Story Of Western Architecture 3ed:

Architecture and the Image at the Turn of the 21st Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies

Rome Paul Balchin, 2020-10-28 First published in 2017 Rome The Shaping of Three Capitals explores the impact of political history on the built environment of the Eternal City The book divides Rome s history into three main periods the rulership of the early kings from the 8th to the 6th centuries BC the period of Etruscan culture and architecture up to the end of the Roman Empire in 5th century AD and the 6th century to 1870 when Rome stood as the ecclesiastical capital of the Catholic Church and the temporal state of the Papal States The final section of the book examines the Risorgimento the unification of Italy and the development of the fascist state a time when Rome became the capital of Italy and endeavoured to establish a new empire Exploring political instability and change Balchin demonstrates the strong

connection between politics and the physical shaping of the city through an examination of the successive styles of architecture from Classical to Modernist

Modernity, Nation and Urban-Architectural Form Shireen Jahn Kassim, Norwina Mohd Nawawi, Mansor Ibrahim, 2018-07-20 This book explores how Malaysia as a multicultural modern nation has approached issues of nationalism and regionalism in terms of physical expression of the built environment Ever since the nation's post Colonial era architects and policy makers have grappled with the theoretical and practical outcomes of creating public architecture that effectively responds to traditions nationhood and modernity The authors compile and analyse prevailing ideas and strategies present case studies in architectural language and form and introduce the reader to tensions arising between a nationalist agenda and local regionalist architectural language These dichotomies represent the very nature of multicultural societies and issues with identity a challenge that various nations across the globe face in a changing environment This topical and pertinent volume will appeal to students and scholars of urban planning architecture and the modern city
