**Formalism and the Sources of International Law** Jean d'Aspremont, 2013-05-23 This book revisits the theory of the sources of international law from the perspective of formalism It critically analyses the virtues of formalism construed as a theory of law ascertainment as a means of distinguishing between law and non law The theory of formalism is re evaluated against the backdrop of the growing acceptance by international legal theorists of the blurring of the lines between law and non law At the same time the book

acknowledges that much international normative activity nowadays takes place outside the ambit of traditional international law and that only a limited part of the exercise of public authority at the international level results in the creation of international legal rules. The theory of ascertainment that the book puts forward attempts to dispel some of the illusions of formalism that accompany the traditional sources of international law. It also sheds light on the tendency of scholars, theorists and advocates to deformalize the identification of international legal rules with a view to expanding international law. The book seeks to revitalize and refresh the formal identification of rules by engaging with some tenets of the postmodern critique of formalism. As a result, the book not only grapples with the practice of law making at the international level but it also offers broad theoretical insights on international law dealing with the main schools of thought in legal theory: positivism, naturalism, legal realism, policy oriented jurisprudence and postmodernism. This paperback edition features the author's discussion of this book on the EJIL Talk blog.
