## Snake Harvest:

Secrets of the Snake Charmer John C. Murphy, 2010-04-16 Note that there is a companion website for this book and it can be seen at <http://secretsofthesnakecharmer.blogspot.com> Humans and snakes have an intimate and ancient relationship that often revolves around either love or hate Snakes can be seen as gods spiritual messengers symbols of fertility and guardians of resources in virtually all cultures But to those that fear them snakes are seen as venomous creatures that cannot be trusted In *Secrets of the Snake Charmer* John Murphy a research associate of the Division of Amphibians and Reptiles in the Field Museum of Natural History in Chicago provides an in depth twenty first century look at snakes utilizing the published research of other herpetologists as well as his own personal experiences and speculations Murphy covers a wide range of topics such as the adaptability of snakes the ways in which evolution has tinkered with snakes during the last 160 million years and the impact snakes have on the ecological communities they live in While sharing ideas about the origin of snakes rattlesnake rattles and spitting in cobras Murphy presents an innovative portrayal of snakes that proves they co evolve with their prey predators and parasites in order to fulfill a significant and novel role in the web of life

*Snake Meat Trade* Olivia Clark, AI, 2025-03-11 *Snake Meat Trade* explores the intricate relationship between humans and snakes by examining the practice of ophidian consumption across various cultures It highlights the biological social and economic dimensions of this often overlooked food source The book reveals that snake meat provides essential nutrition and income for many communities while also acknowledging the ecological implications of snake harvesting such as its potential impact on snake populations and the risk of zoonotic disease transmission The book is structured to provide a comprehensive understanding of the topic It begins with the biology of edible snakes moves on to harvesting and trade practices particularly in Southeast Asia and Africa and concludes with an exploration of cultural and culinary aspects By integrating insights from diverse fields like biology economics and anthropology *Snake Meat Trade* offers a balanced perspective on the sustainable harvesting of snakes The book emphasizes that understanding snake consumption requires appreciating its historical context and cultural significance

Snakes Stephen J. Mullin, Richard A. Seigel, 2011-08-15 Destruction of habitat due to urban sprawl pollution and deforestation has caused population declines or even extinction of many of the world's approximately 2 600 snake species Furthermore misconceptions about snakes have made them among the most persecuted of all animals despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests It has become increasingly urgent therefore to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability In the first book on snakes written with a focus on conservation editors Stephen J Mullin and Richard A Seigel bring together leading herpetologists to review and synthesize the ecology conservation and management of snakes worldwide These experts report on advances in current research and summarize the primary literature presenting the most important concepts and

techniques in snake ecology and conservation The common thread of conservation unites the twelve chapters each of which addresses a major subdiscipline within snake ecology Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered Each chapter provides an essential framework and indicates specific directions for future research making this a critical reference for anyone interested in vertebrate conservation generally or for anyone implementing conservation and management policies concerning snake populations Contributors Omar Attum Indiana University Southeast Steven J Beaupre University of Arkansas Xavier Bonnet Centre National de la Recherche Scientifique Frank T Burbrink College of Staten Island The City University of New York Gordon M Burghardt University of Tennessee Todd A Castoe University of Colorado David Chiszar University of Colorado Michael E Dorcas Davidson College Lara E Douglas University of Arkansas Christopher L Jenkins Project Orianne Ltd Glenn Johnson State University of New York at Potsdam Michael Hutchins The Wildlife Society Richard B King Northern Illinois University Bruce A Kingsbury Indiana University Purdue University Fort Wayne Thomas Madsen University of Wollongong Stephen J Mullin Eastern Illinois University James B Murphy National Zoological Park Charles R Peterson Idaho State University Kent A Prior Parks Canada Richard A Seigel Towson University Richard Shine University of Sydney Kevin T Shoemaker College of Environmental Science and Forestry State University of New York Patrick J Weatherhead University of Illinois John D Willson University of Georgia
