science research *Emerging Trends in Social Sciences* Dr. Shubham Mishra, Dr. Latika Vyas, Dr. Ritu Rathore, Dr. Rashmi Durgapal, Mr. Vishal Dadheech, 2024-03-16 Smart Climate change represents one of the most pressing challenges of the 21st century affecting various aspects of human societies economies and ecosystems Effective mitigation and adaptation of climate change necessitate interdisciplinary methods given its complexity and diversity This chapter examines the relationship between social science and effective climate change measures looking at how insights from fields like political science economics sociology and psychology may guide and improve efforts to combat climate change The chapter clarifies the different ways in which social science perspectives can help shape intelligent climate change policies that are both technologically innovative and socially equitable through a thorough review of theoretical frameworks empirical research and case studies The first section of the chapter gives a thorough summary of the current status of climate change and how it is affecting communities around the globe In addition the chapter explores the sociological aspects of climate change looking at how power relations social structures and inequality affect people s susceptibility and ability to withstand the effects of the environment It also looks at how smart technologies could improve efforts to adapt to climate change and become more resilient especially for vulnerable areas It talks about how data analytics remote sensing and digital innovation can be used to monitor climate threats forecast extreme weather and guide adaptive solutions It highlights how important it is for communities researchers practitioners and politicians to collaborate in order to co design and carry out creative solutions that address the social as well as the technological aspects of climate change Furthermore it emphasizes the need for evidence based policymaking and the integration of social science perspectives into climate change policy formulation and implementation The Contribution of the Social Sciences to the Energy Challenge United States. Congress. House. Committee on Science and Technology (2007). Subcommittee on Research and Science Education, 2007 *The Public Value of the Social Sciences* John D. Brewer, 2013-05-23 John Brewer explores the essential nature of the social sciences and the ways in which notions of impact and value could be reframed to generate a more productive debate around their contribution to the good of society **Park Science** , 2009 *Climate Change in Central Asia* Rahat Sabyrbekov, Indra Overland, Roman Vakulchuk, 2023-04-13 This open access book explores climate change impacts adaptation and mitigation in Central Asia and discusses policy options for the Central Asian governments To address the urgent need for local scholarship on climate change in Central Asia and in particular the need for more research by social scientists this book features a wide range of contributions on climate change impacts adaptation and mitigation in the region Each chapter makes an important contribution to social science scholarship on climate change and decarbonization in Central Asia Topics include decarbonization opportunities carbon pricing instruments the geo economics of the energy transition the relationship between human mobility and climate change The book thus offers valuable insights for both academics and policymakers A Pragmatist Orientation for the Social Sciences in Climate Policy Martin Kowarsch, 2016-09-01 While economic and

other social science expertise is indispensable for successful public policy making regarding global climate change social scientists face trade offs between the scientific credibility policy relevance and legitimacy of their policy advice From a philosophical perspective this book systematically addresses these trade offs and other crucial challenges facing the integrated economic assessments of the Intergovernmental Panel on Climate Change IPCC Based on John Dewey's pragmatist philosophy and an analysis of the value laden nature and reliability of climate change economics the book develops a refined science policy model and specific guidelines for these assessments of climate policy options The core idea is to scientifically explore the various practical implications of alternative climate policy pathways in an interdisciplinary manner together with diverse stakeholders This could facilitate an iterative deliberative public learning process concerning disputed policy issues This volume makes novel contributions to three strands of the literature 1 the philosophy of social science in policy 2 the philosophy of economics and 3 debates about the design of scientific assessments including the continuous IPCC reform debate This work is thus interesting for philosophers and other scholars reflecting on the science policy interface but also for assessment practitioners climate policy makers and economists The science policy approach developed in this volume has already influenced the recent socio economic IPCC assessment

[Anthropology and Climate Change](#) Susan A. Crate, Mark Nuttall, 2016-03-31 The first edition of Anthropology and Climate Change 2009 pioneered the study of climate change through the lens of anthropology covering the relation between human cultures and the environment from prehistoric times to the present This second heavily revised edition brings the material on this rapidly changing field completely up to date with major scholars from around the world mapping out trajectories of research and issuing specific calls for action The new edition introduces new foundational chapters laying out what anthropologists know about climate change today new theoretical and practical perspectives insights gleaned from sociology and international efforts to study and curb climate change making the volume a perfect introductory textbook presents a series of case studies both new case studies and old ones updated and viewed with fresh eyes with the specific purpose of assessing climate trends provides a close look at how climate change is affecting livelihoods especially in the context of economic globalization and the migration of youth from rural to urban areas expands coverage to England the Amazon the Marshall Islands Tanzania and Ethiopia re-examines the conclusions and recommendations of the first volume refining our knowledge of what we do and do not know about climate change and what we can do to adapt

Grounding Global Climate Change Heike Greschke, Julia Tischler, 2014-09-25 This book traces the evolution of climate change research which long dominated by the natural sciences now sees greater involvement with disciplines studying the socio cultural implications of change In their introduction the editors chart the changing role of the social and cultural sciences delineating three strands of research socio critical approaches which connect climate change to a call for cultural or systemic change a mitigation and adaption strand which takes the physical reality of climate change as a starting point and focuses on the concerns of climate change affected

communities and their participation in political action and finally culture sensitive research which places emphasis on indigenous peoples who contribute the least to the causes of climate change who are affected most by its consequences and who have the least leverage to influence a solution Part I of the book explores interdisciplinarity climate research and the role of the social sciences including the concept of ecological novelty an assessment of progress since the first Rio climate conference and a global village case study from Portugal Part II surveys ethnographic perspectives in the search for social facts of global climate change including climate and mobility in the West African Sahel and human non human interactions and climate change in the Canadian Subarctic Part III shows how collaborative and comparative ethnographies can spin global webs of local knowledge describing case studies of changing seasonality in Labrador and of rising water levels in the Chesapeake Bay These perspectives are subjected to often amusing always incisive analysis in a concluding chapter entitled You Ain't Seen Nothing Yet a death defying look at the future of the climate debate The contributors engage critically with the research subject of climate change itself reflecting on their own practices of knowledge production and epistemological presuppositions Finely detailed and sympathetic to a broad range of viewpoints the book sets out a profile for the social sciences and humanities in the climate change field by systematically exploring methodological and theoretical challenges and approaches

Carbon dioxide removal: Perspectives from the social sciences and humanities Anders Hansson, Mathias Fridahl, Miranda Boettcher, Shinichiro Asayama, 2024-07-09 Carbon dioxide removal CDR approaches are becoming increasingly central to visions of decarbonizing national economies The past few years have seen an increasing number of countries committed to net zero targets preceded by a surge of modelled 1.5°C scenarios envisioning large scale future CDR deployment The prospect of CDR deployment raises new complex socio ecological challenges and presents new deep uncertainties These complexities challenges and uncertainties cannot be investigated using solely the techno economic modelling and environmental risk assessment methods that currently dominate the construction of policy relevant knowledge on CDR Social sciences and the humanities perspectives on CDR are often restricted to instrumental tasks such as investigating public acceptance overcoming social resistance or supporting the development of integrated assessment models There is a need for more diverse investigations of CDR which include not only environmental and techno economic dimensions but also explore key societal complexities challenges and uncertainties Against this backdrop we call for submissions on CDR stemming from perspectives within the social sciences and humanities We encourage novel empirical and theoretical contributions on CDR related policy design or analyses of recent policy developments at sub national national and international levels of governance e.g. in context of climate targets and strategies climate tipping points mitigation deterrence or societal transformations

Climate Change and Society Riley E. Dunlap, Robert J. Brulle, 2015-08-24 Climate change is one of the most critical issues of the twenty first century presenting a major intellectual challenge to both the natural and social sciences While there has been significant progress in natural science understanding of climate change

social science analyses have not been as fully developed Climate Change and Society breaks new theoretical and empirical ground by presenting climate change as a thoroughly social phenomenon embedded in behaviors institutions and cultural practices This collection of essays summarizes existing approaches to understanding the social economic political and cultural dimensions of climate change From the factors that drive carbon emissions to those which influence societal responses to climate change the volume provides a comprehensive overview of the social dimensions of climate change An improved understanding of the complex relationship between climate change and society is essential for modifying ecologically harmful human behaviors and institutional practices creating just and effective environmental policies and developing a more sustainable future Climate Change and Society provides a useful tool in efforts to integrate social science research natural science research and policymaking regarding climate change and sustainability Produced by the American Sociological Association s Task Force on Sociology and Global Climate Change this book presents a challenging shift from the standard climate change discourse and offers a valuable resource for students scholars and professionals involved in climate change research and policy

Environment and Society Charles Harper, Monica Snowden, 2017-03-13 The sixth edition of *Environment and Society* continues to connect issues about human societies ecological systems and the environment with data and perspectives from different fields While the text looks at environmental issues from a primarily sociological viewpoint it is designed for courses in Environmental Sociology and Environmental Issues in departments of Sociology Environmental Studies Anthropology Political Science and Human Geography Clearly defined terms and theories help familiarize students from various backgrounds with the topics at hand Each of the chapters is significantly updated with new data concepts and ideas Chapter Three Climate Change Science and Diplomacy is the most extensively revised with current natural science data and sociological insights It also details the factors at play in the establishment of the Paris Agreement and its potential to affect global climate change This edition elevates questions of environmental and climate justice in addressing the human environment relations and concerns throughout the book Finally each chapter contains embedded website links for further discussion or commentary on a topic concludes with review and reflection questions and suggests further readings and internet sources
