Strasbourg In Transition 1648 1789:

Strasbourg in Transition, 1648-1789 Franklin Lewis Ford, 1966 Professor Ford concentrates on the critical century and a half ushered in by the Peace of Westphalia and brought to a violent close by the French Revolution. This was a period of transition in Strasbourg as French elements were introduced and combined with German tradition to produce not a national but a uniquely continental culture. Professor Ford examines in detail the political and economic life of the free Imperial city, the gradual economic and cultural changes under French rule in the early part of the eighteenth century, and the rapid cultural and social alterations during the thirty or forty years before the French Revolution when Strasbourg became a city more than half Catholic, essentially bilingual and dominated by French rather than by German standards. He has made full use of both French and German sources, published and unpublished, to provide a new interpretation of the life of early modern Europe from the vantage point of a single strategically located community. *Commemorating the Dead in Late Medieval*

Strasbourg Charlotte A. Stanford, 2016-05-23 The Book of Donors for Strasbourg cathedral is an extraordinary medieval document dating from ca 1320-1520 with 6,954 entries from artisan, merchant, and aristocratic classes. These individuals listed gifts to the cathedral construction fund given in exchange for prayers for the donors' souls. The construction administrators of the Oeuvre Notre-Dame also built a chapel dedicated to the Blessed Virgin Mary in the nave that housed the book and showcased prayers and masses for the building benefactors. Chapel book and west front project formed a three-part commemorative strategy that appealed to the faithful of the city and successfully competed against other religious establishments also offering memorial services. Charlotte A. Stanford's study is the first to comprehensively analyze the unpublished Book of Donors manuscript and show the types and patterns of gifts made to the cathedral. It also compares these gift entries with those in earlier obituary records kept by the cathedral canons as well as other medieval obituary notices kept by parish churches and convents in Strasbourg. Analysis of the Book of Donors notes the increase of personal details and requests in fifteenth-century entries and discusses the different memorial opportunities available to the devout. This study draws a vivid picture of life in late medieval Strasbourg as seen through the lens of devotional and memorial practices and will be of particular interest to scholars of art history, memory, and medieval urban life. **The Formation of**

the German Chemical Community 1720-1795 Karl Hufbauer, 2023-11-15 *The Formation of the German Chemical Community 1720-1795* delves into the development of the chemical discipline in Germany during the 18th century, specifically focusing on the social and institutional conditions that led to the creation of a national community of chemists. The study examines how chemists in Germany began to perceive themselves as a cohesive professional group united by shared goals and responsibilities and how this solidarity influenced their reception of revolutionary scientific ideas such as Lavoisier's theory. Through a thorough analysis of key figures, journals, and institutional histories, the book provides a nuanced understanding of the intellectual and social networks that fostered the rise of chemistry as a distinct scientific field in

Germany The book explores how the German chemical community was shaped not just by intellectual currents but also by external support from the Enlightenment including financial and moral backing from state and academic institutions It emphasizes how chemists particularly those following the rational utilitarian approach led by figures like G E Stahl distanced themselves from alchemy and iatrochemistry positioning chemistry as a rational science with wide reaching practical applications By tracing the formation of this community and its response to scientific revolutions the author argues that the evolution of chemistry in Germany during the 18th century played a crucial role in the professionalization of the science in the 19th century This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982

The Abbe Gregoire and the French Revolution Alyssa Goldstein Sepinwall,2021-06-08 In this age of globalization the eighteenth century priest and abolitionist Henri Gr goire has often been called a man ahead of his time An icon of antiracism a hero to people from Ho Chi Minh to French Jews Gr goire has been particularly celebrated since 1989 when the French government placed him in the Pantheon as a model of ideals of universalism and human rights In this beautifully written biography based on newly discovered and previously overlooked material we gain access for the first time to the full complexity of Gr goire s intellectual and political universe as well as the compelling nature of his persona His life offers an extraordinary vantage from which to view large issues in European and world history in the late eighteenth and early nineteenth centuries and provides provocative insights into many of the prevailing tensions ideals and paradoxes of the twenty first century Focusing on Gr goire s idea of regeneration that people could literally be made anew Sepinwall

argues that revolutionary universalism was more complicated than it appeared Tracing the Revolution's long term legacy she suggests that while it spread concepts of equality and liberation throughout the world its ideals also helped to justify colonialism and conquest
