Literacy in School and Society Elizabetta Zuanelli Sonino, 2013-06-29 The function and notion of literacy may be considered the keystone a filigree principle underlying the educational social and cultural organization of the societies of the twentieth century It is therefore interesting to try to pinpoint the notion and its implications at the turn of the century by focusing the attention of scholars from various disciplines sociolinguistics psychology psycholinguistics and pedagogy on the subject This is the purpose of this volume which originated from an interdisciplinary meeting on trends in and problems of research on early literacy through mother tongues and or second languages held in Venice under the auspices of the University of Venice and in particular of the Seminario di Linguistica e di Didattica della Lingue and the Centro Linguistico

Interfacolta and the Municipality of Venice together with UNESCO and AILA A first far reaching question touches on the role assigned to or fulfilled by mass literacy in modern society The concept of literacy considered as a social achievement an essential component in the process of education to be institutionally prompted and controlled fluctuates between two opposite poles A polemic destructive view considers the notion and the educational practices connected with it as a potent instrument of social control a tool for social reproduction and consensus On the other side a plurifunctional constructive view considers the acquisition and maintenance of different languages via educational institutions as a concrete possibility for the defense and maintenance of cultural pluralism and identity be it social ethnic or religious

that speakers freely use the two languages available to their speech community and thanks to their active and passive repertoire they apply a range of linguistic resources from both Italian and English The volume also uncovers some especially interesting traits in 3rd generation speech involving in particular a rather widespread use of mixed pronunciation Upon moving past the initial assumption that the adoption of this mixed pronunciation is used to show the younger generation s sense of belonging to the BI community a quite different reason emerges Closer analysis reveals that due to an increasing feeling of non Britishness this linguistic choice may be linked to a deliberate and conscious attempt on their part not to accommodate to British culture and in so doing to distance themselves further from it Preface by David Britain *The Oxford Handbook of Sociolinguistics* Robert Bayley, Richard Cameron, Ceil Lucas, 2015 This major new survey of sociolinguistics identifies gaps in our existing knowledge base and provides directions for future research *Variationist Sociolinguistics* Sali A.
