Transported to Botany Bay Dorice Williams Elliott,2019-04-30 Literary representations of British convicts exiled to Australia were the most likely way that the typical English reader would learn about the new colonies there In *Transported to Botany Bay* Dorice Williams Elliott examines how writers from canonical ones such as Dickens and Trollope to others who were themselves convicts used the figure of the felon exiled to Australia to construct class race and national identity as intertwined Even as England s supposedly ancient social structure was preserved and venerated as the true England the transportation of some 168 000 convicts facilitated the birth of a new nation with more fluid class relations for those who didn t fit into the prevailing national image In analyzing novels broadsides and first person accounts Elliott demonstrates how Britain linked class race and national identity at a key historical moment when it was still negotiating its relationship with its empire The events and incidents depicted as taking place literally on the other side of the world she argues deeply affected people s sense of their place in their own society with transnational implications that are still relevant today

Routledge International Handbook of Critical Policing Studies Nicole L. Asquith,Jess Rodgers,James

Clover, Gary Corder, Angela Dwyer, Rishweena Ahmed, 2025-06-06 Critical analyses of policing have accompanied accounts of the police since the early days of modern police organisations. More so than ever, police and policing are subject to close and critical scrutiny from governments and the public. It is timely therefore to consider what is critical about police and policing. The Routledge International Handbook of Critical Policing Studies brings together scholars and practitioners to critically explore the full continuum of safety governance from police reforms to the redistribution of policing resources to the replacement of state police. In offering the three Rs of policing reform, redistribute, replace, we provide a conceptualisation of critical policing studies that acknowledges a continuum of policing that mirrors the different trajectories, priorities and possibilities that exist across different cultural and historical contexts. This collection is composed of 65 scholars and practitioners across 39 chapters, edited by a team of police academics and policing scholars, to showcase accounts of policing from outside the Anglo-European metropole, privileging works from First Nations people and from the Global South, and presenting contextualised solutions to the problems facing police and communities. This Handbook identifies the key issues facing the police and safety governance across the globe and offers insights into the implications for policing theory and practice, proposing solutions to some of the most intransigent problems facing contemporary societies. Individually and as a collection, this Handbook will be an essential read for scholars, practitioners and activists alike. Organised Crime and

Law Enforcement David Bright, Chad Whelan, 2020-12-30 Organised Crime and Law Enforcement: A Network Perspective examines organised crime and law enforcement through the conceptual lens of networks. The book takes stock of the many ways in which network theories and concepts, including social network analysis, can apply to studying both organised crime and law enforcement responses to organised crime. It is the first attempt to bring these diverse network perspectives and distinct fields of research together. The book is organised into two parts. The first part uses network perspectives to advance our understanding of the interconnected social structure of organised criminal groups, to expose their strengths and vulnerabilities and to illuminate factors that enable such groups to undertake complex criminal activities. The second part uses a network lens to examine the challenges that organised criminal groups present for a wide range of law enforcement agencies and the utility of network theories and concepts in understanding and informing their responses to organised crime. Written in a clear and direct style, the book will appeal to scholars and practitioners of criminology, sociology, law enforcement and all those interested in learning more about theories of organised crime and its relationship with law enforcement.

Match-Fixing in International Sports M.R. Haberfeld, Dale Sheehan, 2013-11-23 Match fixing has become a widespread international problem in recent years. It includes everything from bribery of players to putting undue influences on the owners of the soccer clubs, managers, coaches and others who have the ability to affect the final scores. In addition, match fixing spills over into the arena of illegal betting, in person and online, which creates a host of additional organized crime opportunities, including human trafficking, prostitution, drugs, extortion and even terrorism. This timely volume brings

together international contributions with an aim is to increase awareness of the problems associated with match fixing and the degree to which key agents in sport particularly young people are vulnerable The contributions are based on INTERPOL s Global Experts Meeting in Singapore in November 2012 which brought together key speakers to discuss issues surrounding match fixing and how to combat corruption in football through channels of education The purpose of this meeting was to identify ways that academia can play a role in developing and implementing training modules and academic courses including certification procedures to prevent match fixing and develop lines of study at all educational levels This unique work reflects the gravity of the situation around the world together with possible solutions
