Social Change And Conservation:

Social Change and Conservation Kléber Bertrand Ghimire, Michel P. Pimbert, 1997 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company **Social Change and Conservation** Kléber Bertrand Ghimire, Michel P. Pimbert, 2009 This is a powerful book It is about conflict rights process professionalism paradigms power politics gender biodiversity sustainability and political economy It argues a case for radical reorientation in the current conservation thinking and argues it with empirical evidence and moral force The chapters individually and cumulatively pack formidable punch There is an alternative paradigm here which is practical and which simply has to be the wave of the future The question is not whether this paradigm will prevail but how soon and how well There is a wonderful opportunity for a win win scenario with gains both for people and for nature Rober Chambers Professor Institute of Development Studies UK This book should become the starting point of a worldwide public enquiry into the workings of institutions and international policies committed to conservation The general public who have very generously supported the cause of conservation have a right to know why many advertised conservation policies have not succeeded where the real problems lie what should be done in the future and who we should turn to for help These are some of the questions addressed in this volume Vithal Reian Founder Member of the Deccan Development Society and the Confederation of Voluntary Associations India member of the Right Livelihood Award Jury Sweden Protected areas and conservation policies are usually established with only local nature and wildlife in mind Yet they can have far reaching consequences for local populations often undermining their access to resources and their livelihoods Social Change and Conservation is the first comprehensive discussion of the social consequences of protected area schemes and conservation policies Development, Social Change and Environmental Sustainability Sumarmi, Nanda Harda Pratama Meiji, Joan Hesti Gita Purwasih, Abdul Kodir, Edo Han Siu Andriesse, Dorina Camelia Ilies, Ken Miichi, 2021-06-17 Nowadays the concept of SDGs Sustainable Development Goals is starting to replace the concept of MDGs Millennium Developmental Goals It is a global goal adopted by all United Nations member states It emphasizes the idea that the development of every country can only be achieved by balancing other factors such as social economic and environmental sustainability It is already clear how sustainable development works with environmental ethics and management However there are still issues regarding the sustainable development and human well being Sustainable development should focus on finding a way for society to meet their present needs for the long term without sacrificing the ability of future generations to meet their needs This international seminar provides research results and literature regarding the topic of sustainable development concept the dynamics of sustainable development and social change and environmental sustainability The international seminar entitled 1st International Conference on Contemporary Sociology and Educational Transformation listed speakers from several countries providing an overview on human and environmental resilience This book contains a selection of papers presented at the conference **Handbook of Quality of Life and Social Change**

Cornelia C. Walther, 2024-10-04 This handbook provides an extensive overview of the links between quality of life and social change as pursued in not only humanitarian and development work but also in the private sector and academia. It combines theoretical and practice focused chapters and addresses socio economic environmental and political governance aspects as well as communication and human behavioural factors that favour or hamper social change dynamics. The handbook showcases vast diversity both in the authorship which includes practitioners from a wide range of sectors and academics from various disciplines as well in geographical contexts and regions. The chapters cover a wide range of methods and tools which facilitate an inclusive understanding of the relationship between quality of life and social change. They show connections between micro individual changes and the dynamics that derive from them at the meso community macro country and meta levels. The handbook provides a holistic perspective to social change processes that includes both material and non material aspects relating to quality of life. This comprehensive and one of a kind volume is of interest to a wide readership from students and researchers of social development quality of life and wellbeing research to development workers policy makers and other government officials. The handbook is bundled with an interactive online course.

Social Change and the Global Environment Lynn Shields &

Leslie Armstrong, 2018-08-22 Over the last two decades radical transformations have been taking place in the social and economic systems. Through the process of globalization increased opportunities exist for some but disenfranchisement and social dislocations for the great majority are also increasing. Globalization has produced tension between traditional bases of livelihood and emerging export oriented commercial production of non traditional items. And finally globalization has contributed a great deal in deepening the distinction between work and leisure and defining the contours of leisure activities. Providing a number of empirical and historical studies of leisure from different cultures this will be of immense book to the students of social sciences and humanities. It is useful for all those students social scientists and policy makers who are interested in analyzing social change in the light of this unstoppable process of globalization.

Social Change And The Middle Classes Tim Butler, Mike Savage, 2013-11-05 First Published in 1995 The study of the middle classes actually poses a variety of interesting challenges. Traditionally the social scientific gaze has been directed either downwards to the working classes the poor and the dispossessed or upwards to the wealthy and powerful. For all these reasons a collection of original papers on various aspects of the British middle classes seems an important venture that will cast valuable light on the course of social change in Britain more generally. This book is designed to bring together a series of accessible high quality research papers on various aspects of the British middle classes.

Participatory Planning in the Caribbean: Lessons from Practice Robert Potter, Jonathan Pugh, 2018-05-08 This title was first published in 2003. Until recently planning and development in the Caribbean have been top down centre out and expert led. For a few years now though the region has

bowed to the global trend and has experimented with participatory planning methods Participatory planning is heralded by much of the development community as the most appropriate alternative strategy to the traditional approaches In this volume a range of experts drawn from the Caribbean the United Kingdom and the United States review the current achievements and future prospects for genuinely participative planning in the Caribbean region at the beginning of the 21st Century Bringing together a wide range of case studies from both the insular Caribbean as well as mainland Central and South America the book examines issues such as protected area planning sustainable development councils gender and development inner city redevelopment and community empowerment *The Theory of Social Change* John

McLeish, 2013-11-05 This is Volume XIX of twenty two in the Social Theory and Methodology series First published in 1969 this study looks at four views of the theory of social change and is intended for students in social studies education and social psychology at university level **Integrating and Articulating Environments** F. Adaman, F. Goksen, J. Grolin, M.

O'Brien, O. Seippel, E.U. Zenginobuz, 2003-01-01 A critical comparative exploration of the framing of environmental problems in Northern and Southern Europe The book addresses theoretical and empirical questions about environmental attitudes and behaviours politics and protest cultures and contexts **Climate Change, Adaptive Capacity and Development** Joel B.

Smith, Saleemul Huq, Richard J. T. Klein, 2003 The Third Assessment Report of the Intergovernmental Panel on Climate Change IPCC has presented strong evidence that human induced climate change is occurring and that all countries of the world will be affected and need to adapt to impacts The IPCC points out that many developing countries are particularly vulnerable because of their relatively low adaptive capacity **Political Ecology and Tourism** Sanjay Nepal, Jarkko

Saarinén, 2016-02-26 Political ecology explicitly addresses the relations between the social and the natural arguing that social and environmental conditions are deeply and inextricably linked Its emphasis on the material state of nature as the outcome of political processes as well as the construction and understanding of nature itself as political is greatly relevant to tourism Very few tourism scholars have used political ecology as a lens to examine tourism centric natural resource management issues This book brings together experts in the field with a foreword from Piers Blaikie to provide a global exploration of the application of political ecology to tourism It addresses the underlying issues of power ownership and policies that determine the ways in which tourism development decisions are made and implemented Furthermore contributions document the complex array of relationships between tourism stakeholders including indigenous communities and multiple scales of potential conflicts and compromises This groundbreaking book covers 15 contributions organized around four cross cutting themes of communities and livelihoods class representation and power dispossession and displacement and environmental justice and community empowerment This book will be of great interest to students and scholars in tourism geography anthropology sociology environmental studies and natural resources management **The Importance of Biological**

Interactions in the Study of Biodiversity Jordi López-Pujol, 2011-09-22 The term biodiversity defines not only all the

variety of life in the Earth but also their complex interactions Under the current scenario of biodiversity loss and in order to preserve it it is essential to achieve a deep understanding on all the aspects related to the biological interactions including their functioning and significance This volume contains several contributions nineteen in total that illustrate the state of the art of the academic research in the field of biological interactions in its widest sense that is not only the interactions between living organisms are considered but also those between living organisms and abiotic elements of the environment as well as those between living organisms and the humans

Sustainable Development and Learning William Scott, Stephen Gough, 2003 This book examines the difficult and wide ranging issues relating to how we understand our environment our place in it and how we choose to act This comprehensive text provides an overview of these developing key issues illustrating how through schooling higher education professional training and development and awareness raising people can bring about change as well as engaging in debate and critique of issues The book builds on existing work across a number of fields as well as on original international research in order to model the complexity of the problems the institutional contexts in which they arise and the interrelationships between these Areas explored include the policy context the links between sustainable development and learning the economic and moral interdependence of humans and nature the management assessment and evaluation of learning and globalisation The book suggests ways in which those responsible for learning can target their efforts appropriately matching straightforward solutions to simple problems and designing complex interventions only where these are needed This text will be a valuable resource for anyone studying Masters degrees and MBAs that focus on environment or sustainable development and for professionals dealing with problems on a day to day basis Though a free standing text its analysis is supported by a companion reader Key Issues in Sustainable Development and Learning a critical review

Communities in Transition: Protected Nature and Local People in Eastern and Central Europe Saska Petrova, 2016-05-23 The role of local people in contemporary nature conservation practices is often poorly understood or neglected This book therefore examines questions of local participation at the nature society nexus within national parks in the transitional context of Central and Eastern Europe CEE The post 1990 reconfiguration of conservation paradigms in this part of the world has re opened various age old debates about the protection and administration of natural heritage Further complicating the situation has been the introduction of market based principles which has embedded the entire process in broader dynamics of neoliberalization and the capitalist space economy Providing an integrated perspective on why how and for whom nature conservation practices have been implemented in CEE this book sheds further light upon the mechanisms through which such practices both redefine and are affected by the everyday life of people living in national parks Offering a critical global review of the environmental motivations and power interests behind the creation of national parks as well as a typology of the relations between local people and the dynamics of nature protection in them this work challenges the dichotomy between developed and developing countries that pervades much of the academic literature on nature protection

Author Saska Petrova highlights the lessons that can be learnt by applying the experiences of local community participation in environmental management in CEE to other locations undergoing major systemic change in their environmental governance practices such as the low carbon transition that is currently unfolding at a global scale **Ecotourism, NGOs**

and Development Jim Butcher, 2007-03-12 This topical book examines the advocacy of tourism as sustainable development in a range of NGOs and within the general literature It offers a timely critique of key assumptions underlying ecotourism's status as sustainable development **Sustainable Development and Learning: framing the issues** Stephen

Gough, William Scott, 2003-12-16 This book examines the difficult and wide ranging issues relating to how we understand our environment our place in it and how we choose to act This comprehensive text provides an overview of these developing key issues illustrating how through schooling higher education professional training and development and awareness raising people can bring about change as well as engaging in debate and critique of issues The book builds on existing work across a number of fields as well as on original international research in order to model the complexity of the problems the institutional contexts in which they arise and the interrelationships between these Areas explored include the policy context the links between sustainable development and learning the economic and moral interdependence of humans and nature the management assessment and evaluation of learning and globalisation The book suggests ways in which those responsible for learning can target their efforts appropriately matching straightforward solutions to simple problems and designing complex interventions only where these are needed This text will be a valuable resource for anyone studying Masters degrees and MBAs that focus on environment or sustainable development and for professionals dealing with problems on a day to day basis Though a free standing text its analysis is supported by a companion reader Key Issues in Sustainable Development and Learning a critical review **Celebrity Colonialism** Robert Clarke, 2020-06-12 Celebrity Colonialism brings together

studies on an array of personalities movements and events from the colonial era to the present and explores the intersection of discourses formations and institutions that condition celebrity in colonial and postcolonial cultures Across nineteen chapters it examines the entanglements of fame and power fame in colonial and postcolonial settings Each chapter demonstrates the sometimes highly ambivalent roles played by famous personalities as endorsements and apologists for antagonists and challengers of colonial imperial and postcolonial institutions and practices And each in their way provides an insight into the complex set of meanings implied by novel term celebrity colonialism The contributions to this collection demonstrate that celebrity provides a powerful lens for examining the nexus of discourses institutions and practices associated with the dynamics of appropriation domination resistance and reconciliation that characterize colonial and postcolonial cultural politics Taken together the contributions to Celebrity Colonialism argue that the examination of celebrity promises to enrich our understanding of what colonialism was and more significantly what it has become **Zoos**

and Aquariums in the Public Mind John Fraser, Joe E. Heimlich, Kelly Riedinger, 2023-01-16 This book summarizes a range

of psychological research into how zoos and aquariums operate in the minds of visitors and the broader public Bringing together core findings from emerging international research the book provides data based summaries that situate the content in the larger context of how cultural institutions shape public understanding The focus of this book is to bring into a single resource the major strains of research that have explored how zoos and aquariums are situated in public consciousness to ground the discourses around what zoos and aquariums do in the empirical data and evidence and to find opportunities to summarize well established fact to support future research expanding on the known Among the topics discussed History of zoo and aquarium development The role of zoos and aquariums in environmental literacy Empathy development at zoos Applying behavior change theories to the zoo visitor s experience Social radiation of ideas from cultural institutions Professional practitioners zoo industry professionals and business leaders will find this book an invaluable guide to the psychological literature surrounding the zoo industry **Unifying Geography** David T. Herbert, John A.

Matthews, 2004-08-05 It can be argued that the differences in content and approach between physical and human geography and also within its sub disciplines are often overemphasised The result is that geography is often seen as a diverse and dynamic subject but also as a disorganised and fragmenting one without a focus Unifying Geography focuses on the plural and competing versions of unity that characterise the discipline which give it cohesion and differentiate it from related fields of knowledge Each of the chapters is co authored by both a leading physical and a human geographer Themes identified include those of the traditional core as well as new and developing topics that are based on subject matter concepts methodology theory techniques and applications Through its identification of unifying themes the book will provide students with a meaningful framework through which to understand the nature of the geographical discipline Unifying Geography will give the discipline renewed strength and direction thus improving its status both within and outside geography
