Codes and Consequences Carol Myers-Scotton,1998-08-20 Carol Myers Scotton has edited a collection of essays that covers the choice of one style of English over another in everything from Bible translations to surprise in poetry to supervisor worker interactions on the automobile assembly line An important theme developed to varying degrees in these papers is the notion that speakers and writers as rational actors exploit the unmarked marked opposition regarding audience expectations so as to convey messages of intentionality charged with social or psychological import The Discourse of Classified

Advertising Paul Bruthiaux,1996-07-11 Linguists who have studied simplified varieties of a given language such as pidgins or the language of care givers have tended to explain similarities in their structure by the fact that they use the same mechanisms of simplification Bruthiaux tests this idea by looking at the structure of classified ads in American English using a body of 800 ads from four categories automobile sales apartments for rent help wanted and personal ads Bruthiaux s thesis is that strict uniform constraints on space should result in uniformly simple texts no matter which category they are in and that any variation would be due to the particular needs of each category To prove this he describes the linguistic structure of classified ads and shows that they are characterized by a minimal degree of morphosyntactic elaboration He then examines aspects of their conventions to highlight the role of pre patterned and prefabricated segments whose collocational rigidity may force the inclusion of otherwise dispensable items He finds that there is indeed significant variation across ad categories in terms of morphosyntactic elaboration and concludes that this is due to a greater or lesser need to be explicit as well as a greater or lesser anticipation of interaction Finally he examines the implications of these findings for the study of linguistic simplification and register variation **The Handbook of Hispanic Sociolinguistics** Manuel Diaz-Campos,2015-09-08
