more. Addresses controversial topics from multiple perspectives such as choice from description versus choice from experience and contrasts between empirical methodologies employed in behavioral economics and

psychology Brings together a multi disciplinary group of contributors from across the social sciences including psychology economics marketing finance public policy sociology and philosophy 2 Volumes      **Dual-Process Theories of the Social Mind** Jeffrey W. Sherman, Bertram Gawronski, Yaacov Trope, 2014-05-09 This volume provides an authoritative synthesis of a dynamic influential area of psychological research Leading investigators address all aspects of dual process theories their core assumptions conceptual foundations and applications to a wide range of social phenomena In 38 chapters the volume addresses the pivotal role of automatic and controlled processes in attitudes and evaluation social perception thinking and reasoning self regulation and the interplay of affect cognition and motivation Current empirical and methodological developments are described Critiques of the duality approach are explored and important questions for future research identified      *Logic and Uncertainty in the Human Mind* Shira Elqayam, Igor Douven, Jonathan St B. T. Evans, Nicole Cruz, 2020-06-10 David E Over is a leading cognitive scientist and with his firm grounding in philosophical logic he also exerts a powerful influence on the psychology of reasoning He is responsible for not only a large body of empirical work and accompanying theory but for advancing a major shift in thinking about reasoning commonly known as the new paradigm in the psychology of human reasoning Over s signature mix of philosophical logic and experimental psychology has inspired generations of researchers psychologists and philosophers alike over more than a quarter of a century The chapters in this volume written by a leading group of contributors including a number who helped shape the psychology of reasoning as we know it today each take their starting point from the key themes of Over s ground breaking work The essays in this collection explore a wide range of central topics such as rationality bias dual processes and dual systems as well as contemporary psychological and philosophical theories of conditionals It concludes with an engaging new chapter authored by David E Over himself which details and analyses the new paradigm psychology of reasoning This book is therefore important reading for scholars researchers and advanced students in psychology philosophy and the cognitive sciences including those who are not familiar with Over s thought already      **Behavioral Law and Economics** Eyal Zamir, Doron Teichman, 2018-06-05 In the past few decades economic analysis of law has been challenged by a growing body of experimental and empirical studies that attest to prevalent and systematic deviations from the assumptions of economic rationality While the findings on bounded rationality and heuristics and biases were initially perceived as antithetical to standard economic and legal economic analysis over time they have been largely integrated into mainstream economic analysis including economic analysis of law Moreover the impact of behavioral insights has long since transcended purely economic analysis of law in recent years the behavioral movement has become one of the most influential developments in legal scholarship in general Behavioral Law and Economics offers a state of the art overview of the field Eyal Zamir and Doron Teichman survey the entire body of psychological research that lies at the basis of behavioral analysis of law and critically evaluate the core methodological questions of this area of research Following this the book discusses the fundamental normative questions stemming from the

psychological findings on bounded rationality and explores their implications for setting the law's goals and designing the means to attain them. The book then provides a systematic and critical examination of the contributions of behavioral studies to all major fields of law including property, contracts, consumer protection, torts, corporate securities, regulation, antitrust, administrative, constitutional, international, criminal, and evidence law, as well as to the behavior of key players in the legal arena: litigants and judicial decision makers.
