or what it was meant to do but it is the most powerful item on her person and it is the only thing she can leave him That leaf however was created to serve a purpose that Jewel does not understand Nor does Carver who now possesses it With Ellerson by his side Carver intends to traverse the wild Winter in an attempt to reach home and the people who are waiting for him There are those who do understand the significance of Carver s gift and the disaster that will prevail if it remains in his hands But time is of the essence These lands are not unclaimed and the Lord of these lands is waking from his ancient slumber Nor is the Lord the only threat Firstborn demons and wild elementals are swirling around two mortal men in a storm that threatens to end the only chance the city of Averalaaan has of surviving what is to follow

cognition We are constantly faced with a swirling and intermingling multitude of ill defined situations Our brain s job is to try to make sense of this unpredictable swarming chaos of stimuli How does it do so The ceaseless hail of input triggers analogies galore helping us to pinpoint the essence of what is going on Often this means the spontaneous evocation of words sometimes idioms sometimes the triggering of nameless long buried memories Why did two year old Camille proudly exclaim I undressed the banana Why do people who hear a story often blurt out Exactly the same thing happened to me when it was a completely different event How do we recognize an aggressive driver from a split second glance in our rearview mirror What in a friend s remark triggers the offhand reply That s just sour grapes What did Albert Einstein see that made him suspect that light consists of particles when a century of research had driven the final nail in the coffin of that long dead idea The answer to all these questions of course is analogy making the meat and potatoes the heart and soul the fuel and fire the gist and the crux the lifeblood and the wellsprings of thought Analogy making far from happening at rare intervals occurs at all moments defining thinking from top to toe from the tiniest and most fleeting thoughts to the most creative scientific insights Like G Escher Bach before it Surfaces and Essences will profoundly enrich our understanding of our own minds By plunging the reader into an extraordinary variety of colorful situations involving language thought and memory by revealing bit by bit the constantly churning cognitive mechanisms normally completely hidden from view and by discovering in them one central invariant core the incessant unconscious quest for strong analogical links to past experiences this book puts forth a radical and deeply surprising new vision of the act of thinking
