Strange Sightings From Outer Space:

Strange Sightings on the Moon, Mars, and In Space Martin K. Ettington, Most of my books on Aliens and UFOs are about evidence of them existing on Earth However there are also many unusual sightings in space which is the subject of this book These sightings cover the following locations UFOs flying around the International Space Station Bases and UFOs on the Moon Strange sightings on Mars taken by our Martian rovers In deep space elsewhere in the Solar System These pictures may or may not be real alien life or UFO technologies but they are fascinating none the less Some of the sightings like the face in Cydonia are just a result of our natural abilities to see living forms in many types of pictures But some may turn out to be real phenomena Certainly some of these sightings can't be anything other than real UFOs If you want to learn about strange sightings in the Solar System outside of Earth then this book is for you

Outer Space, Aliens, and the Holy Bible Paul Theriault, 2010-03-23 As time goes on man still has the same unanswered questions regarding the unknown phenomenon that's infected our planet Without expectation the unknown has appeared and disappeared without a clue as to what they are who they are and why they are here We know there is an outer space beyond Earth which contains an endless mass of stars planets asteroids and moons We call it the cosmos which refers to everything in space including Earth Is there anyone or anything out there besides us

UNCOVERING CORRUPT SCIENCE PSJ (Peet) Schutte, 2013-07-17 Modern science or what I call Newtonian science is altogether wrong Nothing can stand still in the Universe and remain a part of the Universe The Universe is the movement thereof Everything in the Universe has to move should it wish to be and everything in the Universe moves and in circles but everything moves There is no mass but only movement and movement is gravity and gravity is time forming space But how does this system work and how does this system form an entire Universe as big as the one we have Read this and see how the Universe is truly stitched together by nature and not by Newton's fantasy It works exactly as Kepler said it does in the tables Kepler left us to study Space by three forms a circle by two that moves straight by one and that forms the six sided Universe we enjoy as a reality

Imagining Outer Space Alexander C.T. Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age

UFO Cover-up Bill Fawcett, Lawrence Fawcett, Barry J. Greenwood, 1990-07 Using recently declassified government files the authors present a compelling argument that the government knows a great deal more about UFOs than it has

sshared with the public and has in fact deliberately concealed the findings of more than 30 years of investigations
