**Planning for Growth** Fulong

Wu, 2015-01-09 *Planning for Growth Urban and Regional Planning in China* provides an overview of the changes in China's planning system policy and practices using concrete examples and informative details in language that is accessible enough for the undergraduate but thoroughly grounded in a wealth of research and academic experience to support academics. It is the first accessible text on changing urban and regional planning in China under the process of transition from a centrally planned socialist economy to an emerging market in the world. Fulong Wu, a leading authority on Chinese cities and urban and regional planning, sets up the historical framework of planning in China, including its foundation based on the proactive approach to economic growth, the new forms of planning such as the strategic spatial plan and urban cluster plans that have emerged and stimulated rapid urban expansion and transformed compact Chinese cities into dispersed metropolises. And goes on to explain the new planning practices that began to pay attention to eco cities, new towns, and new development areas. *Planning for Growth Urban and Regional Planning in China* demonstrates that planning is not necessarily an enemy of growth and plays an important role in Chinese urbanization and economic growth. On the other hand, it also shows planning's limitations in achieving a more sustainable and just urban future.

*Transforming Urban Green Space Governance in China Under Ecological Civilization: An Institutional Analysis* Jieliang Liu, 2024-02-08 This book addresses the transdisciplinary subject of urban green space governance in Chinese cities through political sciences, organization theory, sociology, and new institutional economics lenses with urban planning and ecology perspectives as research foundation and the science of climate change on health and wellbeing research background. It captivates readers by bringing answers to 1. Why are urban green spaces such a highly contested subject in climate mitigation and adaptation, particularly in contexts like Chinese cities? 2. Why is it important to govern urban green spaces as common pool resources? 3. How to design policies/institutions that can maximize the end objectives such as good health, wellbeing, and climate resilience? 4. What can ordinary citizens gain from caring more about greening their cities and contributing to the process? Besides the methods used in this research case-based study (qualitative in depth interviews and qualitative content analysis using the mainstream qualitative data analysis software MaxQDA) are valuable learning sources especially for junior graduate students. The book features three in-depth case studies with rich interview and illustration materials and a range of graphics of higher analytical quality. Readers, both from research professionals to non-academics with a general cultural interest in geography, would find this work instructive and informative.

**Development and Globalization** David F. Ruccio, 2012-12-06 Since the mid 1980s David F. Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning, Third World development, and capitalist globalization. The aim of this collection is to show through a series of concrete examples how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies. The book consists of fifteen essays plus an introductory chapter situating the author's work in a larger intellectual and political context. The topics covered range

from planning theory to the role of the state in the Nicaraguan Revolution from radical theories of underdevelopment to the Third World debt crisis and from a critical engagement with regulation theory to contemporary discussions of globalization and imperialism     *Planning and Profits in Socialist Economies* Jean-Charles Asselain,2013-11-05 This study of economic reforms throughout Eastern Europe covers the history of attempts at decentralization The book Describes the centralized model and compares its requirements with the realities of socialist countries Discusses the economic policies of the post Stalinist period Examines the origin of the reforms which began in 1956 culminating in the Soviet economic reform of 1965 and the rehabilitation of profit Countries covered include the former USSR the former East Germany and Hungary

**Communist Planning versus Rationality** János Mátyás Kovács,2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning     Planning in Cold War Europe Michel Christian,Sandrine Kott,Ondrej

Matejka,2018-10-08 The idea of planning economy and engineering social life has often been linked with Communist regimes will of control However the persuasion that social and economic processes could and should be regulated was by no means limited to them Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis During the Cold War such discussions fuelled competition between two models of economic and social organisation but they also revealed the convergences and complementarities between them This ambiguity so often overlooked in histories of the Cold War represents the central issue of the book organized around three axes First it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World Finally it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries The volume thus contributes to two fields undergoing a process of profound reassessment the history of modernisation and of the Cold War     *Politics of*

*Economic Planning* E.F.M. Durbin, 2013-04-15 The issue of planning prompted some of the fiercest debate in mid twentieth century economics *Politics of Economic Planning* collects together a number of papers from journals and contributed books that examine the problems of economic planning in a free society They fall into three groups Part 1 explains the idea of socialism and defines it in relation to democracy Part 2 discusses problems of economic planning both in relation to political economy on the practice of planning and with the application of the theory of value to the conditions of a centrally directed economy Part 3 examines the nature of economics      **Public Health Planning in the USSR** Aron Petrovich Zhuk, 1976

**Planning in the 20th Century and Beyond** Santosh Mehrotra, Sylvie Guichard, 2020-10-29 The Planning Commission played a crucial role in the type of development that India followed after independence However even though most economic analyses of India mention the five year plans the Planning Commission as an institution remains little studied This is why this book proposes to look backward examining the history of the idea of planning and the history and experience of planning in India It also looks forward trying to evaluate beyond ideologies which role the practice of planning has and should have in contemporary India It then proposes that the NITI Aayog the think tank founded on 1st January 2015 after the demise of the Planning Commission could learn from this experience This book addresses three leading questions why plan economic development How to plan And what exactly can should be planned These questions are interrelated and the contributors of this volume each with their own focus propose elements of replies
