What's Wrong with Sociology? Stephen Cole,2018-04-17 Since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences In some highly publicized cases some universities have retrenched their sociology departments others are contemplating either retrenchment or downsizing of their departments Although there are some practitioners of the discipline who believe that it has never been in better shape many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline This book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper The contributors were selected to represent diverse views and thus there is substantial disagreement among them over what the problems are that sociology faces and how they may be remedied In this highly provocative book readers is likely to find some essays they agree with and others they disagree with but all the essays present important problems faced by the discipline which must be addressed Although the authors of the sixteen essays do not agree on what is wrong with the discipline there are some themes which appear frequently In his introduction Cole summarizes and comments on these themes His introduction centers on the question of whether sociology is entirely socially constructed Is what we believe to be true about society constrained by empirical evidence or is it a result of our ideology power authority and other social processes One theme which appears in many of the essays is that sociology has become too ideological and as a result has lost credibility among university administrators politicians and the general public Many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress Others criticize the discipline for not dealing

with the really important social issues and see much of the work published as being parochial and trivial Questions are also raised about why the use of causal models has failed to generate solutions to most of the problems the discipline addresses Some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post modernist theories This highly readable set of essays should be of interest to all those are concerned about the current state of sociology They will also be useful in introducing graduate students to some of the most important issues currently being debated in the field Stephen Cole is currently professor of sociology at the State University of New York at Stony Brook and professor of sociology at the University of Queensland Australia He is the author of Making Science Between Nature and Society and with Jonathan R Cole Social Stratification in Science

Society on the Edge Philippe Fontaine,Jefferson D. Pooley,2020-12-10 The social sciences underwent rapid development in postwar America Problems once framed in social terms gradually became redefined as individual with regards to scope and remedy with economics and psychology winning influence over the other social sciences By the 1970s both economics and psychology had spread their intellectual remit wide psychology's concepts suffused everyday language while economists entered a myriad of policy debates Psychology and economics contributed to and benefited from a conception of society that was increasingly skeptical of social explanations and interventions Sociology in particular lost intellectual and policy ground to its peers even regarding social problems that the discipline long considered its settled domain The book's ten chapters explore this shift each refracted through a single problem the family crime urban concerns education discrimination poverty addiction war and mental health examining the effects an increasingly individualized lens has had on the way we see these problems

Integrating Knowledge Through Interdisciplinary Research Dominic Holland,2013-08-22 In this important new text Holland seeks to explain by means of

social scientific and philosophical inquiry the difficulties that researchers often experience when attempting to integrate knowledge from different academic disciplines either individually or as part of a team of subject specialists It is argued that the difficulty of integrating knowledge from different academic disciplines is the result of firstly an inadequate justification of the nature of scientific integration and differentiation and secondly the dominance of disciplinary specialization in scientific inquiry By focusing on both the theoretical justification for and the practical feasibility of integrating knowledge through interdisciplinary research this book asks what properties of reality make the integration of knowledge from different academic disciplines possible and to what extent it is feasible to integrate knowledge through interdisciplinary research within a traditional disciplinary context Accordingly the text is both philosophical and social scientific in content philosophical in the sense that it presents a theory of causal determination which will help researchers to understand how reality is both differentiated and interconnected social scientific in the sense that it presents the results of three case studies of collaborative interdisciplinary research projects The book is heavily informed by the philosophy of critical realism The philosophical argument about the possibility of integration and specialization in science draws explicitly on some of the key concepts of critical realism particularly those comprising the theory of integrative pluralism while critical realist assumptions underpin the social scientific argument about the causal influence of the social system of knowledge production By exploring researchers conceptions of knowledge and of reality on the one hand and their decisions about what sort of knowledge to produce on the other Holland shows how the difficulty of scientific integration is both a problem of knowledge and a problem of knowledge production This book is essential reading for students and academics interested in the emerging topic of knowledge integration and interdisciplinarity

Georg Simmel and the American Prospect Gary D. Jaworski,1997-01-01 This first book length examination of the American reception of Georg Simmel German philosopher and sociologist offers a compelling new account of the transatlantic journey of Simmel s ideas Jaworski draws on archival data correspondence interviews and detailed textual analysis to explore the practical and strategic uses of Simmel s writings by a range of American social thinkers These thinkers include the Chicago School figures Albion Small Robert E Park and Everett C Hughes functionalist sociologists Talcott Parsons Robert K Merton Lewis A Coser and Kaspar D Naegle and more recently Erving Goffman and postmodernists Deena and Michael Weinstein Jaworski shows that the way in which Americans received Simmel was intricately related to efforts to transform American society A recently

discovered essay on Simmel by the emigre sociologist Albert Salomon Georg Simmel Reconsidered and included here with an introduction and notes by Jaworski provides added dimension to this important study The author has advanced the analysis of the Simmel reception in two important respects Instead of simply dredging texts by American sociologists for evidence of Simmel s ideas he studies the production of texts by examining earlier drafts correspondence unpublished research notes and when possible and relevant personal recollections In addition Jaworski analyzes the Simmel reception carefully and nonspeculatively by tying the production of texts to the social and cultural context in which it occurred As a result he has placed the investigation of the Simmel reception on a new analytical and historiographic plane By introducing more rigorous of investigation into Simmel scholarship Jaworski not only has been able to make discoveries and develop lines of inquiry that have missed but also has raised the methodological level of analysis Guy Oakes Jack T Kvernland Professor Monmouth University *Controversies in Criminal Justice Research* Richard Tewksbury, Elizabeth Ehrhardt Mustaine, 2014-09-25 This book of original essays presents students with challenging looks at some of the most basic and sometimes most difficult decisions faced by criminal justice researchers Each chapter presents an overview of a foundational question issue in the conduct of research and discussions of the options to resolve these controversies
