Wheeler, 1988 Creative Stratagems: Creative and Systems Thinking in Handling Social Conflict Adam Matuszczyk, 2012 Stratagems that is what we call war ruses but also ruses in general They can decide victory or defeat We are all familiar with well known war ruses Just think of the Greek story of the Trojan horse These days we think of a Trojan horse mostly in connection with criminal computer hacking We then have to ask How does one think up stratagems To do so one must have competency in creative and systemic thinking This book explains the value and meaning of these ways of thinking for the creation of stratagems Readers will learn How to think of the term stratagem What kinds of stratagems one might find e g from antiquity the Stratagemata of Frontin What creative and systems thinking is and how it expresses itself in the development of ruses How one might go about thinking up stratagems This book is meant for everyone who handles social conflict as well as those with an interest in creative and systems thinking **The Armies of Classical Greece** Everett L. Wheeler, 2017-05-15 The origin of the Western military tradition in Greece 750 362 BC is fraught with controversies such as the date and nature of the phalanx the role of agricultural destruction and the existence of rules and ritualistic practices This volume collects papers significant for specific points in debates or theoretical value in shaping and critiquing controversial viewpoints An introduction offers a critical analysis of recent trends in ancient military history and provides a bibliographical essay contextualizing the papers within the framework of debates with a guide to further reading Literature and Law in the Era of Magna Carta Jennifer Jahner, 2019-10-03 The monograph series Oxford Studies in Medieval Literature and Culture showcases the plurilingual and multicultural quality of medieval literature and actively seeks to promote research that not only focuses on the array of subjects medievalists now pursue in literature theology and philosophy in social political jurisprudential and intellectual history the history of art and the history of science but also that combines these subjects productively It offers innovative studies on topics that may include but are not limited to manuscript and book history languages and literatures of the global Middle Ages race and the post colonial the digital humanities media and performance music medicine the history of affect and the emotions the literature and practices of devotion the theory and history of gender and sexuality ecocriticism and the environment theories of aesthetics medievalism l Literature and Law in the Era of Magna Carta traces processes of literary training and experimentation across the early history of the English common law from its beginnings in the reign of Henry II to its tumultuous consolidations under the reigns of John and Henry III The period from the mid twelfth through the thirteenth centuries witnessed an outpouring of innovative legal writing in England

from Magna Carta to the scores of statute books that preserved its provisions. An era of civil war and imperial fracture it also proved a time of intensive self definition as communities both lay and ecclesiastic used law to articulate collective identities. Literature and Law in the Era of Magna Carta uncovers the role that grammatical and rhetorical training played in shaping these arguments for legal self definition. Beginning with the life of Archbishop Thomas Becket the book interweaves the histories of literary pedagogy and English law showing how foundational lessons in poetics helped generate both a language and theory of corporate autonomy. In this book Geoffrey of Vinsauf's phenomenally popular Latin compositional handbook the *Poetria nova* finds its place against the diplomatic backdrop of the English Interdict while Robert Grosseteste's Anglo French devotional poem the *Ch teau d Amour* is situated within the landscape of property law and Jewish Christian interactions. Exploring a shared vocabulary across legal and grammatical fields this book argues that poetic habits of thought proved central to constructing the narratives that medieval law tells about itself and that later scholars tell about the origins of English constitutionalism.

Greek and Roman Military Manuals James T. Chlup, Conor Whately, 2020-09-07 This volume explores the enigmatic primary source known as the ancient military manual. In particular the volume explores the extent to which these diverse texts constitute a genre sometimes unsatisfactorily classified as technical literature and the degree to which they reflect the practice of warfare. With contributions from a diverse group of scholars the chapters examine military manuals from early Archaic Greece to the Byzantine period covering a wide range of topics including readership siege warfare mercenaries defeat textual history and religion. Coverage includes most of the major contemporary siege manual writers including Xenophon Frontinus Vegetius and Maurice. Close examination of these texts serves to reveal the complex ways in which ancient Greeks Romans and Byzantines sought to understand better and impose order upon the seemingly irrational phenomenon known as war. Providing insight into the multifaceted collection of texts that constituted military manuals this volume is a key resource for students and scholars of warfare and military literature in the classical and Byzantine periods.

Military Literature in the Medieval Roman World and Beyond, 2024-05-21 What do the mysterious Roman author Vegetius the Byzantine emperor Leo VI and the Chinese general Li Jing all have in common? They are three of the dozens of authors across the medieval Mediterranean world and beyond who wrote works of military literature sometimes called military handbooks manuals or treatises. This book brings together a multidisciplinary international team of scholars who present cutting edge essays on diverse aspects of medieval military literature. While some chapters offer novel approaches to familiar authors like Vegetius some present research on under valued topics like Byzantine military illustrations and others provide holistic studies on subjects like early modern treatises they all move the discussion of medieval military literature forward. Contributors are Michael B. Charles Georgios Chatzelis Pierre Cosme Maxime Emion Immacolata Eramo Michael Fulton David Graff John Haldon Catharine Hof John Hosler Savvas Kyriakidis ukasz R ycki Katharina Schoneveld Georgios Theotokis Conor Whately Michael Whitby and Nadya Williams

The Eurasian Way of War David A. Graff, 2016-03-10 This book is a comparative study of military practice in Sui Tang China and the Byzantine Empire between approximately 600 and 700 CE It covers all aspects of the military art from weapons and battlefield tactics to logistics campaign organization military institutions and the grand strategy of empire Whilst not neglecting the many differences between the Chinese and Byzantines this book highlights the striking similarities in their organizational structures tactical deployments and above all their extremely cautious approach to warfare It shows that contrary to the conventional wisdom positing a straightforward Western way of war and an Oriental approach characterized by evasion and trickery the specifics of Byzantine military practice in the seventh century differed very little from what was known in Tang China It argues that these similarities cannot be explained by diffusion or shared cultural influences which were limited but instead by the need to deal with common problems and confront common enemies in particular the nomadic peoples of the Eurasian steppes Overall this book provides compelling evidence that pragmatic needs may have more influence than deep cultural imperatives in determining a society's way of war
