**Therapy** Alan S. Gurman,David P. Kniskern,2014-01-21 This volume reflects the achievements in developing new concepts and models of family therapy and new approaches to special clinical issues and problems during the 1980s Chapters by experts such as Boszormenyi Nagy Everett Guttman Lankton Liddle McGoldrick Madanes and Walsh offer insight into a variety of areas including systems theory cybernetics and epistemology contextual therapy Ericksonian therapy strategic family therapy treating divorce in family therapy practice ethnicity and family therapy and training and supervision in family therapy The Origins of Family Psychotherapy Murray Bowen,2013-03-28 Family therapy has become a well established treatment modality across many mental health disciplines including clinical social work psychology psychiatry nursing and counseling This book tells the story of how family therapy began based on the work of one of the pioneers of family theory and therapy Murray Bowen M D Bowen s psychiatric training began at the Menninger Foundation in 1946 It was during the later part of his eight years at Menninger s that he began his transition away from conventional psychoanalytic theory and practice Bowen left Menninger s in 1954 and began a historic family research program at the National Institutes of Mental Health NIMH in Bethesda Maryland This program called the Family Study Program involved hospitalizing entire families on a specialized research ward He was interested in families with a child diagnosed with schizophrenia There were two central

findings of Bowen's four year project. The first was the concept that the family could be conceptualized and treated as an emotional unit. The second was family psychotherapy which began as staff family daily meetings on the inpatient unit. The findings of Bowen's project remain part of mainstream mental health practice today. From that project Bowen went on to develop his well known eight interlocking theoretical concepts that continue to be highly influential both in mental health and business. Bowen's project also significantly transformed the therapeutic relationship. The psychotherapist tried to achieve a balance when working with the families by making emotional connections while staying out of intense emotional reactions. They also worked diligently to avoid psychologically replacing parents. This book details the story of how these transformative changes came about by highlighting the original papers of the project.

**Treatment In Crisis Situations** Naomi Golan, 1998-10. Treatment Approaches in the Human Services is a new series of books by distinguished social work practitioners and educators prepared under the general editorship of Francis J. Turner. Its objective is to present both the theoretical basis and the direct practice implications of the various thought systems upon which clinicians draw in their work and to make this rich accumulation of theory and methods accessible not only to social workers but to practitioners in other helping professions as well. The books are also intended for the student professional, the senior scholar and the teacher of professionals providing a bridging resource between practice and theory development. Each volume in the series analyzes the conceptual base of a particular intervention strategy or set of therapeutic procedures, identifies its theoretical origins, compares it to other thought systems and explains and describes in concrete detail how it is applied in practice. Further, it identifies the areas of on going and needed research to make that approach an even more useful tool to the clinician.
