The Lattice of Interpretability Types of Varieties Octavio Carlos García, Walter Taylor, 1984 We investigate the lattice invented by W D Neumann in 1974 formed by the class of all varieties under the quasi ordering script V is interpretable in script W The lattice is found to be non modular and a proper class Various familiar varieties are found to be logical conjunction symbol up arrow irreducible or prime and various filters especially Mal'tsev classes are found to be indecomposable or prime Many familiar varieties are found to be inequivalent in the lattice using a new technique of SIN algebras Seven figures are included which document the known relationships between some sixty known or easily describable varieties and varietal families *Don Pigozzi on Abstract Algebraic Logic, Universal Algebra, and Computer Science* Janusz Czelakowski, 2018-03-20 This book celebrates the work of Don Pigozzi on the occasion of his 80th birthday In addition to articles written by leading specialists and his disciples it presents Pigozzi's scientific output and discusses his impact on the development of science The book both catalogues his works and offers an extensive profile of Pigozzi as a person sketching the most important events not only related to his scientific activity but also from his personal life It reflects Pigozzi's contribution to the rise and development of areas such as abstract algebraic logic AAL universal algebra and computer science and introduces new scientific results Some of the papers also present chronologically ordered facts relating to the development of the disciplines he contributed to especially abstract algebraic logic The book offers valuable source material for historians of science especially those interested in history of mathematics and logic **Proceedings of the International Conference on Algebra Dedicated to the Memory of A.
