Talking Politics A. W. Sparkes,2006-06-19 Talking Politics is a philosophical examination of some of the basic concepts of political discourse Its primary focus is on the ordinary on what is said by politicians in newspapers and by people in pubs rather than on the works of political theorists This is a work of but not on political theory Talking Politics is Invaluable as a source of reference for students and contains a detailed index Arranged thematically around topics such as Nation Each entry has copious cross references and suggestions for further reading A W Sparkes is uniquely qualified to write such a book combining some thirty years teaching as a philosopher with wide experience of and a life long fascination with politics His attitude is that of a critical but uncynical observer *Year Book, Australia 2001* Australian Bureau of Statistics,2001

The Australian Geographic Book of Antarctica Keith Scott,1993 This book explains the allure of the great wilderness of Antarctica mostly unspoiled by people its wildlife still incredibly trusting of us and demonstrates why we must preserve it at all cost **Facing the Wild** Chilla Bulbeck,2012-06-25 What do wild animals mean to humans Will they survive both rampant habitat loss and extinction caused by human encroachment and as ecotourists our enthusiasm for them With ecotourism now the fastest growing segment of tourism and encounters with wild animals be it swimming with dolphins going on safari or bird watching ever more popular these are critical questions Yet until now little has been known about why people crave encounters with wild animals and the meaning for the ecotourism industry conservation efforts and society at large Facing the Wild is the first serious empirical examination of why people seek out animals in their natural environment what the desire for this experience tells us about the meanings of animals nature authenticity and wilderness in contemporary industrialized societies and whether visitors change their environmental perspectives and behaviour as the custodians of wildlife parks would like them to The book explores the contradictions and ambivalence that so many people experience in the presence of wild nature in loving it we may diminish it and in the act of wanting to see it we may destroy it Ultimately the book makes a case for respectful stewardship of a hybrid nature and provides insight for both practitioners

and ecotourists alike **Antarctica** Bernadette Hince, Rupert Summerson, Arnan Wiesel, 2015-04-30 This is the first book whose subject is the music sounds and silences of Antarctica From 2011 until 2014 Australia marked its long standing connection with Antarctica by celebrating the centenary of the Australasian Antarctic Expedition The icy continent with its extremes of climate and environment and unique soundscapes offers great potential for creative achievements in the world of music and sound This book demonstrates the intellectual and creative engagement of artists musicians scientists and writers Consciousness of sounds in particular musical ones has not been at the forefront of our aims in polar endeavours but listening to and appreciating them has been as important there as elsewhere **Exploring Polar Frontiers** William James Mills, 2003-12-11 Covers the entire history of Arctic and Antarctic exploration from the voyage of Pytheas ca 325 B C to the present in one convenient comprehensive reference resource Exploring Polar Frontiers A Historical Encyclopedia is the only reference work that provides a comprehensive history of polar exploration from the ancient period through the present day The author is a noted polar scholar and offers dramatic accounts of all major explorers and their expeditions together with separate exploration histories for specific islands regions and uncharted waters He presents a wealth of fascinating information under a variety of subject entries including methods of transport myths achievements and record breaking activities By approaching polar exploration biographically geographically and topically Mills reveals a number of intriguing connections between the various explorers their patrons and times and the process of discovery in all areas of the polar regions Furthermore he provides the reader with a clear understanding of the intellectual climate as well as the dominant social economic and political forces surrounding each expedition Readers will learn why the journeys were undertaken not just where when and how **The Antarctic Dictionary** Bernadette Hince, 2000-11-10 The world's most isolated continent has spawned some of the most unusual words in the English language In the space of a mere century a remarkable vocabulary has evolved to deal with the extraordinary environment and living organisms of the Antarctic and subantarctic Here for the first time is a complete guide to the origin and definitions of Antarctic words Like other historical dictionaries The Antarctic Dictionary gives the reader quotations for each word These quotations are the life blood of the dictionary more than 15 000 quotations from about 1000 different sources give the reader a unique insight into the way the language of Antarctica has evolved The reader will find out what it means to be slotted the shortcomings of homers the joys of a donga and the hazards of a growler The Antarctic Dictionary has been meticulously researched and will appeal to all those who have been to the frozen continent or have ever dreamed of going there It will also appeal to those fascinated by the development of language With a forward by Sir Ranulph Fiennes **The Southern Frontier** Rohan Howitt, 2025-05-14 Antarctica looms large in the Australian psyche as a place of science adventure and peril Our romantic entanglement with this unique environment is deep and enduring The Southern Frontier traces Australia's Antarctic obsession from its origins in the nineteenth century to the creation of the Australian Antarctic Territory and a permanent national Antarctic program in the 1930s and 1940s It

reconstructs Australian ideas beliefs and anxieties about the Antarctic and shows how Australians came to imagine their nation as having a natural right perhaps even a destiny to explore exploit and control the world to their south By examining how and why Australia relentlessly pursued the acquisition of its Antarctic Territory Rohan Howitt recovers a forgotten way of thinking about this region as one frontier of an Australian empire stretching from the equator to the South Pole At a time when the Australian Government is ramping up its investment in Antarctica and geopolitical tensions are on the rise The Southern Frontier provides the historical explanation for how Australians came to see the world to their south as a natural extension of the nation s territory Australian Explorers by Sea, Land, and Air, 1788-1988 Ian Francis McLaren,1988

Committed to Learning Juliet Flesch,2017-11-27 Consistently ranking in the top five educational faculties in the world the Melbourne Graduate School of Education has achieved a status few would have predicted This history of the first hundred and ten years of the discipline of Education at the University of Melbourne reflects the extraordinary change in the esteem in which it has been held in the university Australia and the world The very idea of Education as a suitable course of study at a university was initially opposed and until recently the standing of this faculty compared to other professional faculties such as Law or Medicine has been less than equal But since the University was revitalised and reorganised under the Melbourne Model in 2008 its reputation has risen steadily Committed to Learning brings to life those whose vision and hard work since its early beginning have brought such success to this faculty **Australian Books** National Library of Australia,1989 Marine Affairs Bibliography ,1988 *Self Portraits* ,1991 A selection of 15 interviews with Australian writers by Hazel de Berg introduced and edited by the novelist David Foster The original interviews form part of the National Library s Oral History Collection **Spy Who Loved Children** Moira Watson,1993-05-11 At the height of the Great Depression when few families could afford holidays Herbert Dyce Murphy invited groups of children to his seaside house on the Mornington Peninsula He built a tiny railway for them in his garden took them on picnics and sailing trips and told them wonderful stories about his past elaborate tales of whaling ships and royal soir es of espionage and Antarctic blizzards full of adventure intrigue and romance How much of it was true Does it matter What sort of person was Murphy
