Amoore, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This exciting book provides an illuminating account of contemporary globalisation that is grounded in actual transformations in the areas of production and the workplace It reveals the social and political contests that give global its meaning by examining the contested nature of globalisation as it is expressed in the restructuring of work Rejecting conventional explanations of globalisation as a process that automatically leads to transformations in working lives or as a project that is strategically designed to bring about lean and flexible forms of production this book advances an understanding of the social practices that constitute global change Through case studies that span from the labour flexibility debates in Britain and Germany to the strategies and tactics of corporations and workers the author examines how globalisation is interpreted and experienced in everyday life Contestation she argues is about more than just direct protests and resistances It has become a central feature of the practices that enable or confound global restructuring This book offers students and scholars of international political economy sociology and industrial relations an innovative framework for the analysis of globalisation and the restructuring of work *A Dictionary of International Trade Organizations and Agreements*

Patrick Holden, 2011-05-28 This new title examines international trade organizations and the agreements that govern them

The Political Economy of Pharmaceutical Patents Sherry S. Marcellin, 2016-02-24 This book provides a fresh multidisciplinary and exciting look at the making and remaking of pharmaceutical patents at the GATT WTO by utilising a Coxian political economy of continuity and change in the global political economy GPE Marcellin focuses on the role of the transnational drug industry in the making of the patent provisions in the original TRIPS Agreement and consequently the role

of the African Group at the WTO in the remaking of those patent provisions *World Financial Orders* Paul Langley, 2003-08-27 *World Financial Orders* challenges the predominance of neo liberalism as a mode of knowledge about contemporary world finance and claims that it neglects the social and political bases as well as the malign consequences of change He looks to the field of International Political Economy IPE to construct an alternative mode one that critically restores society and politics An historical approach to IPE is advanced that accounts for modern world finance since the seventeenth century as a succession of structurally distinct hierarchical social orders This book will be of interest to those working in the field of IPE and to those scholars researchers and students from across the social sciences who seek to challenge the common sense neo liberal explanation of contemporary world finance *New Directions in Global Economic Governance* George M. von Furstenberg, 2024-11-01 This title was first published in 2001 Containing a wide array of intellectual perspectives this illuminating text takes an authoritative look at the rules decision making procedures and organizational resources at the heart of the institutions of global governance and provides a much needed Asian perspective on key issues dealing with new questions raised at the Okinawa summit Particularly suitable for graduate courses in political science international political economy international organizations corporate strategy and international business as well as having implications for the public policy community
