The Singing Tradition of Child's Popular Ballads. (Abridgement) Bertrand Harris Bronson,2015-03-08 Francis James Child's English and Scottish Popular Ballads published in ten parts from 1882 to 1898 contained the texts and variants of 305 extant themes written down between the thirteenth and nineteenth centuries Unsurpassed in its presentation of texts this exhaustive collection devoted little attention to the ballad music a want that was filled by Bertrand Harris Bronson in his four volume Traditional Tunes of the Child Ballads The present book is an abridged one volume edition of that work setting forth music and text for proven examples of oral tradition with a new comprehensive introduction Its convenient format makes readily available to students and scholars the materials for a study of the Child ballads as they have been preserved in the British American singing tradition Originally published in 1977 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Language and Imagery of Coma and Brain Injury* Matthew Colbeck,2021-04-22 What occurs within coma What does the coma patient experience How does the patient perceive the world outside of coma if at all The simple answer to these questions is that we don't know Yet the sheer volume of literary and media texts would have us believe that we do Examining representations of coma and brain injury across a variety of texts this book investigates common tropes and linguistic devices used to portray the medical condition of coma giving rise to universal mythologies and misconceptions in the public domain Matthew Colbeck looks at how these texts represent or fail to represent long term brain injury drawing on narratives of coma survivors that have been produced and curated through writing groups he has run over the last 10 years Discussing a diverse range of cultural works including novels by Irvine Welsh Stephen King Tom McCarthy and Douglas Coupland as well as film and media texts such as The Sopranos Kill Bill Coma and The Walking Dead Colbeck provides an explanation for our fascination with coma With a proliferation of misleading stories of survival in the media and in literature this book explores the potential impact these have upon our own understanding of coma and its victims **Communities of the Air** Susan Merrill Squier,2003-06-19 Affirms the importance of invention of radio and explores how radio creates sets of overlapping communities of the air including those who study and theorize radio as a technological social cultural and historical phenomenon The Handbook of Child
