Strange Life Of Objects:

The Strange Life of Objects Maurice Rheims, 1961 **Museums in Motion** Edward P. Alexander, Mary Alexander, 2008 In 1979 Edward P. Alexander's *Museums in Motion* was hailed as a much needed addition to the museum literature. In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society, it served as an essential resource for those seeking to enter the museum profession and for established professionals looking for an expanded understanding of their own discipline. Now Mary Alexander has produced a newly revised edition of the classic text, bringing it to the twenty-first century with coverage of emerging trends, resources, and challenges. New material also includes a discussion of the children's museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in-person visits.

The Sex of Things Victoria de Grazia, Ellen Furlough, 2023-09-01 This volume brings together the most innovative historical work on the conjoined themes of gender and consumption. In thirteen pioneering essays, some of the most important voices in the field consider how Western societies think about and use goods, how goods shape female as well as male identities, how labor in the family came to be divided between a male breadwinner and a female consumer, and how fashion and cosmetics shape women's notions of themselves and the society in which they live. Together, these essays represent the state of the art in research and writing about the development of modern consumption practices, gender roles, and the sexual division of labor in both the United States and Europe. Covering a period of two centuries, the essays range from Marie Antoinette's Paris to the burgeoning cosmetics culture of mid-century America. They deal with topics such as blue-collar workers' survival strategies in the interwar years, the anxieties of working-class consumers, and the efforts of the state to define women's especially wives and mothers' consumer identity. Generously illustrated, this volume also includes extensive introductions and a comprehensive annotated bibliography. Drawing on social, economic, and art history as well as cultural studies, it provides a rich context for the current discourse around consumption, particularly in relation to feminist discussions of gender. This volume brings together the most innovative historical work on the conjoined themes of gender and consumption. In thirteen pioneering essays, some of the most important voices in the field consider how Western societies think about and use goods, how

Consumption: The history and regional development of consumption Daniel Miller, 2001 *Grasping Things* Simon J. Bronner, 2021-05-11 America stocks its shelves with mass-produced goods but fills its imagination with handmade folk objects. In Pennsylvania, the back-to-the-city housing movement causes a conflict of cultures. In Indiana, an old tradition of butchering turtles for church picnics evokes both pride and loathing among residents. In New York, folk art exhibits raise choruses of adoration and protest. These are a few of the examples Simon Bronner uses to illustrate the ways Americans physically and mentally grasp things. Bronner moves beyond the usual discussions of form and variety in America's folk material culture to explain historical influences on and the social consequences of channeling folk culture into a mass society.
