Structure and Change in Indian Society Milton B. Singer, Bernard S. Cohn, Recent theoretical and methodological innovations in the anthropological analysis of South Asian societies have introduced distinctive modifications in the study of Indian social structure and social change This book reporting on twenty empirical studies of Indian society conducted by outstanding scholars reflects these trends not only with reference to Indian society itself but also in terms of the relevance of such trends to an understanding of social change more generally The contributors demonstrate the adaptive changes experienced by the studied groups in particular villages towns cities and

regions The authors view the basic social units of joint family caste and village not as structural isolates but as intimately connected with one another and with other social units through social and cultural networks of various kinds that incorporate the social units into the complex structure of Indian civilization Within this broadened conception of social structure these studies trace the changing relations of politics economics law and language to the caste system Showing that the caste system is dynamic with upward and downward mobility characterizing it from pre British times to the present the studies suggest that the modernizing forces which entered the system since independence parliamentary democracy universal suffrage land reforms modern education urbanization and industrial technology provided new opportunities and paths to upward mobility but did not radically alter the system The chapters in this book show that the study of Indian society reveals novel forms of social structure change They introduce methods and theories that may well encourage social scientists to extend the study of change in Indian society to the study of change in other areas Milton Singer 1912 1994 was Paul Klapper Professor of Social Sciences and professor of anthropology at the University of Chicago He was a fellow of the Academy of Arts and Sciences He was also chosen as a distinguished lecturer by the American Anthropological Association and was the recipient of the Distinguished Scholar Award of the Association for Asian Studies Bernard S Cohn 1918 2003 was Professor Emeritus of Anthropology at the University of Chicago He was widely known for his work on India during the British colonial period and wrote many books on the subject of India including *India The Social Anthropology of a Civilization* 1971 *An Anthropologist among the Historians and Other Essays* 1987 and *Colonialism and its Forms of Knowledge* 1996 *Social Control and Social Change* Liddell Henry, 2019-08-24 Socialization is predominately an unconscious process by which a new born child learns the values beliefs rules and regulations of society or internalizes the culture in which it born Social control is described in detail at the end of the book It is intended as a book for undergraduate and postgraduate students of sociology and a reference tool to the researchers and academic professionals this comprehensive and well structured book presents in a systematic way the Social Control and Social Change The book is undoubtedly a valuable asset for the students researchers as well as teachers of sociology In addition general readers concerned with social aspects and social progress will find it extremely informative [Social Structure Of Contemporary China](#) Xueyi Lu, 2012-07-24 This book is the third study done by the Research Group on Social Structure Change in Contemporary China a group affiliated with the Institute of Sociology Chinese Academy of Social Sciences The group has focused on the process of development and change in contemporary Chinese social structure and come to the following conclusions Contemporary China is transitioning from a traditional agricultural and rural society to a modern industrialized and urban society from a highly centralized planned economy to a robust socialist market economic system The entire society is undertaking an unprecedented evolution During the three decades of reform and opening up China has made brilliant achievements never seen before in history Now China is in a critical period of reform and opening up with very complex far reaching and closely intertwined social problems which

are also unprecedented After deep and detailed analysis the Research Group believes that these problems cannot be resolved only by economic methods In order to get to the roots of these social problems China must develop new social policies strengthen the social structure and carry out social system reform The core purpose of the book is to recommend theories and methods on social structure to society and readers and to investigate the development and change in China s social structure We believe that social structure theory a brand new point of view to analyze the current situation is capable of deciphering the social contradictions in China s development to some extent as opposed to mere economic theory which is inadequate to fully address the structural problems in China
