

The background of the cover is a sepia-toned photograph of a rugged mountain range. The mountains are covered in dense vegetation, and the sky is a pale, hazy blue. In the foreground, there are large, light-colored rocks. A dark horizontal band runs across the middle of the image, containing the title and subtitle in white text.

The Late Archaic Across The Borderlands From Foraging To Farming:

The Late Archaic Across the Borderlands Bradley J. Vierra, 2005-10-01 For everyone interested in the origins of agriculture early village formation stone tool technology human biological adaptation paleoecology and the history of the Borderlands this book will be essential reading **BOOK JACKET** *The Late Archaic across the Borderlands* Bradley J. Vierra, 2010-01-01 Why and when human societies shifted from nomadic hunting and gathering to settled agriculture engages the interest of scholars around the world One of the most fruitful areas in which to study this issue is the North American Southwest where Late Archaic inhabitants of the Sonoran and Chihuahuan Deserts of Mexico Arizona and New Mexico turned to farming while their counterparts in Trans Pecos and South Texas continued to forage By investigating the environmental biological and cultural factors that led to these differing patterns of development we can identify some of the necessary conditions for the rise of agriculture and the corresponding evolution of village life The twelve papers in this volume synthesize previous and ongoing research and offer new theoretical models to provide the most up to date picture of life during the Late Archaic from 3 000 to 1 500 years ago across the entire North American Borderlands Some of the papers focus on specific research topics such as stone tool technology and mobility patterns Others study the development of agriculture across whole regions within the Borderlands The two concluding papers trace pan regional patterns in the adoption of farming and also link them to the growth of agriculture in other parts of the world **The Oxford Handbook of Southwest Archaeology** Barbara Mills, Severin Fowles, 2017-08-15 The American Southwest is one of the most important archaeological regions in the world with many of the best studied examples of hunter gatherer and village based societies Research has been carried out in the region for well over a century and during this time the Southwest has repeatedly stood at the forefront of the development of new archaeological methods and theories Moreover research in the Southwest has long been a key site of collaboration between archaeologists ethnographers historians linguists biological anthropologists and indigenous intellectuals This volume marks the most ambitious effort to take stock of the empirical evidence theoretical orientations and historical reconstructions of the American Southwest Over seventy top scholars have joined forces to produce an unparalleled survey of state of archaeological knowledge in the region Themed chapters on particular methods and theories are accompanied by comprehensive overviews of the culture histories of particular archaeological sequences from the initial Paleoindian occupation to the rise of a major ritual center in Chaco Canyon to the onset of the Spanish and American imperial projects The result is an essential volume for any researcher working in the region as well as any archaeologist looking to take the pulse of contemporary trends in this key research tradition *Hinterlands to Cities* Matthew C. Pailles, Michael T. Searcy, 2022-03-14 This approachable book in the SAA Press Current Perspectives Series is a comprehensive synthesis of Northwest Mexico from the US border to the Mesoamerican frontier Filling a vital gap in the regional literature it serves as an essential reference not only for those interested in the specific history of this area of

Mexico but western North America writ large A period by period review of approximately 14 000 years reveals the dynamic connections that knitted together societies inhabiting the Sea of Cortez coast the Sonoran and Chihuahuan Deserts and the Sierra Madre Occidental Networks of interaction spanned these diverse ecological topographical and cultural terrains in the millennia following the demise of the megafauna The authors provide a fresh perspective that refutes depictions of the Northwest as a simple filter or conduit of happenings to the north or south and they highlight the role local motivations and dynamics played in facilitating continental scale processes *The Archaeology and Historical Ecology of Small Scale Economies* Victor D. Thompson, James C. Waggoner Jr., 2019-03-01

Most research into humans impact on the environment has focused on large scale societies a corollary assumption has been that small scale economies are sustainable and in harmony with nature The contributors to this volume challenge this notion revealing how such communities shaped their environment and not always in a positive way Offering case studies from around the world from Brazil to Japan Denmark to the Rocky Mountains the chapters empirically demonstrate the substantial transformations of the surrounding landscape made by hunter gatherer and limited horticultural societies Summarizing previous research as well as presenting new data this book shows that the environmental impact and legacy of societies are not always proportional their size Understanding that our species leaves a footprint wherever it has been leads to both a better understanding of our prehistoric past and to deeper implications for our future relationship to the world around us **Land of the Tejas** John Wesley Arnn,

III, 2014-05-23 Combining archaeological historical ethnographic and environmental data Land of the Tejas represents a sweeping interdisciplinary look at Texas during the late prehistoric and early historic periods Through this revolutionary approach John Wesley Arnn reconstructs Native identity and social structures among both mobile foragers and sedentary agriculturalists Providing a new methodology for studying such populations Arnn describes a complex vast exotic region marked by sociocultural and geographical complexity tracing numerous distinct peoples over multiple centuries Drawing heavily on a detailed analysis of Toyah a Late Prehistoric II material culture as well as early European documentary records an investigation of the regional environment and comparisons of these data with similar regions around the world Land of the Tejas examines a full scope of previously overlooked details From the enigmatic Jumano Indian leader Juan Sabata to Spanish friar Casanas s 1691 account of the vast Native American Tejas alliance Arnn s study shines new light on Texas s poorly understood past and debunks long held misconceptions of prehistory and history while proposing a provocative new approach to the process by which we attempt to reconstruct the history of humanity **Case Studies in Environmental**

Archaeology Elizabeth Reitz, C. Margaret Scarry, Sylvia J. Scudder, 2008 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods Each chapter is an original or revised work by an internationally recognized scientist This second edition is based on the 1996 book of the

same title The editors have invited back a number of contributors from the first edition to revise and update their chapter New studies are included in order to cover recent developments in the field or additional pertinent topics

Reconstructing Human-Landscape Interactions - Volume 1 Brett T. McLaurin,Aileen C. Elliott,Nalini

Torres,2012-01-03 The Holocene is unique when compared to earlier geological time in that humans begin to alter and manipulate the natural environment to their own needs Domestication of crops and animals and the resultant intensification of agriculture lead to profound changes in the impact humans have on the environment Conversely as human populations began to increase geologic and climatic factors begin to have a greater impact on civilizations To understand and reconstruct the complex interplay between humans and the environment over the past ten thousand years requires examination of multiple differing but interconnected aspects of the environment and involves geomorphology paleoecology geoarchaeology and paleoclimatology These Springer Briefs volumes examine the dynamic interplay between humans and the natural environment as reconstructed by the many and varied sub fields of the Earth Sciences Zuni Origins David A.

Gregory,David R. Wilcox,2015-11-01 A Choice Outstanding Academic Title The Zuni are a Southwestern people whose origins have long intrigued anthropologists This volume presents fresh approaches to that question from both anthropological and traditional perspectives exploring the origins of the tribe and the influences that have affected their way of life Utilizing macro regional approaches it brings together many decades of research in the Zuni and Mogollon areas incorporating archaeological evidence environmental data and linguistic analyses to propose new links among early Southwestern peoples The findings reported here postulate the differentiation of the Zuni language at least 7 000 to 8 000 years ago following the initial peopling of the hemisphere and both formulate and test the hypothesis that many Mogollon populations were Zunian speakers Some of the contributions situate Zuni within the developmental context of Southwestern societies from Paleoindian to Mogollon Others test the Mogollon Zuni hypothesis by searching for contrasts between these and neighboring peoples and tracing these contrasts through macro regional analyses of environments sites pottery basketry and rock art Several studies of late prehistoric and protohistoric settlement systems in the Zuni area then express more cautious views on the Mogollon connection and present insights from Zuni traditional history and cultural geography Two internationally known scholars then critique the essays and the editors present a new research design for pursuing the question of Zuni origins By taking stock and synthesizing what is currently known about the origins of the Zuni language and the development of modern Zuni culture Zuni Origins is the only volume to address this subject with such a breadth of data and interpretations It will prove invaluable to archaeologists working throughout the North American Southwest as well as to others struggling with issues of ethnicity migration incipient agriculture and linguistic origins *Bountiful Deserts* Cynthia Radding,2022-10-11 Common understandings drawn from biblical references literature and art portray deserts as barren places that are far from God and spiritual sustenance In our own time attention focuses on the rigors of climate change in arid lands and the perils of the

desert in the northern Mexican borderlands for migrants seeking shelter and a new life Bountiful Deserts foregrounds the knowledge of Indigenous peoples in the arid lands of northwestern Mexico for whom the desert was anything but barren or empty Instead they nurtured and harvested the desert as a bountiful and sacred space Drawing together historical texts and oral testimonies archaeology and natural history author Cynthia Radding develops the relationships between people and plants and the ways that Indigenous people sustained their worlds before European contact through the changes set in motion by Spanish encounters highlighting the long process of colonial conflicts and adaptations over more than two centuries This work reveals the spiritual power of deserts by weaving together the cultural practices of historical peoples and contemporary living communities centered especially on the Yaqui Yoeme and Mayo Yoreme Radding uses the tools of history anthropology geography and ecology to paint an expansive picture of Indigenous worlds before and during colonial encounters She re creates the Indigenous worlds in both their spiritual and material realms bringing together the analytical dimension of scientific research and the wisdom of oral traditions in its exploration of different kinds of knowledge about the natural world Published in cooperation with the William P Clements Center for Southwest Studies Southern Methodist University
