## **Social Change In Western Europe:**

**Social Change in Western Europe** Colin Crouch, 1999 What do European societies look like at the end of a turbulent millennium which saw western Europe slowly rise to global domination and then rapidly decline to its present position prosperous but clearly behind the USA in world influence This is the only book by a single sociologist to make a systematic and up to date comparison of virtually all west European countries across a wide range of social institutions These include work and occupations the structure of the economy the family education religion nationality and ethnicity and the mechanism of citizenship in the welfare state Particular emphasis is placed on the place of gender and social class By including basic details on Japan and the United States throughout the author is able to draw attention to any shared west European specificities The book also develops a theory of change in contemporary societies Starting from a model of a mid century social compromise based on certain balances between industrialism capitalism traditional community institutions and community it traces its subsequent destabilization and places particular importance on the resurgence of capitalism in shaping a new social order This important new study of the social structure of western Europe will be essential reading for all students of comparative sociology and European sociology [Generations, Political Participation and Social Change in Western Europe](#) Maria Grasso, 2016-03-31 This new comparative analysis shows that there are reasons to be concerned about the future of democratic politics Younger generations have become disengaged from the political process The evidence presented in this comprehensive study shows that they are not just less likely than older generations to engage in institutional political activism such as voting and party membership they are also less likely to engage in extra institutional protest activism [Generations Political Participation and Social Change in Western Europe](#) offers a rigorously researched empirical analysis of political participation trends across generations in Western Europe It examines the way in which the political behaviour of younger generations leads to social change Are younger generations completely disengaged from politics or do they simply choose to participate in a different way to previous generations The book is of key interest to scholars students and practitioners of political sociology political participation and behaviour European Politics Comparative Politics and Sociology *The Postwar Challenge* Dominik Geppert, 2003 This volume charts the cultural political and social changes which took place in Western Europe during the first thirteen years after the Second World War It brings together seventeen essays by experts from Britain France Germany Italy and the USA Western European nations faced many challenges during this period the psychological and material aftermath of the war the need for economic and social restructuring and the impact of the Cold War on domestic political social and cultural developments To explore the responses to these challenges transnational and national perspectives need to be combined Thus the first two sections compare key developmental processes in Britain France West Germany and Italy They ask how these nations came to terms with their most recent history and how they addressed the problems of economic and social restructuring A solely comparative

approach along national lines however does not do justice to the historical reality of these societies. After all they were not hermetically sealed national units but connected by individual and institutional contacts and the transfer of goods and ideas. The third section examines the area in which these links had become most obvious after 1945: the debates about the beginnings of European integration. The fourth section focuses on the influence of the USA on the social and cultural reorganization of Western Europe. It abandons national subdivisions altogether and examines some agents of American influence in Western Europe.

Paterson,2013-07-23 First published in 1993 This title is the product of a conference designed to throw light on some central

questions about the phase of programmatic renewal from the 1950s to the then present day The evidence presented in this volume pursues to demonstrate the existence of a European wave of social democratic programmatic renewal effort during the 1980s the sweep of which the author argues being broader than the previous renewal wave in the 1950s Youth, Citizenship and Social Change in a European Context John Bynner, Lynne Chisholm, Andy Furlong, 2019-01-22 Published in 1997 this text is built around themes agreed upon for a conference which aimed to set the agenda for youth research over the next decade These themes are the shaping of trajectories and biographies individualization agency structure vulnerable groups excluded and included youth polarization marginalization social construction of identity identity culture gender ethnicity political and social participation and citizenship The book brings together the work of British and Continental researchers *New Religious Movements and Rapid Social Change* James A. Beckford, 1986-11-01 The book shows how rapid social change gives rise to novel religious interpretations and how new religious movements in turn try to influence the process of change This analysis is illustrated by studies of the advanced societies of North America and Europe of Japan during the first phase of industrialization and of countries and regions in the developing world New religious movements are revealed as a normal aspect of social life and as critical indicators of social change This is reflected in each movement s social composition teachings values religious practices and organizational structures as well as their engagement in politics business and their structuring of social relationships Publisher s description *Social Change and Modernization* Bruno Grancelli, 1995 No detailed description available for Social Change and Modernization **Agrarian Development and Social Change in Eastern Europe, 14th-19th Centuries** Péter Gunst, 2024-10-28 What was Eastern European about the historical development of Eastern Europe How is the region to be defined And specifically where was Hungary to be situated in relation to it These are the questions underlying the studies in this volume In the first part Professor Gunst sets out to analyse some of the characteristics of the economic and social history of Eastern Europe He then focuses on Hungary and argues that the course of its agrarian development in particular has since the Middle Ages been primarily shaped by the influence and military challenge from the West The most important factor in this however was the mass immigration of German peasants which had a far reaching impact on village and community systems and patterns of taxation and crop rotation **The Reshaping of West European Party Politics** Christoffer Green-Pedersen, 2019 This book focuses on the issue of the agenda of party politics Studying how political parties come to compete about some issues rather than others allows us to assess the role of new political parties This book highlights the central role of the parties that have traditionally governed in West European countries
