*Challenging Global Inequality* Alastair Greig, David Hulme, Mark Turner, 2007-01-16. This major introductory text written by 3 leading names in the field provides an accessible overview of the challenges faced in overcoming global poverty and inequality in the 21st century. Through an in-depth assessment of development theory and practice, the authors set out to advance two key arguments: the first being the importance of historically contextualizing contemporary developmental problems in order to assess policy proposals, and the second that inequality matters and how this notion has continually remained a central feature of development debates from colonial times to present day. Ideal for undergraduate students taking development modules as part of political science and international relations degrees, this engaging text proves to be essential reading when exploring the impacts of development on today's international political economy. With each chapter covering inequalities from all different angles, the authors clearly outline the impact of models such as globalization and neoliberalism as well as offering alternative views on the challenges posed by the UN's Millennium Development Goals. Microcredit and Women's Empowerment Aminul Faraizi, Taskinur Rahman, Jim McAllister, 2014-04-04. Using a case study of Bangladesh and based on a long-term participatory observation method, this book investigates claims of the success of microcredit as well as the critiques of it in the context of women's empowerment. It confronts the distinction between women's increasing wealth as a consequence of the success of microcredit programmes and their apparent non-commensurate empowerment. Looking at two organisations, the Grameen Bank and the Bangladesh Rural Advancement Committee as they operate in two localities in rural Bangladesh in order to discover how enrichment and empowerment are often confused. The book goes on to establish that the well-publicised success stories of the microcredit programme are blown out of proportion and that the dynamics of collective responsibility for repayment of loans by a group of women borrowers usually seen to be a tool for the success of microcredit.

is in fact no less repressive than traditional debt collectors This book makes a contribution to development debates challenging adherents to more closely specify those conditions under which microcredit does indeed have validity as well as providing insights relevant to South Asian Studies and Development Studies      *Phases of Rural Development in Malaysia: Shifting Towards Human Resource Development and Well-being (UUM Press)* Kalthum Hassan ,Chamhuri Siwar,2021-11-28
