Indexing and Retrieval in Web 2.0** Isabella Peters,2009-12-23 In Web 2 0 users not only make heavy use of Col laborative
Information Services in order to create publish and share digital information resources what is more they index and
represent these re sources via own keywords so called tags The sum of this user generated metadata of a Collaborative
Information Service is also called Folksonomy In contrast to professionally created and highly struc tured metadata e g
subject headings thesauri clas sification systems or ontologies which are applied in libraries corporate information
architectures or commercial databases and which were developed according to defined standards tags can be freely chosen
by users and attached to any information resource As one type of metadata Folksonomies provide access to information
resources and serve users as retrieval tool in order to retrieve own re sources as well as to find data of other users The book
delivers insights into typical applications of Folksonomies especially within Collaborative Information Services and discusses
the strengths and weaknesses of Folksonomies as tools of knowl edge representation and information retrieval More over it
aims at providing conceptual considerations for solving problems of Folksonomies and presents how established methods of
