Text And Culture:

Text, Culture, Reception Rüdiger Ahrens, Heinz Antor, 1992 *Text and Culture* , 1989 **Culture as Text, Text as Culture** Elodie Lafitte, Christina Wall, Mary Cobb Wittrock, 2020-05-22 Culture as Text Text as Culture represents a novel interdisciplinary analysis of textuality as it pertains to Cultural Studies More specifically the work examines how the analysis of texts has shaped the most vital contemporary debate of Cultural Studies the recognition that all texts and their contexts are constructs Building upon a Post structural Post modern understanding of truth as a construct Cultural Studies has long since acknowledged the ability of texts to express the time and culture of their origin This work however expands this idea demonstrating not only how a culture is preserved in a text but how that text can in turn define its culture even redefine its history This compendium is structured around four of the most prominent contemporary topics of Cultural Studies the relationship between historical and fictional writing the ability of authors to recreate or redefine history the relationship between language and image and the ability for traditionally marginalized groups to reassert their place in history The book presents articles from a large spectrum of disciplinary fields and civilizations in order to demonstrate how the application of Cultural Studies can unite seemingly disparate disciplines *Culture & Text* Cate Poynton, Alison Lee, 2000 In an exciting departure in the growing field of discourse analysis Culture Text combines a fresh approach to theory with exemplary demonstrations of interdisciplinary analysis Despite its emphasis on text cultural studies has kept most forms of discourse analysis at arm s length Positioned at the conjunction of linguistic and poststructuralist approaches to discourse analysis this book argues for a textual metalanguage for cultural studies and for a reevaluation of methodology Biblical Text and Exegetical Culture Michael Fishbane, 2022-01-25 In this wide ranging collection Michael Fishbane investigates the complex and diverse relationships between the biblical text and exegetical culture The author demonstrates the multiple literary dimensions and interpretative strategies that came to form the Hebrew Bible in the context of the ancient Near East the Dead Sea Scrolls in the context of an emergent biblical Jewish culture and the classical rabbinic Midrash in the context of an emergent rabbinic civilization in late antiquity Within each study and in the collection as a whole the author shows a broad range of creative methods always with a scholarly concern to illuminate the religious ideas of Scripture as it was perceived through diverse hermeneutical lenses and exegetical methodologies The studies range from the purely literary to the highly analytic from myth to law and from studies of symbols to the study of exegetical methods What Does it Mean? Emma Robinson, Sophie Robinson, 2003 Provides students and teachers with an understanding of our relationship to culture and society as individuals and consumers Students will learn the key ideas and terminologies of contemporary issues within cultural studies and the respective political social meanings within text The Taming of the Text Willie Van Peer, 2016-08-19 The contributors of this text first published in 1988 provide a dynamic view of the social functioning of texts taking account of linguistic literary and cultural elements They bring together innovative perspectives on literary analysis

and theory on pragmatics and discourse analysis as well as on text linguistics and reception theory Various text types are examined and the editor introduces each chapter in order to draw them all together to make a fascinating and cohesive whole

Culture, Language, Text Fredrik Christian Brøgger, 1992 This book is a pioneering attempt within the university study of English as a foreign language to provide the discipline of culture studies particularly the study of American British civilization with a theory and methodology of its own Focusing on the anthropological concept of culture as belief systems the author suggests that culture studies should be primarily concerned with the analysis of the interplay between language and ideology Essentially interdisciplinary the field is conceived as a philological text oriented study of culture

Understanding Material Text Cultures Markus Hilgert, 2016-12-19 The present volume comprises 6 highly original studies on material text cultures in different nontypographic societies stretching from the 3rd millennium cuneiform textual record of Ancient Mesopotamia to 20th century Qur'anic boards of northern and central African provenience It provides a multidisciplinary approach to material text cultures complementary to the interdisciplinary strongly theory grounded research scheme of the CRC 933 Six research fellowships were awarded to outstanding young researchers for innovative high risk research proposals pertinent to the CRC 933's overall research scheme Their studies contained in this volume add multidisciplinary dimension to material text culture research satisfy the curiosity as to the applicability of the theoretical premises and methodology developed and tested by the CRC 933 to research on inscribed artefacts carried out on an international level and in different research environments and contribute to anchoring material text culture research as proposed by the CRC 933 within the tradition and broader context of other research strategies devoted to the material dimension of writing such as the *filologia materiale*

The Cultural Analysis of Texts Mikko Lehtonen, 2000-07-19 Drawing upon a range of perspectives from textual and cultural studies this book synthesizes textual contextual and audience analysis into an overall picture of meaning making Using examples ranging from Balzac to blonde jokes modernist poetry to pop lyrics the book discusses the factors that contribute to the formation of meaning language media texts contexts and readers In the cultural study of texts texts contexts and practices are equally important the author argues Meaning making takes place in the articulation between these different elements But how can one examine all three areas at the same time In *The Cultural Analysis of Texts* Mikko Lehtonen develops a model to enable just such an approach
