**The Snow Geese of La Pérouse Bay** F. Cooke, Robert F. Rockwell, David B. Lank, 2023 Brings together the results from a significant long term study of birds in the late twentieth century The heart of this book analyses the working of natural selection on Snow Goose plumage colour seasonal timing of breeding clutch size egg size and body size It will be useful reading for those with an interest in evolutionary ecology

**Ducks, Geese, and Swans of North America** Guy Baldassarre, 2014-11-15 The best selling and authoritative reference book on waterfowl has been fully revised and updated by one of the world's most respected waterfowl biologists Honorable Mention for the PROSE Award for Excellence Multivolume Science of the Association of American Publishers Ducks Geese and Swans of North America has been hailed as a classic since the first edition was published in 1942 A must have for professional biologists birders waterfowl hunters decoy collectors and wildlife managers this fully revised and updated edition provides definitive information on the continent's forty six species Maps of both winter and breeding ranges are presented with stunning images by top waterfowl photographers and the acclaimed original artwork of Robert W Bob Hines Originally authored by F H Kortright and later revised by Frank Bellrose this latest edition which has been meticulously updated by renowned waterfowl biologist Guy Baldassarre continues the legacy of esteemed authors Each species account contains in depth sections on identification distribution migration behavior habitat population status breeding biology rearing of young recruitment and survival food habits and feeding ecology molts and plumages conservation and management To facilitate identification the species accounts also include detailed illustrations of wings An appendix contains comparative illustrations of ducklings goslings and cygnets This edition of Ducks Geese and Swans consists of two volumes printed in full color and packaged in a slipcase along with a CD containing references and additional maps

**Human Impacts on Salt Marshes** Brian R. Silliman, Edwin D. Grosholz, Mark D. Bertness, 2009-06-03 Human Impacts on Salt Marshes provides an excellent global synthesis of an important underappreciated environmental problem and suggests solutions to the diverse threats affecting salt marshes Peter B Moyle University of California Davis

[The North American Geese](#) Paul Johnsgard, 2016-08-23 The eight currently recognized species of North American geese are part of a familiar group of birds collectively called waterfowl all of which are smaller than swans and generally larger than ducks They include the most popular of our aquatic gamebirds with several million shot each year by sport hunters Our two most abundant waterfowl the Canada goose and snow goose have populations collectively totaling about 15 million individuals Like swans the lifelong pairbonding of geese their familial care and prolonged social attachment to their offspring are legendary Their seasonal migratory flights sometimes span thousands of miles and the sight of their long wavering flight formations are as much the symbols of seasonal change as are the spring songs of cardinals or the appearance of autumnal leaf colors This book describes each species geographic range and subspecies its identification traits weights and measurements and criteria for its age and sex determination Ecological and behavioral information

includes each species breeding and wintering habitats its foods and foraging behavior its local and long distance movements and its relationships with other species Reproductive information includes each species age of maturity pair bond pattern pair forming behaviors usual clutch sizes and incubation periods brooding behavior and postbreeding behavior Mortality sources and rates of egg young and adult losses are also summarized and each species past and current North American populations are estimated In addition to a text of nearly 60 000 words the book includes 8 maps 21 line drawings and 28 photographs by the author as well as more than 700 literature citations *Microevolution Rate, Pattern, Process* Andrew P. Hendry, Michael T. Kinnison, 2012-12-06 From guppies to Galapagos finches and from adaptive landscapes to haldanes this compilation of contributed works provides reviews perspectives theoretical models statistical developments and empirical demonstrations exploring the tempo and mode of microevolution on contemporary to geological time scales New developments and reviews of classic and novel empirical systems demonstrate the strength and diversity of evolutionary processes producing biodiversity within species Perspectives and theoretical insights expand these empirical observations to explore patterns and mechanisms of microevolution methods for its quantification and implications for the evolution of biodiversity on other scales This diverse assemblage of manuscripts is aimed at professionals graduate students and advanced undergraduates who desire a timely synthesis of current knowledge an illustration of exciting new directions and a springboard for future investigations in the study of microevolution in the wild **A History of Atmospheric CO2 and Its Effects on Plants, Animals, and Ecosystems** James R. Ehleringer, Thure Cerling, M. Denise Dearing, 2005-07-28 Extensive research in geology atmospheric science and paleontology provides a detailed history of CO2 in the atmosphere and an understanding of factors that have influenced changes in the past This knowledge is used to illuminate the role of atmospheric CO2 in the modern carbon cycle and in the evolution of plants and animals With an understanding of the history and dynamics of the biosphere the authors address the future role of atmospheric CO2 and its likely effects on ecosystems This book incorporates the advances of various earth science environmental and ecological fields into an overall account of global change and the changing dynamics of life on Earth **Rates of Evolution** Philip D. Gingerich, 2019-05-09 An overview of evolutionary rates analyzing data from laboratory field and fossil record studies to extract their underlying generation to generation rates The Private Eye Mary Burns, 1996 In *The Private Eye* we learn about snow geese through the eyes of Native people scientists artists hunters and farmers Yup ik Eskimo Charles Hunt harvests snow geese along the Yukon River delta each fall continuing a subsistence way of life that has existed for millennia Russian Canadian and US scientists track the movements of the geese each spring and fall banding sexing counting and precisely monitoring the activities of these beautiful birds Robert Bateman provides an artist s view of nature and relates how his curiosity led him to join a camp set up at a remote nesting site Mary Burns also talks to hunters joining a party of them as they wait for their snow geese decoys to lure the real thing into a Westham Island field in the Fraser delta To complete the experience she

prepares snow geese for supper As well Burns travels around the Skagit River delta during a population survey and meets a dairy farmer who describes both the wild flocks that converge on his fields each spring and the snow geese he raises in pens The Private Eye suggests that by acknowledging our many and varied connections with the natural world we will have a better understanding of the human place in it *Ptilochronology* Thomas C. Grubb Jr.,2006-06-29 This is the first book to summarize the methods conceptual issues and results of studies using the interpretation of feather growth rates as an index of nutritional condition in birds The author has coined the term ptilochronology literally the study of feather time to describe this technique which relies on the fact that as a feather grows it produces visible growth bars Both the technique and its conceptual foundations have been applied worldwide to numerous studies of avian evolution ecology and conservation biology The author reviews this work chronicles the various criticisms that have been made and describes how these have influenced the development of ptilochronology He goes on to suggest experimental methodologies and analytical techniques to safeguard against invalid results A final chapter summarises this new technique s contribution to avian biology and suggests potential applications and a future research agenda An appendix details specific measurements and describes the methodology associated with ptilochronology Ptilochronology provides a practical resource as well as a conceptual understanding of how this technique can be used to address important questions in avian biology It will be of relevance and use to professional avian biologists and ornithologists as well as to graduate students of avian behavioural ecology evolution and conservation **Ecology and Conservation of North American Sea Ducks** Jean-Pierre L. Savard,Dirk V.

Derksen,Dan Esler,John M. Eadie,2015-04-13 The past decade has seen a huge increase in the interest and attention directed toward sea ducks the Mergini tribe This has been inspired in large part by the conservation concerns associated with numerical declines in several sea duck species and populations as well as a growing appreciation for their interesting ecological attributes Reflec **106-1 Oversight Hearing: Mid-Continent Light Geese, Serial No. 106-22, March 15, 1999** ,1999

*Mid-continent Light Geese* United States. Congress. House. Committee on Resources. Subcommittee on Fisheries Conservation, Wildlife, and Oceans,1999 **Avian Growth and Development** J. Matthias Starck,Robert E.

Ricklefs,1998 This is the first re appraisal in 50 years of concepts of development made in birds This book is a case study in evolutionary diversification of life histories Although birds have a rather uniform body plan and physiology they exhibit marked variation in development type parental care and rate of growth Altricial birds are fully dependent on their parents for warmth and nutrition and begin posthatching life in a more or less embryonic condition At the other extreme such superprecocial species as the megapodes are independent of all parental care from hatching and the neonate able to fly resembles an adult bird This book thus attempts to present an integrative perspective of organism biology ecology and evolution 25 Nature Spectacles in New Jersey Joanna Burger,Michael Gochfeld,2000 From mating horseshoe crabs in the Delaware Bay to goldenclub and orchids at Web s Mill Bog the authors reveal Garden State nature at its best 99 illustrations

3 maps     Texas Waterfowl William P. Johnson, Mark W. Lockwood, 2013-01-15 In this beautifully illustrated guide two practicing wildlife biologists describe the life histories of forty five species of ducks geese and swans that occur in Texas For common species and those that breed in the state each account begins with an interesting fact such as Red breasted Mergansers have been clocked at over 80 mph the fastest recorded flight speed for a duck and provides information on Texas distribution and harvest population status diet range and habitats reproduction and appearance Exquisite photographs informative distribution maps and a helpful source list accompany the species descriptions and the book offers a glossary and full bibliography for those who want to explore the literature further With the degradation and disappearance of the inland and coastal habitats that these birds depend upon the natural history of these waterfowl species provides a vital reminder of the interconnectedness and crucial importance of all wetlands Birders biologists landowners hunters outdoor enthusiasts and all those interested in the health and preservation of our coastal and inland wetland resources will enjoy and learn from this book     **A Naturalist's Guide to the Great Plains** Paul A. Johnsgard, 2018 This book documents nearly 500 US and Canadian locations where wildlife refuges nature preserves and similar properties protect natural sites that lie within the North American Great Plains from Canada's Prairie Provinces to the Texas Mexico border Information on site location size biological diversity and the presence of especially rare or interesting flora and fauna are mentioned as well as driving directions mailing addresses and phone numbers or internet addresses as available US federal sites include 11 national grasslands 13 national parks 16 national monuments and more than 70 national wildlife refuges State properties include nearly 100 state parks and wildlife management areas Also included are about 60 national and provincial parks national wildlife areas and migratory bird sanctuaries in Canada's Prairie Provinces Many public access properties owned by counties towns and private organizations are also described     Bird Coloration Geoffrey E. Hill, Kevin J. McGraw, 2006-03 In this sumptuously illustrated companion volume to Bird Coloration Volume 1 Mechanisms and Measurements the authors explain the function of the colorful displays of birds and examine the factors that shape the evolution of color signals

**Partnerships in Birds : The Study of Monogamy** Jeffrey M. Black, 1996-05-30 Some birds mate for life while others have many partners Why In this book fourteen classic studies of bird behaviour are brought together to compare the different partnership patterns from ecological and evolutionary perspectives Often there is a battle of the sexes as individual birds behave in the way that serves their best interests Introductory and concluding chapters review the latest thinking on this fascinating subject Some birds mate for life while others have many partners In this book fourteen studies are brought together to compare different partnership patterns from ecological and evolutionary perspectives The subjects have been chosen to include the same species living in different habitats Sparrowhawks and at different population densities Great Tits There are comparisons between closely related species Mute Swans and Bewick's Swans The studies span the globe and the behavioural gradient from Iceland's strictly monogamous Whooper Swans to Australia's sexually promiscuous Splendid Fairy

wrens In all cases sexual and social relationships strongly influence a bird's survival and breeding success **Waterfowl Ecology and Management** Guy A. Baldassarre, Eric G. Bolen, 2006 Baldassarre Bolen addresses several aspects of waterfowl ecology and management This second edition includes 16 infoboxes which are stand alone inserts in the various chapters The infoboxes present information on important waterfowl people places and issues *Big Farms Make Big Flu* Rob Wallace, 2016-06-30 The first collection to explore infectious disease agriculture economics and the nature of science together Thanks to breakthroughs in production and food science agribusiness has been able to devise new ways to grow more food and get it more places more quickly There is no shortage of news items on hundreds of thousands of hybrid poultry each animal genetically identical to the next packed together in megabarns grown out in a matter of months then slaughtered processed and shipped to the other side of the globe Less well known are the deadly pathogens mutating in and emerging out of these specialized agro environments In fact many of the most dangerous new diseases in humans can be traced back to such food systems among them Campylobacter Nipah virus Q fever hepatitis E and a variety of novel influenza variants Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease But market economics doesn't punish the companies for growing Big Flu it punishes animals the environment consumers and contract farmers Alongside growing profits diseases are permitted to emerge evolve and spread with little check That is writes evolutionary biologist Rob Wallace it pays to produce a pathogen that could kill a billion people In *Big Farms Make Big Flu* a collection of dispatches by turns harrowing and thought provoking Wallace tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations Wallace details with a precise and radical wit the latest in the science of agricultural epidemiology while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens microbial time travel and neoliberal Ebola Wallace also offers sensible alternatives to lethal agribusiness Some such as farming cooperatives integrated pathogen management and mixed crop livestock systems are already in practice off the agribusiness grid While many books cover facets of food or outbreaks Wallace's collection appears the first to explore infectious disease agriculture economics and the nature of science together *Big Farms Make Big Flu* integrates the political economies of disease and science to derive a new understanding of the evolution of infections Highly capitalized agriculture may be farming pathogens as much as chickens or corn
