

Nurses in Europe codesigning an EU value-based health and social care ecosystem

Dr Paul De Raeve, Secretary-General of the European Federation of Nurses Associations (EFN) provides an in-depth perspective on the extent to which nurses in Europe are codesigning an EU value-based health and social care ecosystem

In a European society where a growing number of people live with co-morbidities, non-communicable diseases and need complex care interventions, health and social care systems are expected to give greater importance to value-based outcomes. Value-based health and social care (VBHSC) is based on the patient's experience, with a focus on the quality of life, rather than the length of stay and moving away from medical diagnoses and complications systems (ICD-10 and DRG system) towards achieved outcomes from a patient perspective.

As different dimensions need to be considered in the health and social status, the promotion of healthy lifestyles is to be included in the value-based health and social care systems and as such, patients, providers and researchers should co-design the reforms needed to achieve an inclusive system for both prevention and promotion, so that they are stepping in before you get a disease. This approach refers to both self-management and co-responsibility.

In this context, the advanced role of nurses is necessary to respond to patients and citizens' unmet needs within a people-centred approach, based on the tailored continuity of care pathways which until today, has failed to turn integrated care into a reality, often financed through EU pilots.

However, to ensure a thorough implementation of an EU value-based health and social care ecosystem approach, it is key to shift from a fee-for-service payment system – which prioritises the volume of interventions over effective, efficient and even safe

people-centred care – towards bundled payments, prioritising care pathways and continuity of care thus leaving the medical DRG approach behind.

The European debate¹

The current discussion on value-based healthcare, not value-based health and social care, is often approached as a disruptive model of healthcare for Europe, hitting most of the EU policy debates, demonstrating that health is a top concern not only for EU citizens but also for politicians and health stakeholders.

However, a reflection process on disruptive innovation for health in Europe understood as 'creating new markets or add substantial value to the existing market' is too limited for investing in such a fundamental reform. We need to go beyond the market and growth discussion, focusing on improving outcomes for patients and citizens not just in the health sector, but combining health and social care, which are two interlinked sectors.

Add to the value-based equation key components as trust, user-centred innovation and data enabling technology to act, next to teamwork and health literacy, this will make the transformation of the existing models less disruptive for patients, citizens and healthcare professionals committed to their profession in the most complex and difficult working conditions they must operate in. The slogan "take care of those who care" needs to be taken more seriously when designing value-based health and social care ecosystems in the EU.

Solidarity in Health and Social Care in Europe W. Arts, R. Muffels, 2013-03-14 OF SOLIDARITY IN UK SOCIAL WELFARE Here then perhaps is a British version of solidarity in social welfare but early there are strong tensions between the powerfully liberal individualistic strands of the British understanding of the functions of the state and the socialistic or communitarian tendency of a commitment to universal welfare provision In the search for the roots of this understanding of welfare we shall survey first the historical background to these tensions in some early British political philosophers starting with Hobbes and ending with Mill We then consider the philosophical and social influences on the Beveridge Report itself and we will trace the emergence of the philosophy of the welfare state in the era following the Second World War Finally we consider the contemporary debate as it relates to the Third Way thinking of New Labour

2 A HISTORICAL SKETCH In the previous section we observed that the philosophy underlying the Beveridge Report could be described as liberal collectivism What are the historical antecedents of this strange amalgam of individualism and collectivism Within the short scope of this chapter any account of the philosophical history must be little more than a sketch but we can perhaps understand most debates in British socio political thought as a continuing dialogue with the well known claim of Thomas Hobbes in *Leviathan* that all political institutions are founded on egoistic motives
