historical data contained in the biblical sources The handbook is arranged into two main thematic parts Part 1 assesses the place of the Bible in social anthropology examines the contribution of ethnoarchaeology to the recovery of the social world of Iron Age Palestine and offers insights from the anthropology of the Mediterranean for the interpretation of the biblical stories Part 2 provides a series of case studies on anthropological themes arising in the Hebrew Bible These include kinship and social organisation death cultural and collective memory and ritualism Contributors also examine how the biblical stories reveal dynamics of power and authority gender and honour and shame and how socio anthropological approaches can reveal these narratives and deepen our knowledge of the human societies and cultural context of the texts Bringing together the expertise of scholars of the Hebrew Bible and Biblical Archaeology this ethnographic introduction prompts new questions into our understanding of anthropology and the Bible
