**The Poetics of Commemoration** Erin Michelle Goeres, 2015 *The Poetics of Commemoration* is a study of commemorative skaldic verse from the Viking Age. It investigates how skaldic poets responded to the deaths of kings and the ways in which poetic commemoration functioned within the social and political communities of the early medieval court. Beginning with the early genealogical poem *Ynglingatal* the book explores how the commemoration of a king's ancestors could be used to consolidate his political position and to provide a shared history for the community. It then examines the presentation of dead kings in the poems *Eiríksmál* and *Hakonarmál* showing how poets could re-cast their kings as characters of myth and legend in the afterlife. This is followed by an analysis of verse in which poets use their commemoration of one king to reinforce their relationship with his successor. It is shown that poetry could both help and hinder the integration of the poet into the retinue of a new king. Focusing then on the memorial poems composed for Kings Ólafur Tryggvason and Ólafur Haraldsson as well as for the Jarls of the Orkney Islands the book considers the tension between public and private expressions of grief. It explores the strategies used by poets to negotiate the tumultuous period that followed the death of a king and to work through their own emotional responses to that loss. The book demonstrates that skaldic poets engaged with the deaths of rulers in a wide variety of ways and that poetic commemoration was a particularly effective means not only of constructing a collective memory of the dead man but also of consolidating the new social identity of the community he left behind.

Sapp,2022-06-15 This book offers new dating of the poems of the Old Norse Poetic Edda perhaps our best sources about the mythology and legends of the Viking Age This study compares the anonymous Eddic poems to dated skaldic poems with respect to five phenomena that develop diachronically in early Old Norse the expletive particle of types of negation word order types of relative clause and metrical criteria After examining these dating features individually the three most reliable criteria the particle of negation and relative clause type are combined into a multifactorial analysis using a Naïve Bayes Classifier The classifier assigns a date to each Eddic poem and these proposed dates have interesting implications for our understanding of these texts as sources for the medieval history mythology linguistics and literature of the Germanic peoples This book will have broad interdisciplinary interest not just to historical linguists and philologists but also to scholars of Norse history literature and mythology

**Odin's Ways** Annette Lassen,2021-12-24 This book is about the Old Norse god Odin It includes references to all occurrences of Odin in the Old Norse Icelandic texts including Saxo's Gesta Danorum the eddic poems Snorri's Edda and Ynglinga saga and analyses the high medieval reception and literary representations of Odin rather than the religious character of the god This is the only existing study of Odin in all the Old Norse Icelandic texts and applies a contextual method the different guises of Odin are studied on the basis of the various textual contexts and on their background in the literary and Christian intellectual milieu of the time Contrary to existing studies this method is non reductive in that it does not aim at providing a synthesis about Odin's original nature on the basis of the differing textual uses of Odin in the Middle Ages The book argues that the perceived complexity of Odin often highlighted in research is first and foremost a function of the complex textual material spanning a wide variety of genres each with its particular literary conventions and of the reception of Odin in early modern and modern mythological studies
