## **Snake Living Things Living Things Ser:**

**The Archetypal Symbolism of Animals** Barbara Hannah, 2006 This volume presents Barbara Hannah's Jung Institute lectures of 1954-58. In these profound talks she speaks of the archetypal symbolism of seven animals: cat, dog, horse, serpent, lion, bull, and cow, discussing their roles in the psychological and cultural life of the West.

**North American Indian Life** Elsie Clews Parsons, 2013-02-20. DIV27 fictionalized essays by noted anthropologists examine religion, customs, government, and additional facets of life among the Winnebago, Crow, Zuni, Eskimo, and other tribes.

**Curious Species** Whitney Barlow Robles, 2024-01-05. A compelling and innovative exploration of how animals shaped the field of natural history and its ecological afterlives. Can corals build worlds? Do rattlesnakes enchant? What is a raccoon and what might it know? Animals and the questions they raised thwarted human efforts to master nature during the so-called Enlightenment, a historical moment when rigid classification pervaded the study of natural history. People traded in people, and imperial avarice wrapped its tentacles around the globe. Whitney Barlow Robles makes animals the unruly protagonists of eighteenth-century science through journeys to four spaces and ecological zones: the ocean, the underground, the curiosity cabinet, and the field. Her forays reveal a forgotten lineage of empirical inquiry, one that forced researchers to embrace uncertainty. This tumultuous era in the history of human-animal encounters still haunts modern biologists and ecologists as they struggle to fathom animals today. In an eclectic fusion of history and nature writing, Robles alternates between careful historical investigations and probing personal narratives. These excavations of the past and present of distinct nonhuman creatures reveal the animal foundations of human knowledge and show why tackling our current environmental crisis first requires looking back in time.

**In Gods We Trust** Scott Atran, 2004-12-09. Atran argues that religion is a by-product of human evolution, just as the cognitive intervention, cultural selection, and historical survival of religion is an accommodation of certain existential and moral elements in the human condition.

*Popular Science Monthly and World Advance*, 1925

**An Encyclopedia of Shamanism Volume 2** Christina Pratt, 2007-08-01. Shamanism can be defined as the practice of initiated shamans who are distinguished by their mastery of a range of altered states of consciousness. Shamanism arises from the actions the shaman takes in non-ordinary reality and the results of those actions in ordinary reality. It is not a religion, yet it demands spiritual discipline and personal sacrifice from the mature shaman who seeks the highest stages of mystical development.
