Case-Based Learning Janet L. Kolodner, 2012-12-06 Case based reasoning means reasoning based on remembering previous experiences A reasoner using old experiences cases might use those cases to suggest solutions to problems to point out potential problems with a solution being computed to interpret a new situation and make predictions about what might happen or to create arguments justifying some conclusion A case based reasoner solves new problems by remembering old situations and adapting their solutions It interprets new situations by remembering old similar situations and comparing and contrasting the new one to old ones to see where it fits best Case based reasoning combines reasoning with learning It spans the whole reasoning cycle A situation is experienced Old situations are used to understand it Old situations are used to solve a problem if there is one to be solved Then the new situation is inserted into memory alongside the cases it used for reasoning to be used another time The key to this reasoning method then is remembering Remembering has two parts integrating cases or experiences into memory when they happen and recalling them in appropriate situations later on The case based reasoning community calls this related set of issues the indexing problem In broad terms it means finding in memory the experience closest to a new situation In narrower terms it can be described as a two part problem assigning indexes or labels to experiences when they are put into memory that describe the situations to which they are applicable so that they can be recalled later and at recall time elaborating the new situation in enough detail so that the indexes it would have if it were in the memory are identified Case Based Learning is an edited volume of original research comprising invited contributions by leading workers This work has also been published as a special issues of MACHINE LEARNING Volume 10 No 3

The Story of God and Us Jonathan Murphy, 2025-08-05 Pastor and author Jonathan Murphy provides readers with a framework a master plot to the story of all history This deep exploration of Scripture reveals that God is in complete command of this universe and how He guides everyone s story past

present and future Good stories make you laugh cry fear dream hope They engage our hearts entertain our minds and enlighten our souls God wrote a story the best story ever full of drama adventure love sacrifice redemption and has an ending that seems too good to be true And the greatest thing about God s story is that we are all part of it His story provides the meaning of life that brings fulfillment of our desires and purpose for our existence The Story of God and Us shows not only what God is doing from creation to eternity but how everything makes sense as you read the Bible from the beginning of Genesis to the end of Revelation World history is not made up of random people and events but of divine appointment and purpose In this book Jonathan Murphy leads readers to understand how the meaning of life is essential to a fulfilling relationship and partnership with God God accomplishes His plans in a pleasing and connecting way a multidimensional view of Scripture can engage and delight even the most disinterested and distracted and seeing the big picture can provide a fresh look at how our story clearly fits into God s As Jonathan retells God s story through a fresh lens Christians will better understand how much God loves them how He desires us to live with Him and for Him and why we should invite others into this amazing story every chance that we get

Understanding Language Understanding Ashwin Ram, Kenneth Moorman, 1999 This book highlights cutting edge research relevant to the building of a computational model of reading comprehension as in the processing and understanding of a natural language text or story The book takes an interdisciplinary approach to the study of reading with contributions from computer science psychology and philosophy Contributors cover the theoretical and psychological foundations of the research in discussions of what it means to understand a text how one builds a computational model and related issues in knowledge representation and reasoning The book also addresses some of the broader issues that a natural language system must deal with such as reading in context linguistic novelty and information extraction

The Story of Early Chemistry John Maxson Stillman, 1924 **A Marble Story** Liz Batton, 2022-04-05 This is the story of how a lonely person found joy in his daily walks Finding new marbles every day showed him the hidden joy all around us The Story of Alchemy and the Beginnings of Chemistry M. M. Pattison Muir, For thousands of years before men had any accurate and exact knowledge of the changes of material things they had thought about these changes regarded them as revelations of spiritual truths built on them theories of things in heaven and earth and a good many things in neither and used them in manufactures arts and handicrafts especially in one very curious manufacture wherein not the thousandth fragment of a grain of the finished article was ever produced The accurate and systematic study of the changes which material things undergo is called chemistry we may perhaps describe alchemy as the superficial and what may be called subjective examination of these changes and the speculative systems and imaginary arts and manufactures founded on that examination We are assured by many old writers that Adam was the first alchemist and we are told by one of the initiated that Adam was created on the sixth day being the 15th of March of the first year of the world certainly alchemy had a long life for chemistry did not begin until about the middle of the 18th century *The Story of*

Alchemy and the Beginnings of Chemistry Matthew Moncrieff Pattison Muir, 1902 **Program of the Twelfth Annual Conference of the Cognitive Science Society, 25-28 July 1990, Cambridge, Massachusetts** Cognitive Science Society (U.S.). Schank, Alex Kass, Christopher K. Riesbeck, 2014-02-24 This book is the third volume in a series that provides a hands on perspective on the evolving theories associated with Roger Schank and his students The primary focus of this volume is on constructing explanations All of the chapters relate to the problem of building computer programs that can develop hypotheses about what might have caused an observed event Because most researchers in natural language processing don t really want to work on inference memory and learning issues most of their sample text fragments are chosen carefully to de emphasize the need for non text related reasoning The ability to come up with hypotheses about what is really going on in a story is a hallmark of human intelligence The biggest difference between truly intelligent readers and less intelligent ones is the extent to which the reader can go beyond merely understanding the explicit statements being communicated Achieving a creative level of understanding means developing hypotheses about questions for which there may be no conclusively correct answer at all The focus of the lab during the period documented in this book was to work on getting a computer program to do that The volume adopts a case based approach to the construction of explanations which suggests that the main steps in the process of explaining a given anomaly are as follows Retrieve an explanation that might be relevant to the anomaly Evaluate whether the retrieved explanation makes sense when applied to the current anomaly Adapt the explanation to produce a new variant that fits better if the retrieved explanation doesn t fit the anomaly perfectly **The Story Hour** Nora Archibald Wiggin, Kate Douglas Smith, 2018-04-05 Reproduction of the original The Story Hour by Kate Douglas Wiggin Nora Archibald Smith *The Story Until Now* Kit Reed, 2013-03-15 The best stories from a master of speculative fiction Called one of our brightest cultural commentators by Publishers Weekly Kit Reed draws from life with a difference This new collection brings together thirty four of her strong original stories from early classics like The Wait and Winter to six never before collected short stories including The Legend of Troop 13 and Wherein We Enter the Museum An early favorite Automatic Tiger is the first in a series of Reed s stories about animals There
