The

Routledge Handbook of Archaeology and Plastics Genevieve Godin, Þóra Pétursdóttir, Estelle Praet, John Schofield, 2024-09-17
The Routledge Handbook of Archaeology and Plastics investigates the archaeology of the contemporary world through the lens of its most distinguishing and problematic material. Plastics are ubiquitous and have been so for nearly three generations since they became widely used in the early 1950s. Plastics will persist for millennia, their legacies as toxic heritage being felt deep into the future. In this book comprising 32 original at times disturbing and critically engaged contributions, scholars from archaeology and other cognate disciplines explore plastics from a number of different angles and perspectives. Together, these contributions highlight the dilemma that plastics present: their usefulness on the one hand and the threats they present to environmental health on the other. The volume also explores the lessons that archaeologists can learn from plastics about episodes of mass production, consumption, and toxicity in the past, and also importantly about the future. This important and timely collection will therefore be of interest to all archaeologists, irrespective of their period of study or their geographical focus, and to students of archaeology and cultural heritage. It will also be relevant for researchers and students in other fields of study that focus on plastics and their environmental and social impacts. Ultimately, this book concerns the contemporary world and the impact of people upon it through the archaeological lens. **Conservation of Plastics** Yvonne

Shashoua, 2012-06-25. Plastic objects are included more than ever in museums and galleries collections these days, but these items can start to deteriorate when they are just a few years old. In this book, Yvonne Shashoua provides the essential knowledge needed to keep plastic pieces in the best possible condition so that they can continue to be enjoyed for many years. The historical development of plastics, as well as the technology, their physical and chemical properties, identification, degradation, and conservation, are all clearly and concisely covered within this single volume, making it an invaluable reference for the increasing number of conservators and curators that are encountering plastics in their day-to-day work.

We're Full of Plastic J. Andrew Burkey, STOP You Are Literally Eating a Credit Card Every Week. It's not a joke. It's a terrifying new reality. A new book, *We're Full of Plastic*, is exposing the horrifying truth: we are all being poisoned from the inside out. A landmark study revealed that you're ingesting 5 grams of plastic every week, and this toxic invasion is now being found in the most secret parts of your body, including your brain and the very wombs of our mothers. This isn't just an environmental problem; it's a terrifying personal health crisis that has been ignored for too long. Inside you'll uncover the secrets they don't want you to know. You're being exposed to plastic every single day. The deadly diseases that could be linked to plastic. Why the next generation is in immediate danger. The dark secrets of the plastic industry. The ultimate guide to detoxing your life right now. Plastic Footprint Pankaj Pathak, Sadia Ilyas, Rajiv R. Srivastava, 2025-07-26. This book gives a broader framework of plastic pollution, which is a significant issue worldwide. The book emphasizes the primary plastic waste discharged from the direct source and secondary pollutants, plastic trash, which is disposed of on land and converted to micro and nano plastics in the ocean. In addition to this, the volume also addresses the issues of plastic pollution by managing plastic

waste in a circular closed loop The book is divided into three parts 1 generation and assessment of plastic waste 2 impact assessment of plastics due to improper management and disposal 3 sustainable management of plastic waste and converting them into resource

Synthetic Socialism Eli Rubin,2012-09-01 Eli Rubin takes an innovative approach to consumer culture to explore questions of political consensus and consent and the impact of ideology on everyday life in the former East Germany Synthetic Socialism explores the history of East Germany through the production and use of a deceptively simple material plastic Rubin investigates the connections between the communist government its Bauhaus influenced designers its retooled postwar chemical industry and its general consumer population He argues that East Germany was neither a totalitarian state nor a niche society but rather a society shaped by the confluence of unique economic and political circumstances interacting with the concerns of ordinary citizens To East Germans Rubin says plastic was a high technology material a symbol of socialism s scientific and economic superiority over capitalism Most of all the state and its designers argued plastic goods were of a particularly special quality not to be thrown away like products of the wasteful West Rubin demonstrates that this argument was accepted by the mainstream of East German society for whom the modern socialist dimension of a plastics based everyday life had a deep resonance

Zero-Waste Atiq Zaman,Tahmina Ahsan,2019-12-06 This book analyses zero waste ZW as an emerging waste management strategy for the future which considers waste prevention through innovative design and sustainable consumption practices Drawing on a diverse range of case studies from Australia Bangladesh Japan New Zealand Sweden and the USA this book explores why urban waste management systems still remain a major challenge for almost all cities around the world Rejecting waste as an end of life problem Atiq Zaman and Tahmina Ahsan instead consider waste prevention through the ZW model in which resources are utilized and consumed with minimum environmental degradation In addition the authors give extended discussion on why embracing the ZW concept will be beneficial for the circular economy CE Providing a strategic zero waste framework and an evaluation tool to measure waste management performance aimed towards ZW goals this book will be of great relevance to students scholars and policymakers with an interest in waste management sustainable consumption urban planning and sustainable development
