The Life Cycle Of Civilizations:

The Life Cycle of Civilizations Stephen Blaha, 2002 This book is an expanded version of *The Rhythms of History* the book that made macro History into a semi quantitative Science New features include 1 an appendix showing how the history of Mayan civilization conforms to the book's Theory of Civilizations including the latest information from the newly discovered hieroglyphic texts at Dos Pilas Guatemala 2 an appendix on the sub Saharan African civilization Great Zimbabwe showing it fits the theory 3 a comparison of the theory with Toynbee's observations showing the many new features resulting from a quantitative theory 4 numerous historic pictures and illustrations of the civilizations of Mankind including a number of newly found pictures from the nineteenth century 5 a chapter describing the potentially disturbing implications of patterns in civilizations Are we free and the implications for the Philosophy of History and 6 expanded comments in many sections such as the sections on the future of Humanity the role of China and the Islamic West conflict The book begins with a hard hitting tell it like it is chapter on the current international situation with statements such as The United States and Western civilization is now engaged in a small Vietnam style war on a global scale at the time of this writing This war is still in the early stages of development The attack on the World Trade Center by Muslim terrorists may have the same significance for Western civilization that the Gothic invasion of Rome itself in the prime of the Empire the First Century AD had for the future of Rome They may be a premonition of things to come not necessarily soon but perhaps in a few centuries The Goths returned three centuries later and remained as permanent conquerors Over the long term the West must free itself from a dependence on Muslim oil Muslim oil revenues are the fuel for the development of weapons of mass destruction by Iran and Iraq In the future they will supply the revenues of an expansionist Islam As the silk trade looted the Roman Empire of its gold and reduced its economy the trade in oil is looting the West of its prosperity and freedom of action The rise and fall of oil prices has a significantly greater effect on the American and world economy than the raising and lowering of interest rates by central banks The book then describes a theory of civilizations that led to these observations Currently unfolding events seem to be fulfilling the predictions which were made last year including the new North Korean threat that seems to be consistent with a predicted breakdown in Japan North Korea will create major problems with Japan As this is being written Japan is moving Aegis destroyers nearer to North Korea and preparing for defense THE EVENTS DESCRIBED IN THIS BOOK AND ITS PREDECESSOR APPEAR TO BE HAPPENING AS PREDICTED LAST YEAR According to Theory of Civilizations the basis of civilizations was laid with a genetic mutation found by Ding et al 40 000 years ago that created bold enterprising individuals who became the leadership group of civilizations a group that Toynbee called the creative minority When the world's climate became warmer and more stable 10 000 years ago the seeds of civilizations began to germinate Thus the origin of civilizations is tied to human genetics The book then shows that a long term social behavior pattern of mankind based on four generation trends causes civilizations to develop and oscillate in patterns of routs and rallies Civilizations rise

and fall due to their internal human dynamics The theory of civilization is developed using equations and 68 diagrams that show a close detailed match between the theory and the actual history of all known Asian European and African civilizations over the last 5 500 years The theory projects the future of today s civilizations including the future of Western and Islamic civilizations It also successfully describes the interaction of barbarians and civilizations the interaction of two civilizations the impact of modern technology on civilizations it accounts for the Luddite reaction to the Industrial Revolution the impact of major environmental events on civilizations e g the collapse of Minoan civilization due to a volcanic eruption and the disintegration of civilizations It also accounts for the tremendous growth phases seen in many civilizations such as the building of the great pyramids in Egyptian civilizations Based on the theory fifteen new civilizations are identified including new prehistoric Chinese and Egyptian civilizations Having shown the success of the theory for earth civilizations it considers the form of extraterrestrial civilizations and calculates their impact on Western civilization should contact be established The book also shows the need for the colonization of space and nearby planets if mankind is to progress in the future The book analyzes the impact of the lengthening life spans of mankind on the future of civilizations Predictions are made for the state of the world for 2050 and 2100 A detailed understanding the past enables the theory of civilizations to make predictions for the future Defining Progress to be the sum of the world s civilizations the book shows that Progress seems to be approximately linearly increasing over the last 5 500 years A plot of Progress appears on the book s cover shown on this web page together with the contributions of each civilization to Progress The vertical order of the civilizations in the plot is arbitrary Older civilizations tend to be lower in the plot The book is a tour de force that makes History a Science rather than a collection of random events It is the first detailed mathematical treatment of history Although the book contains mathematics it is intended for the general reader as well as the mathematically inclined There are copious verbal descriptions of the theory as well as many figures plotting the theory versus historical events A qualitative descriptive theory of civilizations is also presented that is like a Dow Theory of Civilizations

The Rhythms of History Stephen Blaha, 2002-08 The Rhythms of History presents a quantitative theory of civilizations supported by the data in Toynbee s classic 12 volume A Study of History

The Shifting Global Balance of Power: Perils of a World War and Preventive Measures Dr. Yana Korobko, Mahmoud Musa, 2014-06-09 Many believed that the world would remain everlastingly unchangeable in the aftermath of victory of the Allies the United States the Soviet Union China United Kingdom and France in World War II They remodeled the world map amongst themselves and affirmed that they will be guarantors of the international status quo However those who pledged to conserve peace are now breaking it leading the planet to the edge of clash This book differs from all others that dealt with possible World War III scenarios since it combines knowledge in the fields of history international relations economics sociology and psychology and philosophy Thus giving the reader a broader outlook on such matters as Potentially risky world war scenarios Dialogue between the West and Islam New emerging

superpowers Psychological and Cyber Warfare Preventive mechanisms such as early warning and preparedness operations

Civilizations and World Systems Stephen K. Sanderson, 1995 Leading figures in the fields of civilizational studies and sociology and political science join to compare and contrast their assumptions and conclusions about broad scale social and historical change

Civilization and Beyond Scott Nearing, 2017-12-02 We may think and talk about civilization as one pattern or level of culture one stage through which human life flows and ebbs In that sense we may regard it abstractly and historically as we regard the most recent ice age or the long and painful record of large scale chattel slavery

A Historical Survey of the Yellow River and the River Civilizations Jianxiong Ge, Yunsheng Hu, 2021-01-04 This book explores the relationship between rivers and ethics in China with a particular focus on the health of the Yellow River and China's sustainable development Though the book falls into the category of East Asian History it is an interdisciplinary academic work that addresses not only history but also culture human geography and physical geography It traces the changes in the Yellow River over time and examines the origin and developmental course of Chinese civilization which has always been closely intertwined with the Yellow River It also draws comparisons between the Yellow River and the Yangtze Nile Tigris Euphrates and Indus rivers to provide insights into how they have contributed to civilizations At the same time it discusses the lessons learned from people's taming the Yellow River Most significantly the book explores the relationship between humans and the environment from an ethical standpoint making it an urgent reminder of the crucial role that human activities play in environmental issues concerning the Yellow River so as to achieve a sustainable development for China's mother river The intended audience includes academic readers researching East Asian and Chinese history culture geography human geography historical geography the environment river civilizations etc as well as history and geography lovers and members of the general public who are interested in the Yellow River and the civilization that has evolved around it

A History of Discoveries on Hearing Darlene R. Ketten, Allison B. Coffin, Richard R. Fay, Arthur N.

Popper, 2023-12-19 This volume focuses on the history of research on hearing from comparative approaches Each chapter examines the most formative studies that led to current understanding of hearing across taxa and still influence hearing research in general Much of the early work on hearing which goes back to Aristotle as well as the classic work of 16th to early 20th century scientists e.g. Spellanzani Retzius Ramon y Cajal and Helmholtz is not well known to modern investigators Similarly work in the first 75 years of the 20th century is also unknown or in some cases dismissed because it is old Much of the earlier work describes research approaches and results fundamental to our understanding of hearing as well as the beauty of observation and synthesis The pioneering work on hearing contains ideas and questions that are still germane today Thus the goal of this volume is to introduce review and put into perspective older but exemplary extraordinary studies by investigators that form the basis of our knowledge as well as questions being asked today Each chapter includes the first significant observations and approaches to hearing in the taxa and or hearing type that is the focus of the chapter with some

of the most important earlier papers discussed in some detail including the theories formative experiments results and conclusions Each chapter provides briefer notations and citations of additional important papers that are outgrowths of the founding research or correlate and even reverse the original works This volume is a departure from the classic approach established for the SHAR books in which the focus has been on a single topic and on the most recent and exciting discoveries One difference in this volume from past SHAR volumes is that we have a more coordinated approach for the chapters to ensure that this volume is indeed a documentation of hearing research history not a review of the latest status of the topic A second difference is that the focus of the volume is on the historical value of studies In that sense the volume maintains the tutorial value for which SHAR books are famous but it explores the ancestry of modern research in order to help new researchers to gain perspective on important questions and on fundamental information they may not fully appreciate to their loss Our interest in doing this volume comes from phenomena familiar to most senior investigators that younger investigators often have little or no sense of the history of their discipline and they often do not know that their hot new idea was not only pursued and often solved but further that it was solved in an elegant way We believe it is important to bring the methodologies and discoveries on hearing done before the advent of the internet to light for the benefit and growth of new research In deciding on the chapter divisions for this book we considered a number of different organizational schemes and particularly using as a focus methodological approaches e g psychoacoustics low to high frequency types physiology anatomy However we came to the conclusion that most investigators tend to be more focused on working within a particular taxonomic group settling on particular taxa in many cases driven by the special hearing abilities We also concluded that that this approach is more naturally related to the evolution not only of hearing but also to the evolution of ideas as much of hearing science was part of the natural philosopher approach that was a core element of historical discoveries

Information Technology and Societal Development Targowski, Andrew, 2008-10-31 Latent in the current environment of rapid technological advances are breakthroughs waiting to be discovered that will have profound impacts on how organizations will cope with the direction civilization is taking Information Technology and Societal Development examines in depth the full range of impacts of information technology on civilization and the development of societies Uniquely broad in the scope of examining the societal implications of informational technology this groundbreaking reference work makes an essential contribution to research libraries worldwide

Barbarians to Bureaucrats: Corporate Life Cycle Strategies Lawrence M. Miller, 1990-01-14 One day your sluggish company will taken to the sound of a beating drum and the sight of a competitor approaching at ramming speed On deck will be a jut jawed Barbarian He will hardly blink as his target is ripped asunder sending Aristocrats Bureaucrats and their unfortunate shipmates to their corporate death So goes Mr Miller s tale from which we can all profit The Wall Street Journal Barbarians to Bureaucrats presents a brilliant new solution to a stubborn old business problem how to halt a company s descent into wasteful stifling bureaucracy Lawrence M

Miller a management consultant for such corporate giants as Xerox and 3M argues that corporations like civilizations have a natural life cycle and that by identifying the stage your company is in and the leaders associated with it you can avert decline and continue to thrive Every company begins with the compelling new vision of a Prophet and the aggressive leadership of an iron willed Barbarian who implements the Prophet s ideas New techniques and expansions are pushed through by the Builder and the Explorer but the growth spawned by these managers can easily stagnate when the Administrator sacrifices innovation to order and the Bureaucrat imposes tight control And just as in civilizations the rule of the Aristocrat out of touch with those who do the real work invites rebellion from employees customers and stockholders It will take the Synergist a business leader who balances creativity with order to restore vitality and insure future growth Executives from major corporations have already put the powerful insights of Barbarians to Bureaucrats into practice to regenerate their own companies Now you can use this brilliant lucid and dazzlingly original book to put your company and your career back on track
