The Left Hand of the Biblical Gods Carlton Morris, 2024-09-30 The Left Hand of the Biblical God refers to the myths customs rituals ceremonies and sacrifices performed by religious organizations that are the shields that hide the true identity of both the benevolent Lord God and Jehovah the vindictive God of Abraham It is a saga of their genetic bloodlines that of the Lord God through Adam and that of Jehovah through his son Isaac It is a realistic look at the civilized society of man before the flood and a critical critique of the recorded death suffering trials and tribulations of the Jewish people after the flood The Left Hand of the Biblical God is a new and different perspective on the identity of the biblical gods and their relationship with man an analysis of the Christian Bible and the reality of organized religion It is a perspective that will never be heard preached from the pulpit or taught in Sunday school *Wedding Night of Creation* Jonathan Varsell Smith, 2005 The

Sentences Peter Lombard (Bishop of Paris), 2007 This volume makes available for the first time in English full translations of Book 2 of the Sentences It consists of forty four Distinctions and contains an introduction to Book 2 a list of the major chapter headings and a bibliography Creation—Path of the Soul John Michael Paul, 2015-10-28 We were never intended to be dominated by all the negation and inharmony that exists in the world We were fashioned equipped and given power for one purpose only and that is to transmute every negative and inharmonious condition which exists in the world Yet we find very few that know this is the reason for which we were created We do not know what our true purpose is because we do not know the real foundation of our being and are not familiar with the laws of creation We do not understand the reasoning behind the things we do in our metaphysical rituals and practices By studying creation we receive all the answers CreationPath of the Soul gives an understanding of creation from the Void to the Cosmic to the Cosmos down to our very soul so we can understand what the will of the Cosmic is and what the meaning of life and our purpose in being are CreationPath of the Soul uses the Kabbala to go through creation step by step making creation easy to understand By understanding the laws of creation more questions are answered than are asked CreationPath of the Soul looks into such topics as astral travel the Akashic records reincarnation cause and effect the conscious subconscious and superconscious minds and other metaphysical areas of interest CreationPath of the Soul has practical exercises for astral travel reading the Akashic records for past life regression coordinating the conscious and subconscious minds to increase intuition and transmuting the darkness **A Systematic Analysis of Universal History from the Creation to the Present Time** Jehoshaphat

Aspin, 1816 *The Geometry of Creation* Robert Bork, 2016-12-05 The flowering of Gothic architecture depended to a striking extent on the use of drawing as a tool of design By drawing precise blueprints with simple tools such as the compass

and straightedge Gothic draftsmen were able to develop a linearized architecture of unprecedented complexity and sophistication Examination of their surviving drawings can provide valuable and remarkably intimate information about the Gothic design process Gothic drawings include compass pricks uninked construction lines and other telltale traces of the draftsman's geometrically based working method The proportions of the drawings moreover are those actually intended by the designer uncompromised by errors introduced in the construction process All of these features make these drawings ideal subjects for the study of Gothic design practice but their geometry has to date received little systematic attention This book offers a new perspective on Gothic architectural creativity It shows in a series of rigorous geometrical case studies how Gothic design evolved over time in two senses in the hours of the draftsman's labor and across the centuries of the late Middle Ages In each case study a series of computer graphics show in unprecedented detail how a medieval designer could have developed his architectural concept step by step using only basic geometrical operations Taken together these analyses demonstrate both remarkable methodological continuity across the Gothic era and the progressive development of new and sophisticated permutations on venerable design themes This rich tradition ultimately gave way in the Renaissance not because of any inherent problem with Gothic architecture but because the visual language of Classicism appealed more directly to the pretensions of Humanist princes than the more abstract geometrical order of Gothic design as the book's final chapter demonstrates

The Creation of Eve and Renaissance Naturalism Jack M. Greenstein, 2016-08-23 Depicting the Creation of Woman presented a special problem for Renaissance artists The medieval iconography of Eve rising half formed from Adam's side was hardly compatible with their commitment to the naturalistic representation of the human figure At the same time the story of God constructing the first woman from a rib did not offer the kind of dignified affective pictorial narrative that artists patrons and the public prized Jack M Greenstein takes this artistic problem as the point of departure for an iconographic study of this central theme of Christian culture His book shows how the meaning changed along with the form when Lorenzo Ghiberti Andrea Pisano and other Italian sculptors of the fourteenth and fifteenth centuries revised the traditional composition to accommodate a naturalistically depicted Eve At stake Greenstein argues is the role of the artist and the power of image making in reshaping Renaissance culture and religious thought

The Creation: Its Infinite Features and Finite Realms Volume Iv Jack Hetrick, 2017-02-27 In 1996 a discovery was made of a body of knowledge which is believed to have important implications for the future of man In that year it was discovered that many cultural artifacts produced by man since about 30 000 BC possess an unusual symbolism In *The Creation Its Infinite Features and Finite Realms* artifacts of man that possess this unusual symbolism are referred to as inspired sources Volume IV of *The Creation* series addresses inspired sources that pertain to the destiny of man to carry the gospel of Jesus Christ and expand the kingdom of God to other stellar systems in the Milky Way Galaxy and ultimately to distant parts of the universe in the future age This study also briefly addresses the means that is spaceship propulsion wormhole travel and black hole travel by which

man and other living entities who serve the Creator in the present age will travel to stellar and galactic destinations in the future age
