Social And Cultural Perspectives In Nutrition:

Social and Cultural Perspectives in Nutrition Diva Sanjur, 1982 Abstract A biocultural approach to nutrition emphasizes the impact of the social sciences on food intake Purchasing preferences and ideology are heavily influenced by social economic political and cultural processes Food consumption surveys data collection and analysis including types of dietary surveys the interview statistical methods and reliability of methods are discussed Time and cost factors have led to new approaches in dietary assessment such as scalogram analysis food scores and quality indices Widely divergent dietary patterns of Americans are discussed by ethnic group Puerto Ricans Black Americans Mexican Americans American Indians several tribes and Asian Americans Chinese Japanese Vietnamese Filipinos Hawaiians Food habit modification is complex due to a rigid structure of social values that determine behavior Nutrition communication specialists are needed for research activities mass media governmental nutrition action programs and mandated nutrition education programs Ethics of nutrition intervention are an important concern in affecting dietary changes Each chapter is followed by a lengthy bibliography rkm

Cultural Perspectives on Food and Nutrition Marcy Schveibinz, 1994 **Sociologies of Food and Nutrition** Wm. Alex McIntosh, 2013-11-21 Here Wm Alex McIntosh analyzes the relationship between food and nutrition and social factors using a wide array of sociological theories The author applies theories of social organization culture social stratification social change rural sociology the sociology of the body and social problems to empirical problems in food and nutrition By doing so he sheds light on issues such as the rise of the state population growth famine obesity eating disorders the maldistribution of food across class gender and ethnic boundaries and the changing nature of the food industry Food and Nutrition Paul Fieldhouse, 2013-12-14 As someone who was trained in the clinical scientific tradition it took me several years to start to appreciate that food was more than a collection of nutrients and that most people did not make their choices of what to eat on the biologically rational basis of nutritional composition This realization helped to bring me to an understanding of why people didn't always eat what I believed was good for them and why the patients I had seen in hospital as often as not had failed to follow the dietary advice I had so confidently given When I entered the field of health education I quickly discovered the famous World Health Organization definition of health as being a state of complete physical mental and social well being and not merely the absence of disease Health was a triangle and I had been guilty of virtually ignoring two sides of that triangle As I became involved in practical nutrition education initiatives the deficiencies of an approach based on giving information about nutrition and physical health became more and more apparent The children whom I saw in schools knew exactly what to say when asked to describe a nutritious diet they could recite the food guide and list rich sources of vitamins and minerals but none of this intellectual knowledge was reflected in their own actual eating habits Nutrition Education: Linking Research, Theory, and Practice Isobel R.
