Story Of Human Evolution The:

Getting Here William White Howells, 1997 Three individuals left footprints in East Africa 3.7 million years ago Walking upright on human feet they had crossed a threshold in the long path of their evolution from vertebrates mammals and primates to enter and dominate a new world They were not alone Others related and descended in ways not entirely clear spread out flourished and disappeared some became the people of today Although we know a great deal of the story and new information is arriving ever more rapidly there is still more to be learned about where when and how our ancestors became us We do know that we arrived not because we were inevitable but by luck and happenstance along the way And we know there were other kinds of humans who co existed with each other and who might be here today but are not Now updated and revised to reflect the latest findings and their implications renowned anthropologist author and educator William Howells draws together here the latest from all today's sciences to tell the fascinating stories of our evolution **A Story of Us** Lesley Newson, Peter J. Richerson, 2021 Changes in the environment drive evolution and evidence suggests that our ancestors evolved to use cultural adaptations to survive environmental fluctuations of great severity In *A Story of Us* Lesley Newson and Peter Richerson explain the evidence and ideas that provide an account of how they coped using short descriptive stories to illustrate life at different stages of our evolutionary history Seven Million Years Douglas Palmer, 2005-01 Over the last two centuries the fossil record has revealed at least 15 different species of ancient human ancestors reaching back 6 million years into the past But this only scratches the surface of the archaeological record New finds can and frequently do result in significant rewrites of whole chunks of our evolutionary story Fossil DNA deep ocean floor sediments ice cores and Ice Age art are just some of sources that are helping to reveal the driving forces behind our early evolution and spread across the globe This book brings together these sources to chart the deep past of the human race **A Pocket History of Human Evolution** Silvana Condemi, François Savatier, 2019-11-01 Why aren't we more like other apes How did we win the evolutionary race Find out how wise Homo sapiens really are Prehistory has never been more exciting New discoveries are overturning long held theories left and right Stone tools in Australia date back 65 000 years a time when we once thought the first Sapiens had barely left Africa DNA sequencing has unearthed a new hominid group the Denisovans and confirmed that crossbreeding with them and Neanderthals made Homo sapiens who we are today *A Pocket History of Human Evolution* brings us up to date on the exploits of all our ancient relatives Paleoanthropologist Silvana Condemi and science journalist François Savatier consider what accelerated our evolution Was it tools our large brains language empathy or something else entirely And why are we the sole survivors among many early bipedal humans Their conclusions reveal the various ways ancient humans live on today from gossip as modern grooming to our gendered division of labor and what the future might hold for our strange and unique species *Evolution The Human Story* Alice Roberts, 2011-09 Come face to face with our ancestors Travel back 8 million years with *Evolution The Human Story* and go on a fascinating journey to discover how our

species has developed from tree dwelling primates to modern humans This is the first time that the story of evolution has been documented in such amazing visual detail thanks to the work of renowned Dutch paleoartists Kennis and Kennis Staggeringly realistic CGI and model reconstructions from original fossils bring us face to face with our ancestors portraying them as never before Plus Dr Alice Roberts shares her extensive knowledge helping answer all the big questions and more Evolution The Human Story is packed with all the latest discoveries and profiles every human ancestor to date from Ardipithecus ramidus to Homo neanderthalensis An essential read for anyone fascinated in finding out where we come from Now available in ebook PDF format The True Story of Human Evolutionary Genesis Elvis Newman,2015-01-20 No doubt history is littered with theories and beliefs that not only proved to be wrong in the end but also costly as far as the human search for truth and development is concerned The view that the Earth was the physical and the biological center of the Universe was one such failed theory one that cost many famous scientists most of their lives and held back societies everywhere for decades or hundreds of years behind what is now considered a given truth In the current work under consideration religion and evolution theories come under scrutiny in light of recent scientific facts that dispute their most important claims about the origins of the species In The True Story of Human Evolutionary Genesis Elvis Newman presents both astounding facts and findings about the human genome as well as paradigm shifting theories emanating from Zecharia Sitchin's work around the Sumerian clay tablets Ape Man Rod Caird,1994 A follow up to the award winning Dinosaur this book ties in with a four part Anglo American television series on the story of evolution and of the people who have devoted their lives to discovering the truth about our origins It is based on interviews with scientists throughout the world From the Beginning David Peters,1991 Examines the history of life on Earth and traces the course of human evolution

Evolution Alice Roberts,2018-07-05 This unrivalled illustrated guide to human evolution brings you face to face with your ancient ancestors Travelling back in time almost eight million years the book charts the development of our species Homo sapiens from tree dwelling primates to modern humans Evolution investigates each of our ancestors in detail and in context from the anatomy of their bones to the environment they lived in Detailed maps show where each species has been found and plot the gradual spread of humans around the world Fully updated to include the latest discoveries and research including the newly discovered species Homo naledi Evolution presents the latest thinking on some of the most captivating questions in science such as whether modern humans and Neanderthals interacted with each other Written and authenticated by a team of acknowledged experts and illustrated by renowned Dutch paleoartists the Kennis brothers Evolution presents the story of our species with unique richness authority and detail **History of Human Evolution** Nicky Huys,2025-08-04 History of Human Evolution is an in depth exploration of the fascinating journey of humanity from its earliest ancestors to modern times This comprehensive work delves into the significant milestones in our evolutionary past examining key discoveries fossil evidence and the interplay of environmental factors that shaped our development Readers will encounter the diverse range of

hominid species their adaptations and the cultural innovations that propelled humanity forward The book also addresses contemporary issues in evolutionary theory and genetics highlighting how our understanding of human evolution continues to evolve Richly illustrated and thoroughly researched this volume serves as an essential resource for anyone interested in the origins of humankind providing insights into what makes us uniquely human
