What Is a Person? Christian Smith, 2010-09-15 What is a person This fundamental question is a perennial concern of philosophers and theologians But Christian Smith here argues it also lies at the center of the social scientist's quest to interpret and explain social life In this ambitious book Smith presents a new model for social theory that does justice to the best of our humanistic visions of people life and society Finding much current thinking on personhood to be confusing or misleading Smith finds inspiration in critical realism and personalism Drawing on these ideas he constructs a theory of personhood that forges a middle path between the extremes of positivist science and relativism Smith then builds on the work of Pierre Bourdieu Anthony Giddens and William Sewell to demonstrate the importance of personhood to our understanding of social structures From there he broadens his scope to consider how we can know what is good in personal and social life and what sociology can tell us about human rights and dignity Innovative critical and constructive

bookshelf David Bloor Edinburgh University This splendid and possibly unique work steers a skilful course between narrower conceptions of philosophy and the social sciences It will be an invaluable resource for students and researchers in either or both fields and to anyone working on the interrelations between them William Outhwaite Newcastle University The Encyclopedia of Philosophy and the Social Sciences is the first of its kind in bringing the subjects of philosophy and the social sciences together It is not only about the philosophy of the social sciences but going beyond that it is also about the relationship between philosophy and the social sciences The subject of the Encyclopedia is purposefully multi and interdisciplinary Knowledge boundaries are both delineated and crossed over The goal is to convey a clear sense of how philosophy looks at the social sciences and to mark out a detailed picture of how the two are interrelated interwoven at certain times but also differentiated and contrasted at others The Entries cover topics of central significance but also those that are both controversial and on the cutting edge underlining the unique mark of this Encyclopedia the interrelationship between philosophy and the social sciences especially as it is found in fresh ideas and unprecedented hybrid disciplinary areas The Encyclopedia serves a further dual purpose it contributes to the renewal of the philosophy of the social sciences and helps to promote novel modes of thinking about some of its classic problems **How Black Disadvantaged**

The Ivory Tower of Babel David Demers,2011 Mainstream social science has come under fierce criticism in recent decades for failing to have more impact on public policy Critics say the social sciences are incapable of generating knowledge that can solve social problems Others contend that partisan politics and university administrations are the problem Politicians are more concerned about special interests than scientific research and administrators care more about scholarly publications than solving social problems Are the social sciences failing to live up to their promises Have they outlived their usefulness Have they become an Ivory Tower of Babel Like the Babylonians who built the infamous Tower of Babel social scientists for the past two centuries have been building a tower of sorts only this time it's composed of knowledge rather than bricks The primary goal of these scholars anthropologists communication scholars economists political scientists sociologists and social psychologists has been to solve problems of social integration The Babylonian tower was designed in part to unite people to one geographical area Similarly social scientists see their tower of knowledge as a means for solving social problems such as poverty crime drug abuse inequality unemployment abuse of power that alienate people and groups from modern society The Babylonians failed because of divine intervention according to the Bible The social scientists aren't finished building their tower But according to critics the results so far look less like a tower of knowledge for solving social problems than an Ivory Tower of Babel one in which social scientists routinely dispute each other's theories and data and

even uncontested or well supported findings rarely influence public policy Disputes over the nature of truth and knowledge are so commonplace in the social sciences that many scholars believe a social science which uses methods from the natural sciences is incapable of generating knowledge that can solve social problems This book examines the history and philosophy of the social sciences and theoretical and empirical research on the impact of social science Suggestions are offered at the end for enhancing the impact of the social sciences A number of scientific articles and books have been written about the impact or lack thereof of the social sciences on public policy but none has been written specifically to appeal to both academics and a broader market composed of the general public and students in both undergraduate and graduate level courses The author takes the reader on a journey inside one of the best kept secrets in higher education that much if not most of the research conducted in the social sciences has very little impact on public policy or on solving social problems Are taxpayers getting their money s worth
