Snail Transmitted Parasitic Diseases Emile A. Malek, 2018-05-04 Research on snail transmitted disease has continued at a considerable pace during the last twenty years and several investigators have made valuable contributions to our knowledge of these diseases The objective of this book is to present an up to date account of the infections or diseases of the world which are transmitted by snails and in which each disease is considered in much greater detail than is usually provided by textbooks on general medical or veterinary parasitology These two volumes cover the infections or diseases that are caused by certain helminths which are transmitted by snails

The Fairy Woods Children Adriana Yamane, 2015-04-24 Much of the education of children is based on the antithesis between good and bad The images of bad are supposed to be the dark background against which the good can shine like courage shining through in times of danger The problem with this approach is that the good has only the chance to shine but not to grow The Fairy Woods Children thus tries to bring a new approach that allows goodness to grow and to expand in children's consciousness without the need of a fear based background scenario While this may sound boring to grown up people who are used mainly to the strife of their daily life with all its troubles and fears small children do not need to have this handicap From an early age they need to be allowed to grow beyond this stage at which humankind is now and they need to learn more about the infinite possibilities that may lie before them in the future A lot of misunderstandings and conflicts arise from the lack of heart to heart communication which is the central point in the seven stories of the book Each story meant to be read at bedtime brings to the surface a deep inner longing of the soul to express itself As a child these were the stories I would have liked to hear and these were the teachings I would have liked to receive as they can greatly eliminate the need of the good versus bad antithesis And this is the reason why I would like to offer them to children and people like me who may appreciate art and beauty and who may wish to create for their families a lifestyle which is more soulful and kind

The Biological Bulletin Frank Rattray Lillie,Carl Richard Moore,Alfred Clarence Redfield,1926 Vols 17 21 105 contain Annual reports of the Marine Biological Laboratory for 1907 08 1952 The Chapel and Burial Ground on St Ninian's Isle, Shetland: Excavations Past and Present: v. 32 Rachel C. Barrowman,2017-12-02 This volume is the definitive account of the excavation which led to the discovery of the magnificent hoard of 28 pieces of Pictish silverware on St Ninian s Isle Shetland in 1958 It includes a reassessment of the original archives and finds including an ogham stone found on the site in 1876 and a fantastic collection of glass beads as well as several new small scale excavations on the site of the chapel and its burial ground Taken together this work reveals a long sequence of settlement beginning in the Iron Age The first church was built on the site in the 8th century and accompanied by a long cist cemetery with cross incised stones and shrine sculpture The

church may have continued in use into the 9th or 10th centuries and the recent work has confirmed that the famous hoard was buried into its floor There was a degree of continuity between the pre Christian and Christian burials with evidence that the site was a special place for burial before the advent of Christianity The report describes these burials in detail ending the story sometime between the 11th and end of the 12th centuries when an adult male who had died a violent death was moved to be buried on the site Thereafter the site was inundated with wind blown sand A new chapel with an accompanying long cist cemetery was then built above the earlier church and a chancel was added later The associated graveyard continued in use until around 1840 long after the building was demolished
