

A photograph of a dirt road winding through a forest. The trees on either side have vibrant autumn foliage in shades of orange, yellow, and red. The road leads towards a bright, hazy light at the end of the path, creating a sense of depth and perspective. The overall mood is peaceful and contemplative.

Life is too short, so

So Short:

*Life's Too Short to Go So F*cking Slow* Susan Lacke, 2017-11-06 Susan and Carlos were unlikely friends. She was a young overweight college professor and a bit of a trainwreck juggling a divorce, a pack a day habit, and hiding empty boxes of wine under her bed. He was her boss, an Ironman triathlete with life figured out. She was a whiner; he was a hard ass. He had his shit together; she most assuredly did not. Trash talking, workouts, breakdowns, a devastating diagnosis: this heartwarming story of training buddies reveals a deep and abiding friendship that traversed life, sport, and everything in between. Their journey reveals the inspiring power of sports and friendship to change lives forever. Amusing and poignant. *Life's Too Short to Go So F*cking Slow* is about running and triathlon, growth and heartbreak, and an epic friendship that went the distance. **The Expeditious Accountant; Or, Cyphering Rendered So Short, that Half the Trouble ... is Saved, in Most Occurrences, Etc** Nicholas SALMON, 1774 **Not so Short - Short Horror Stories, Good Sized Short Stories** Various

Introduction Jim Bennett, 2017-02-10 From the Bronze Age mariners of the Mediterranean to contemporary sailors using satellite based technologies, the history of navigation at sea, the art of finding a position and setting a course, is fascinating. The scientific and technological developments that have enabled accurate measurements of position were central to exploration, trade, and the opening up of new continents, and the resulting journeys taken under their influence have had a profound influence on world history. In this Very Short Introduction, Jim Bennett looks at the history of navigation, starting with the distinctive cultures of navigation that are defined geographically: the Mediterranean Sea and the Pacific, Indian, and Atlantic Oceans. He shows how the adoption of mathematical methods, the use of instruments, the writing of textbooks, and the publication of charts all combined to create a more standardised practice. Methods such as longitude finding by chronometer

and lunar distance were complemented by the routine business of recording courses and reckoning position by account Bennett also introduces the incredible array of instruments relied on by sailors from astrolabes sextants and chronometers to our more modern radio receivers electronic equipment and charts and highlights the crucial role played by the individual qualities of endeavour and resourcefulness from mathematicians scientists and seamen in finding their way at sea The story of navigation combines the societal the technical and the human and it was vital for shaping the modern world ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
