Zuckerman, 1981 [Sociobiology](#) Edward O. Wilson, 2000-03-24 When this work was first published it started a tumultuous round in the age old nature versus nurture debate It shows how research in human genetics and neuroscience has strengthened the case for biological understanding of human nature *The Infanticide Controversy* Amanda Rees, 2009-11-15 Infanticide in the natural world might be a relatively rare event but as Amanda Rees shows it has enormously significant consequences Identified in the 1960s as a phenomenon worthy of investigation infanticide had by the 1970s become the focus of serious controversy The suggestion by Sarah Hrdy that it might be the outcome of an evolved strategy intended to maximize an individual's reproductive success sparked furious disputes between scientists disagreements that have continued down to the present day Meticulously tracing the history of the infanticide debates and drawing on extensive interviews with field scientists Rees investigates key theoretical and methodological themes that have characterized field studies of apes and monkeys in the twentieth century As a detailed study of the scientific method and its application to field research The Infanticide Controversy sheds new light on our understanding of scientific practice focusing in particular on the challenges of working in natural environments the relationship between objectivity and interpretation in an observational science and the impact of the public profile of primatology on the development of primatological research Most importantly it also considers the wider significance that the study of field science has in a period when the ecological results of uncontrolled human interventions in natural systems are becoming ever more evident

**The Predatory Behavior of Wild Chimpanzees** Geza Teleki, 1973 Geza Teleki has spent two years observing wild chimpanzees at very close quarters in the Gombe National Park of Tanzania He has compiled this report on predatory behavior based in part upon a decade of observations by a research team living in the park but primarily upon numerous episodes he observed since early 1968 Illustrated **Bulletin of the Wagner Free Institute of Science of Philadelphia**, 1926 **Bulletin of the Wagner Free Institute of Science of Philadelphia** Wagner Free Institute of

Science,1926      **The Social Life of Monkeys, Apes and Primitive Man** Marshall Sahlins,1959      **The Identity of Man** Grahame Clark,2023-07-07 First published in 1982 in the Identity of Man Professor Clark considers a problem which has puzzled men from the authors of the books of the Old Testament to Charles Darwin and his successors how to reconcile the animal appetites of men with their awareness of gods and their intimations of immortality What is it that differentiates us most decisively from the other Primates He argues that the distinction is to be found primarily in the fact that whereas the behaviour of other animals is largely dictated by their genes we follow or reject cultural patterns inherited through belonging to societies shaped by history Whereas other animals behave in a broadly homogenous way within breeding populations men adhere to the diversity of cultural traditions observed by ethnographers among peoples surviving on their fringes of the modern world and reconstructed by archaeologists from the cultural fossils of antiquity Grahame Clark has written an original and fascinating study drawing both on his lifetime s experience of archaeological material and on a wide range of other sources to throw new light on the question of man s identity This is a must read for archaeologists and anthropologists

**The Evolution of Culture** Leslie A White,2016-06-16 One of the major works of twentieth century anthropological theory written by one of the discipline s most important complex and controversial figures has not been in print for several years Now Evolution of Culture is again available in paperback allowing today s generation of anthropologists new access to Leslie White s crucial contribution to the theory of cultural evolution A new substantial introduction by Robert Carneiro and Burton J Brown assess White s historical importance and continuing influence in the discipline White is credited with reintroducing evolution in a way that had a profound impact on our understanding of the relationship between technology ecology and culture in the development of civilizations A materialist he was particularly concerned with societies ability to harness energy as an indicator of progress and his empirical analysis of this equation covers a vast historical span Fearlessly tackling the most fundamental questions of culture and society during the cold war White was frequently a lightning rod both inside and outside the academy His book will provoke equally potent debates today and is a key component of any course or reading list in anthropological or archaeological theory and cultural ecology      [The Parable of the Tribes](#) Andrew Bard Schmookler,1995-01-01 This is a new view of the role of power in social evolution It shows how as human societies evolved intersocietal conflicts necessarily developed and how humanity can choose peace over war      *War and Democracy* E. F. M. Durbin,John Bowlby,Ivor Thomas,D. P. T. Jay,R. B. Fraser,R. H. S. Crossman,George Catlin,2019-07-08 Originally published in 1938 this book consists of a group of papers considering widely different subjects but all bearing upon one social problem the causation and prevention of war The authors all occupy the same general political position they are democratic socialists and active members of the Labour Party The book falls into three rough divisions although all the papers are self contained The first part of the book is psychological and attempts to summarise and analyse the non historical evidence ecological psychological and anthropological about the causes of fighting The second part is historical It surveys the different causes of

international war in the nineteenth century and then discusses the relation between nationalism and capitalism during the same period The third part is political and first considers the relation of the use of force to the preservation of peace Then analyses the choices of foreign policy for a pacific power confronted by the threat of aggressive military dictatorship It concludes with a review and assessment of the various available policies for the prevention of war in general and under the specific contemporary conditions of the time

**Sexual Selection and the Descent of Man** Bernard Campbell, 2017-07-12

Just over one hundred and thirty years ago Charles Darwin in *The Descent of Man and Selection in Relation to Sex* 1871 developed remarkably accurate conclusions about man's ancestry based on a review of general comparative anatomy and psychology in which he regarded sexual selection as a necessary part of the evolutionary process But the attention of biologists turned to the more general concept of natural selection in which sexual selection plays a complex role that has been little understood This volume significantly broadens the scope of modern evolutionary biology by looking at this important and long neglected concept of great importance In this book which is the first full discussion of sexual selection since 1871 leading biologists bring modern genetic theory and behavior observation to bear on the subject The distinguished authors consider many aspects of sexual selection in many species including man within the context of contemporary evolutionary theory and research The result is a remarkably original and well rounded view of the whole concept that will be invaluable especially to students of evolution and human sexual behavior The lucid authority of the contributors and the importance of the topic will interest all who share in man's perennial fascination with his own history The book will be of central importance to a wide variety of professionals including biologists anthropologists and geneticists It will be an invaluable supplementary text for courses in vertebrate biology theory of evolution genetics and physical anthropology It is especially important with the emergence of alternative explanations of human development under the rubric of creationism and doctrines of intelligent design
