artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention Geographies of the Ear Tania Gentic, 2025-08-15 Tania Gentic examines the soundscape of post Franco Barcelona to point out the difficulties of considering the contemporary city as either the product of a monolingual national identity or a lived space easily circumscribed by geographical categories Bibliography of Modern Art Museum of Modern Art (New York, N.Y.).
